

ACTUATORS

Norgren offers one of the industry's most comprehensive line of pneumatic actuators. From 7/16" to 12" bores, NFPA, ISO, rodless, compacts, and many more. Choose from an assortment of construction materials. Made to order and custom applications are our specialty, and we provide quick turnaround.

Norgren Ecology Seal...

Where Cylinder Speed meets Quieter Cycles

The Ecology seal, in conjunction with a fixed cushion, provides faster and quieter cycles, without the undesirable high impact forces at the end of stroke!

The Ecology Seal is designed to work in conjunction with standard air cushion technology, and contributes up to 80% of the deceleration required at the end of stroke.

Norgren Ecology Seal Benefits

» Machine Reliability

- Eliminates end of stroke impact forces, reducing vibration and component failures
- Eliminate potential pneumatic bounce

» Increased Productivity

- Travel at higher speeds
- Up to 75% less travel time through cushion (25ms versus 100ms)
- Pre-engineered fixed cushion means no cushion screw to be adjusted or tampered with
- Reduce down time

» Reduce System Costs

- Eliminate flow controls
- Ecology seal cylinder with fixed cushions is less expensive than conventional cushioned cylinder
- Reduce cylinder bore size
- Reduce set up time

» Safe Work Environment

- Noise reduction - meets OSHA specifications
- Reduced equipment failures, minimizing injury risk

» Industry Conformance

- Conforms to industry standard dimensions, does not add length
- Available in Viton
- Widely proven and desired throughout the industry

"By eliminating the cushion needle, the Ecology Seal Cylinder saves us 1-1/2 hours set up per machine." - A leading packaging OEM

Ecology Seal

Norgren Ecology Seal - How Does it Work?

The Ecology seal is a Nitrile material and designed for two functions.

- 1) It is a pressure compensating lip-type piston seal and performs as such throughout the stroke.
- 2) It's a dampening material for superior deceleration of the piston through the final increments of stroke.

The air cushion starts the deceleration process. As the cylinder traverses towards the end of stroke, the exhausting air is free flowing through an unrestricted passage.

As the cushion spear enters the end cap, it blocks the free flowing path. The exhausting air is then forced through a very small, controlled orifice.

As the cylinder continues towards the end of stroke, the volume of air decreases, compressing the exhausting air. The exhausting air compresses to a high level, providing the deceleration force to slow the cylinder. The size of this controlled cushion orifice determines the rate of deceleration generated by the air cushion.

As the cylinder approaches the final stroke, the Ecology seal comes in contact with the end cap of the cylinder. The Ecology seal material is non-compressible, however, at full pressure, it is designed to move or deform in shape to allow the cylinder to achieve full stroke. The force required to deform this material is the final deceleration force used to bring the cylinder to a nice, smooth stop.

The Ecology seal also acts as a spring to assist in a quick release out of cushion as the cylinder initiates the traverse in the opposite direction.

Ecology Seal

Norgren Ecology Test Data Examples

Compare Norgren Ecology Cylinders with Fixed cushions to cylinders with Adjustable cushions.
Ecology cylinders yield less time through cushion and less bounce!

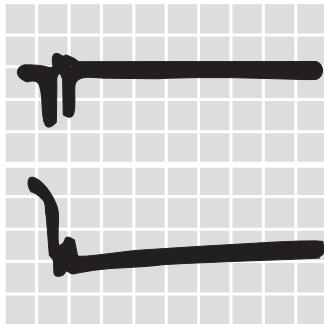

NORGREN ECOLOGY CYLINDERS with Non-Adjustable Cushions

2" Bore Rod End Cushion Test

Average deceleration force = 15 G's

Time consumed during cushioning = 0.030 sec.

Number of bounces: 1 Pneumatic – 1 Metallic

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
14.5 lbs. added to rod

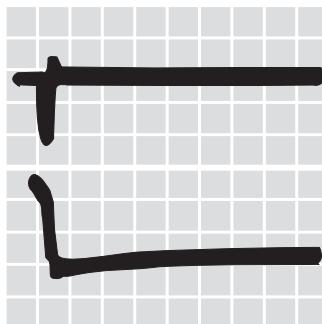

NORGREN ECOLOGY CYLINDERS with Adjustable Cushions

2" Bore Rod End Cushion Test

Average deceleration force = 20 G's

Time consumed during cushioning = 0.015 sec.

Number of bounces: 1/2 Pneumatic – 0 Metallic

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
2.5 lbs. added to rod

COMPETITIVE CYLINDERS with Adjustable Cushions

2" Bore Rod End Cushion Test

Average deceleration force = 78 G's

Time consumed during cushioning = 0.120 sec.

Number of bounces: 2 Pneumatic – 4 Metallic

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
14.5 lbs. added to rod

Hear the difference between Ecology seal cylinders with fixed cushions and non-cushioned cylinders!

Summary of Sound Levels in Decibels

		Cylinder Model Number		
PSI Air Sound Pressure Level +		Ecology A0133B3 5" X 6"	EA0155B3 5" X 6"	Ecology A1133A3 2" X 6"
95 PSI+	End ++	108	73	110
	Side ++	112	84	110
50 PSI+	End ++	108	73	113
	Side ++	113	85	110

Complete technical data for the Ecology option can be found in the corresponding product line section of the catalog

Norgren Ecology Seal Application Tips

Use an Ecology Seal Cylinder

- » When excess machine vibration due to pneumatic components is a concern
- » To reduce noise levels
- » When load deceleration is a concern
- » When cushions are required, but speed cannot be sacrificed
- » And eliminate flow controls
- » Because traditional cylinder cushions are difficult to adjust with accuracy
- » When the exposed cushion adjustment needle is not desired
- » To reduce the effects of pneumatic bounce

Ecology Seal

Norgren Ecology Seal Availability

The Patented Ecology Seal Technology has been made available across Norgren's most popular cylinder ranges. Incorporate the Ecology Seal into any of the ranges outlined below for impact dampening and noise reduction.

A Series Aluminum NFPA Cylinder (EA Series with Ecology seals)

Designation: **EA Prefix**

Bore Sizes: 1-1/2", 2", 2-1/2", 3-1/4", 4", 5", 6", 7", 8", 10", 12"

Available in Viton

Fixed Cushions or Adjustable Cushions

J Series Steel NFPA Cylinder (EJ Series with Ecology Seals)

Designation: **EJ Prefix**

Bore Sizes: 1-1/2", 2", 2-1/2", 3-1/4", 4", 5", 6", 7", 8", 10", 12"

Available in Viton

Fixed Cushions or Adjustable Cushions

LS Series NFPA Linear Slides

Designation: "EA" or "EJ" in position 3 of model number

Bore Sizes: 1-1/2", 2"

Available in Viton

Fixed Cushions or Adjustable Cushions

SS Series Stainless Steel NFPA

Designation: "6" in 11th position of model number

Bore Sizes: 1-1/8", 1-1/2", 2", 3-1/4", 4", 5", 6", 8"

Available in Viton

Fixed Cushions or Adjustable Cushions

TAE Series NFPA Tiny Tim

Bore Sizes: 3/4", 1", 1-1/8"

ET Series Non-NFPA Tiny Tim

Bore Sizes: 3/4", 1-1/8"

Designation: **ET or TAE Prefix**

Available in Viton

Adjustable Cushions

DA/8000 and PDA/182000 Series ISO/VDMA Cylinder

Designation: **BDA or BPDA Prefix**

Bore Sizes: 40mm, 50mm, 63mm, 80mm

Adjustable Cushions

RP Series Roundline Plus Disposable Cylinder

Designation: **ERP Prefix**

Bore Sizes: 3/4", 1-1/16", 1-1/4", 1-1/2", 2", 2-1/2", 3"

Fixed Cushions or Adjustable Cushions

RPD Series Delrin Roundline Plus Disposable Cylinder

Designation: **ERPD Prefix**

Bore Sizes: 3/4", 1-1/16", 1-1/2", 2"

Fixed Cushions

RT Series Roundline Plus Thrusters

Designation: **ERT Prefix**

Bore Sizes: 3/4", 1-1/16", 1-1/2", 2", 2-1/2", 3"

Fixed Cushions or Adjustable Cushions

NFPA Aluminum & Steel Cylinders

NFPA Series A Aluminum & J Steel Cylinders

1-1/2 to 12 inch bore size

Impact dampening seals

Adjustable captive cushion needle

Ecology cylinders meet OSHA noise standards

Constructed of the finest materials

Technical data

Medium:

Filtered compressed air to 250 PSI

Petroleum based hydraulic fluid to 400 PSI*

Operating temperature:

Series A & J -20°F to 200°F

with Viton Seals -20°F to 400°F

Operating Pressure:

250 PSIG Air, 400 PSIG Hydraulic* non-shock.

NOTE: EA and EJ max pressure rating: 150 psi.

Bore Sizes: 1-1/2", 2", 2-1/2", 3-1/4", 4", 5", 6", 7", 8", 10", 12"

Lubrication:

None required

Norgren Air Cylinders are rated for "no lube added" service. All internal components are lubricated at time of assembly with a Teflon® based grease.

Materials

Head and End Caps:

(A and EA Series)
black anodized aluminum alloy
(J and EJ Series)
precision machined steel*

Tube:

A & EA Series 1-1/2" to 12"

J & EJ Series 1-1/2" to 2-1/2"

Aluminum alloy, clear anodized O.D., hard coat anodized I.D.

J & EJ Series 3-1/4" to 12" has steel tube, with hard chrome plated I.D.

Piston:

A & EA series: machined high-strength aluminum alloy.

J & EJ series: steel

Piston rod: hard chrome plated steel

Rod Bearing: oil impregnated sintered iron

Seals: nitrile rod seal, urethane rod wiper, nitrile piston seals, nitrile tube end seals

Tie Rods: high-tensile strength steel

* J and EJ series only

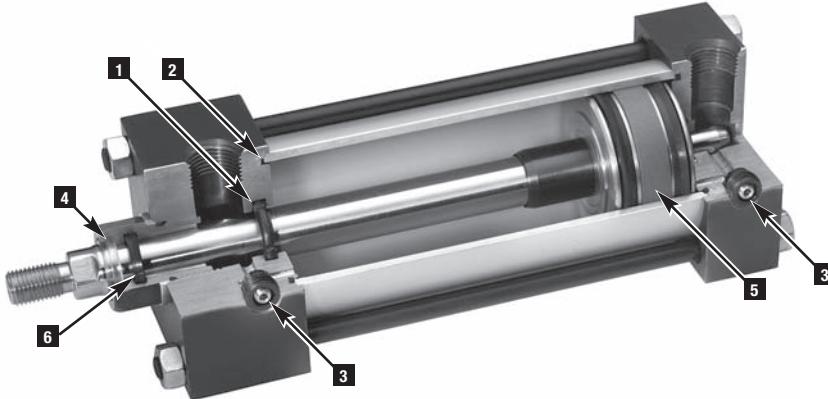

1 Ultra Cushion® Seals: Advanced design features a unique, one-piece, compound seal of nitrile* captured within a precision machined groove. Linear and radial "float" of the cushion seals eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.)

*Nitrile seals on the 5/8" & 1" rod diameter. For rod sizes 1-3/4" and larger, urethane seals are standard.

2 O-Ring Tube Seal: Nitrile is standard. (Viton is optional.)

3 Adjustable Captive Cushion Needle: A one-piece, precision threaded brass cushion adjustment screw with a threaded steel capture ring. It provides safe and precise cushion adjustment.

4 Wiper Seal: Lip-type urethane wiper seal keeps contaminants from getting into cylinder by aggressively wiping foreign materials from the piston rod, enhancing the rod seal life.

5 Wear Ring: Reinforced Teflon® compounded with polyphenylene sulfide provides supreme wear and excellent bearing support.

6 Rod Seal: Nitrile lip type seal is pressure energized and wear compensating for durability and long life.

Series A Cylinders are constructed with the finest materials for each component!

- 1** Piston Rod: Hard chrome plated high-tensile steel, ground and polished.
- 2** Rod Bearing: External removable threaded steel bearing housing (black oxide finish), with an oil-impregnated sintered iron rod bearing.
- 3** Rod Seal: Nitrile lip-type seal is pressure energized and wear compensating for durability and long life.
- 4** Head/Cap: Precision machined from alloy aluminum, then anodized for corrosion resistance (black finish).

5 Ultra Cushion[®] Seals: Advanced design features a unique, one-piece, compound seal of nitrile* captured within a precision machined groove. Linear and radial "float" of the cushion seals eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.)

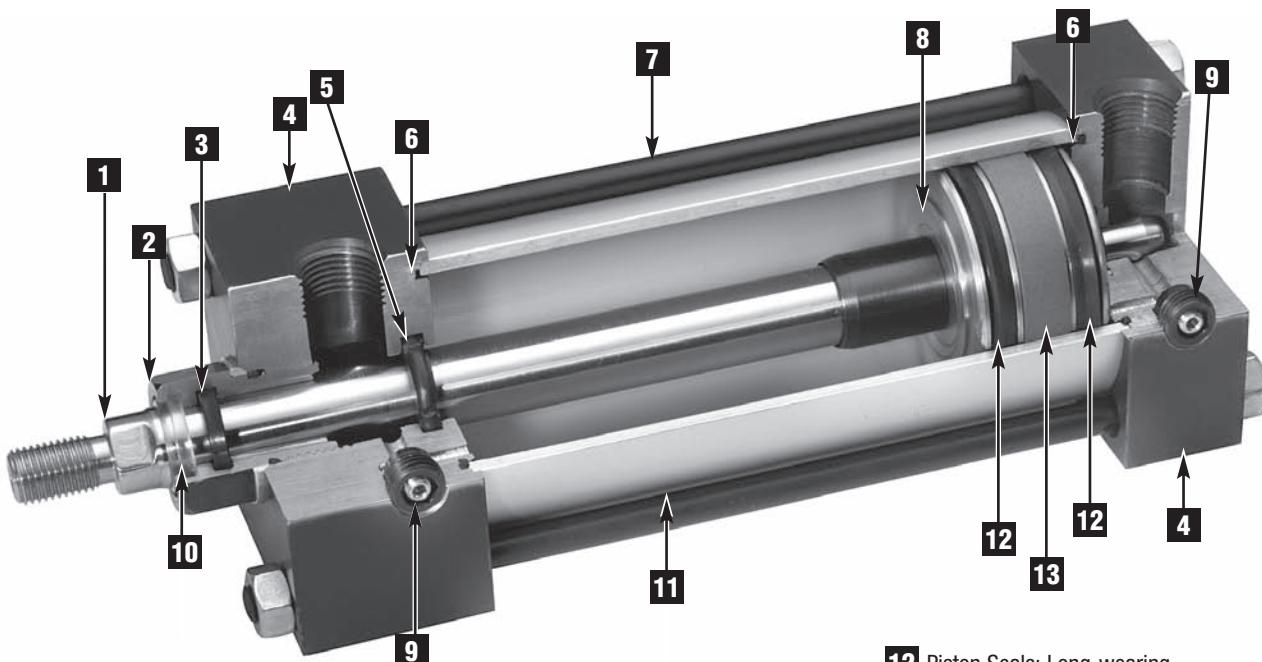

*Nitrile seals on the 5/8" & 1" rod diameter.
For rod sizes 1-3/8" and larger, urethane seals are standard.

6 O-Ring Tube Seal: Buna is standard. (Viton is optional.)

7 Tie Rods: High-strength steel maintains uniform compression on tube end seals.

8 Piston: Machined solid aluminum alloy, lightweight for low inertia, yet strong. Threaded piston is installed with high strength threadlocker adhesive then staked to the piston rod.

9 Adjustable Captive Cushion Needle: A one-piece, precision threaded brass cushion adjustment screw with a threaded steel capture ring. It provides safe and precise cushion adjustment.

10 Wiper Seal: Lip-type urethane wiper seal keeps contaminants from getting into cylinder by aggressively wiping foreign materials from the piston rod, enhancing the rod seal life.

11 Cylinder Tube: High-strength aluminum alloy ideally suited for air service. The tube is clear anodized on the O.D. and hard anodic coated on the I.D., resulting in a smooth, corrosion and score resistant surface finish.

12 Piston Seals: Long-wearing nitrile seals.

13 Wear Ring: Reinforced Teflon[®] compounded with polyphenylene sulfide provides supreme wear and excellent bearing support.

Application Information

Series A NFPA interchangeable aluminum air cylinders are offered with a variety of accessories, standard and optional equipment to meet your application needs.

The addition of a Teflon[®] wear ring to the outer perimeter of the piston provides lubrication to the cylinder for an extended period of time over cylinders without a wear ring.

Standard non-cushioned Series A cylinders are recommended for applications that require full bottoming of the piston and where the noise emitted by the metal-to-metal impact between the piston and cylinder end caps is tolerable. We recommend that optional non-adjustable cushions be added for piston speeds (moving light tools) ranging from 15 to 30 in/sec. For speeds exceeding 30 in/sec, the cylinders should be equipped with adjustable air cushions.

NFPA Aluminum & Steel Cylinders

Series EA Ecology Cylinders are constructed with the finest materials for each component!

1 Ultra Cushion[®] Seals: Advanced design features a unique, one-piece, compound seal of nitrile* captured within a precision machined groove. Linear and radial "float" of the cushion seals eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.) *Nitrile seals on the 5/8" & 1" rod diameter.

For rod sizes 1-3/8" and larger, urethane seals are standard.

2 Impact Dampening Piston Seals: Our impact dampening piston seals, in conjunction with our advanced cushion design, decelerate and reduce end-of-stroke noise.

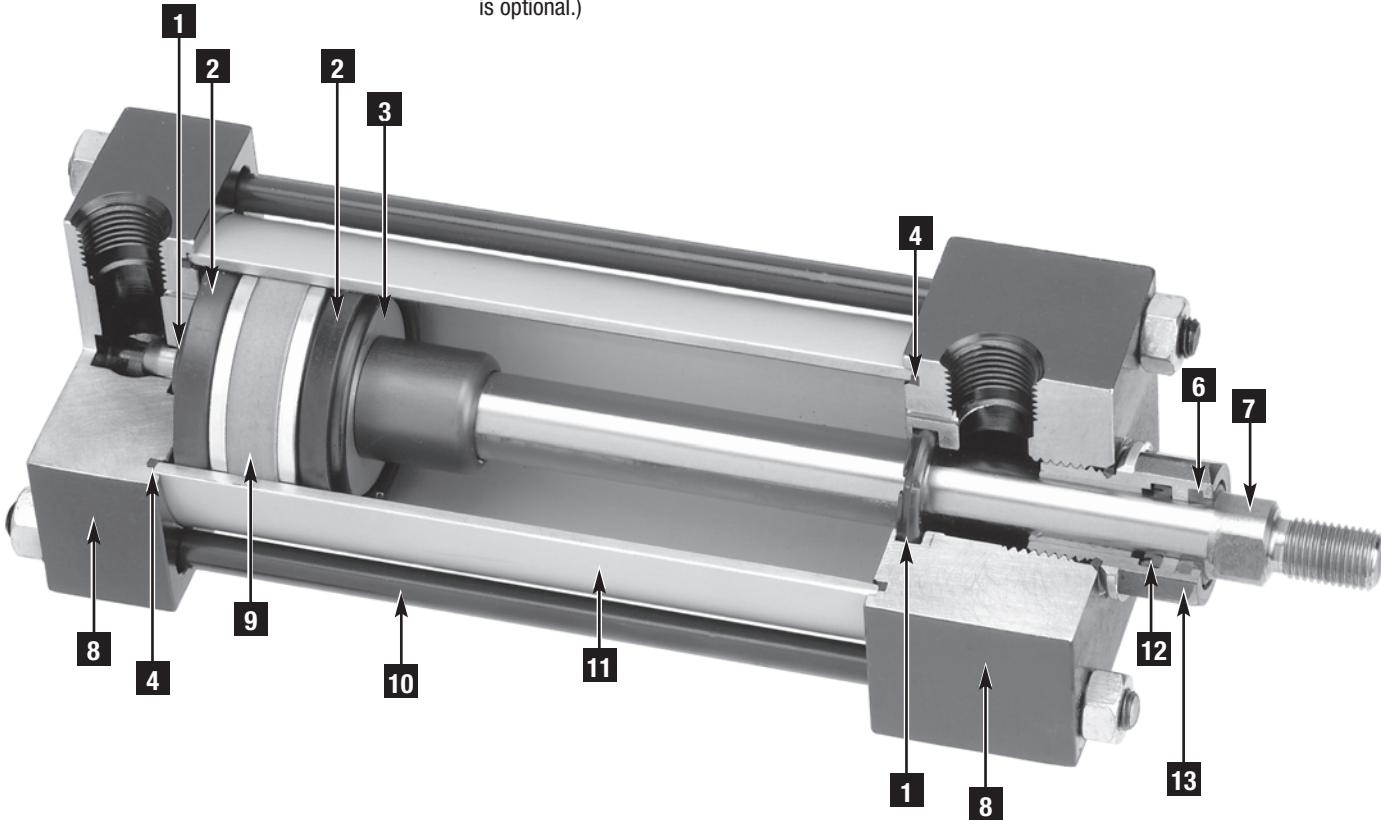

3 Piston: Machined solid aluminum alloy, lightweight for low inertia, yet strong. Threaded piston is installed with high strength threadlocker adhesive then staked to the piston rod.

4 O-Ring Tube Seal: Buna is standard. (Viton is optional.)

5 Adjustable Captive Cushion Needle (not shown): Fine thread allows for safe and precision adjustment of cushion.

6 Wiper Seal: Lip-type urethane wiper seal keeps contaminates from getting into cylinder by aggressively wiping foreign materials from the piston rod, enhancing the rod seal life.

7 Piston Rod: Hard chrome plated high-tensile steel, ground and polished.

8 Head/Cap: Precision machined from alloy aluminum, then anodized for corrosion resistance (black finish).

9 Wear Ring: Reinforced Teflon[®] compounded with polyphenylene sulfide provides supreme wear and excellent bearing support.

10 Tie Rods: High-strength steel maintains uniform compression on tube end seals.

11 Cylinder Tube: High-strength aluminum alloy ideally suited for air service. The tube is clear anodized on the O.D. and hard anodic coated on the I.D., resulting in a smooth, corrosion and score resistant surface finish.

12 Rod Seal: Nitrile lip-type seal is pressure energized and wear compensating for durability and long life.

13 Rod Bearing: External removable steel bearing housing (black oxide finish), with an oil-impregnated sintered iron rod bearing.

NFPA Aluminum & Steel Cylinders

Series J Cylinders are constructed with the finest materials for each component!

1 Piston Rod: Hard chrome plated high-tensile steel, ground and polished.

2 Rod Bearing: External removable threaded steel bearing housing (black oxide finish), with an oil-impregnated sintered iron rod bearing.

3 Rod Seal: Nitrile lip-type seal is pressure energized and wear compensating for durability and long life.

4 Head/Cap: Precision machined from steel, then black oxide finished 1-1/2" to 2-1/2" bores. Painted black finish on 3-1/4" to 12" bores.

5 Ultra Cushion[®] Seals: Advanced design features a unique, one-piece, compound seal of nitrile* captured within a precision machined groove. Linear and radial "float" of the cushion seals eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.)

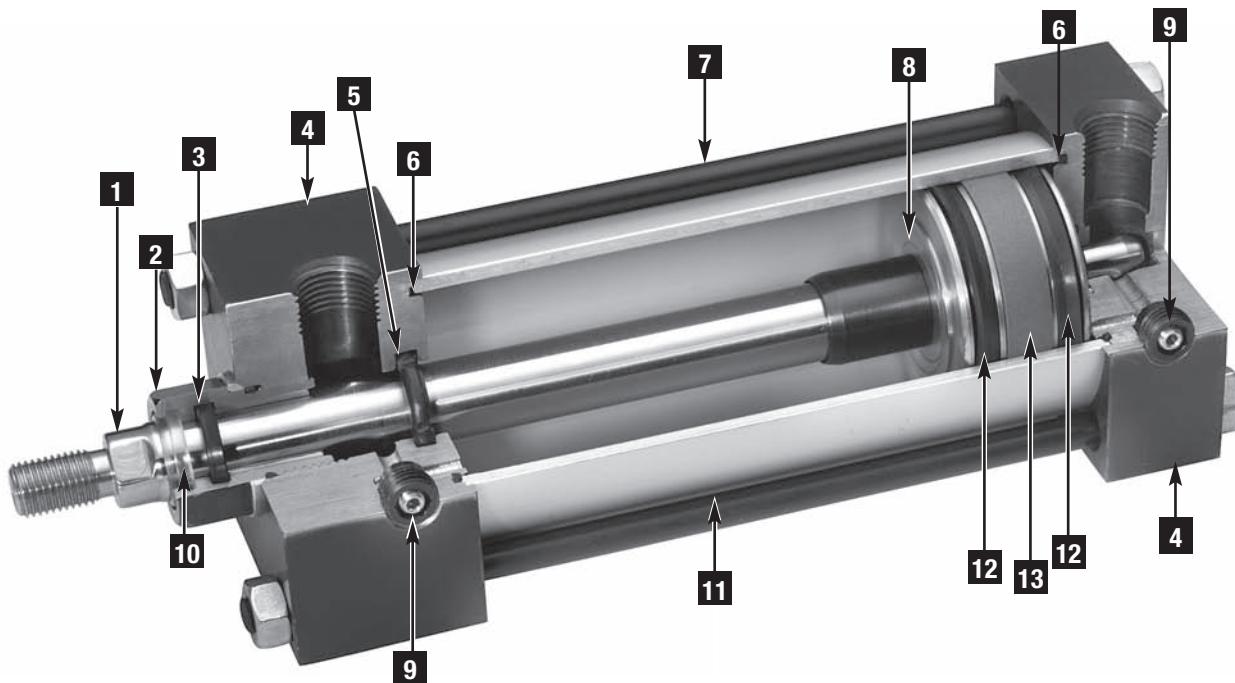

*Nitrile seals on the 5/8" & 1" rod diameter. For rod sizes 1-3/8" and larger, urethane seals are standard.

6 O-Ring Tube Seal: Buna is standard. (Viton is optional.)

7 Rods: High-strength steel maintains uniform compression on tube end seals.

8 Piston: Machined solid steel, for high strength. Threaded piston is installed with high strength threadlocker adhesive then staked to the piston rod.

9 Adjustable Captive Cushion Needle: A one-piece, precision threaded brass cushion adjustment screw with a threaded steel capture ring. It provides safe and precise cushion adjustment.

10 Wiper Seal: Lip-type urethane wiper seal keeps contaminants from getting into cylinder by aggressively wiping foreign materials from the piston rod, enhancing the rod seal life.

11 Cylinder Tube: High-strength aluminum alloy 1-1/2", 2", 2-1/2" bore anodized on the O.D. and hard coat I.D. Steel cylinder tube hard chrome plated I.D. 3-1/4" to 12" bore.

12 Piston Seals: Long-wearing nitrile seals.

13 Wear Ring: Reinforced Teflon[®] compounded with polyphenylene sulfide provides supreme wear and excellent bearing support.

Application Information

Series J NFPA interchangeable steel air cylinders are offered with a variety of accessories, standard and optional equipment to meet your application needs.

The addition of a Teflon[®] wear ring to the outer perimeter of the piston provides lubrication to the cylinder for an extended period of time over cylinders without a wear ring.

Standard non-cushioned Series J cylinders are recommended for applications that require full bottoming of the piston and where the noise emitted by the metal-to-metal impact between the piston and cylinder end caps is tolerable. We recommend that optional non-adjustable cushions be added for piston speeds (moving light tools) ranging from 15 to 30 in/sec. For speeds exceeding 30 in/sec, the cylinders should be equipped with adjustable air cushions.

NFPA Aluminum & Steel Cylinders

Series EJ Ecology Cylinders are constructed with the finest materials for each component!

1 Ultra Cushion[®] Seals: Advanced design features a unique, one-piece, compound seal of nitrile* captured within a precision machined groove. Linear and radial "float" of the cushion seals eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.)

*Nitrile seals on the 5/8" & 1" rod diameter.
For rod sizes 1-3/8" and larger, urethane seals are standard.

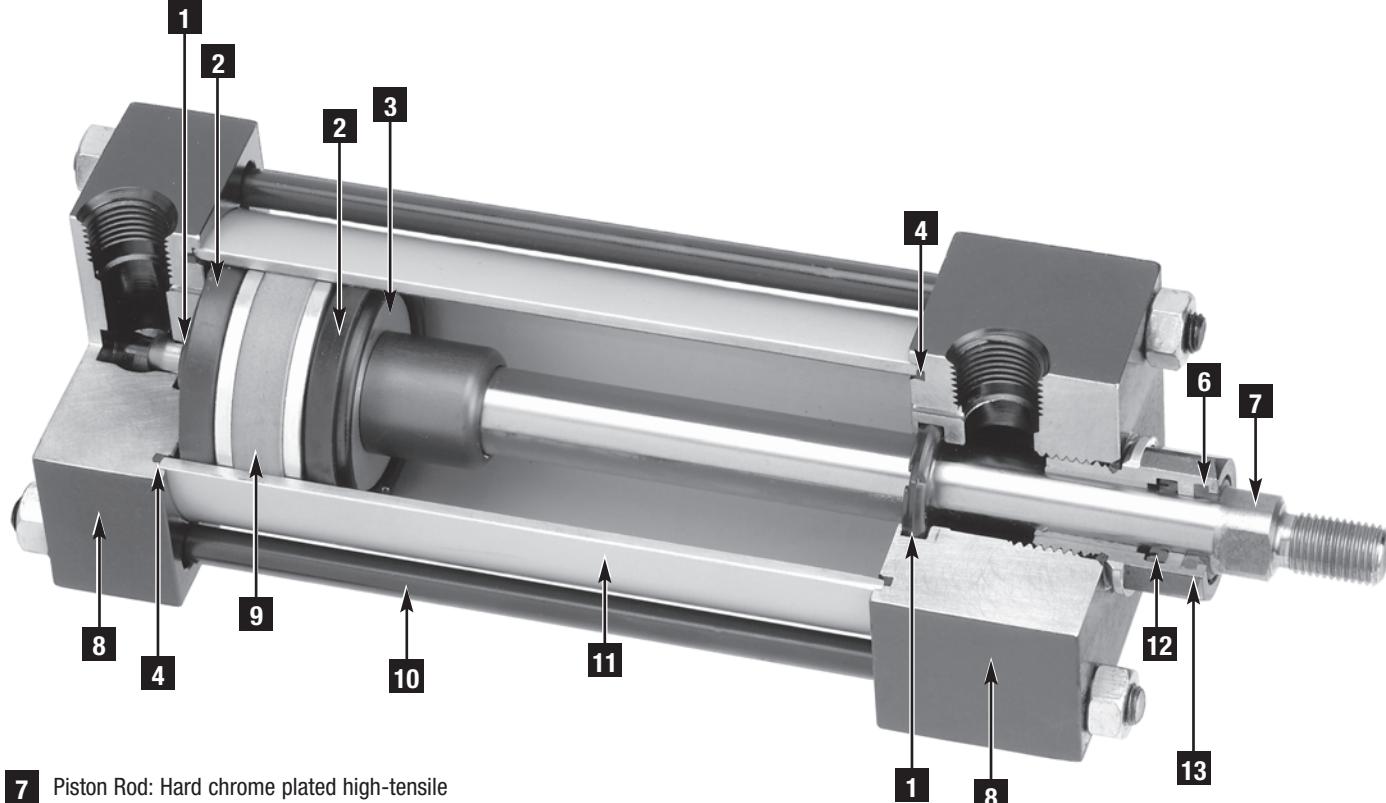

2 Impact Dampening Piston Seals: Our impact dampening piston seals, in conjunction with our advanced cushion design, decelerate and reduce end-of-stroke noise.

3 Piston: Machined solid steel, for high strength. Threaded piston is installed with high strength threadlocker adhesive then staked to the piston rod.

4 O-Ring Tube Seal: Buna is standard. (Viton is optional.)

5 Adjustable Captive Cushion Needle (not shown): Fine thread allows for safe and precision adjustment of cushion.\

6 Wiper Seal: Lip-type urethane wiper seal keeps contaminates from getting into cylinder by aggressively wiping foreign materials from the piston rod, enhancing the rod seal life.

7 Piston Rod: Hard chrome plated high-tensile steel, ground and polished.

8 Head/Cap: Precision machined from steel, then black oxide finished 1-1/2" to 2-1/2" bores. Painted black finish 3-1/4" to 12" bores.

9 Wear Ring: Reinforced Teflon[®] compounded with polyphenylene sulfide provides supreme wear and excellent bearing support.

10 Tie Rods: High-strength steel maintains uniform compression on tube end seals.

11 Cylinder Tube: High-strength aluminum alloy 1-1/2", 2". 2-1/2" bore anodized on the O.D. and hard coat I.D. Steel cylinder tube hard chrome plated I.D. 3-1/4" to 12" bore.

12 Rod Seal: Nitrile lip-type seal is pressure energized and wear compensating for durability and long life.

13 Rod Bearing: External removable steel bearing housing (black oxide finish), with an oil-impregnated sintered iron rod bearing.

Norgren NFPA Ecology Cylinders offer these advantages:

1 Norgren cylinders are pre-lubricated for non-lube operation.

The piston rod is self-lubricated by the oil-impregnated rod bearing during operation. Lubrication between piston and cylinder barrel is derived from the polishing qualities of the reinforced Teflon[®] wear ring.

The low friction surfaces extend the life of the seals beyond normal expectations.

Series EA and EJ cylinders are NFPA interchangeable and are available in many different mounting styles.

2 Operates Quietly to Meet OSHA Specifications.

Series EA and EJ cylinders provide substantial reductions in impact noise, which reduces overall machine noise and helps meet government regulations.

Summary of Sound Levels in Decibels

PSI Air Sound Pressure Level+		Cylinder Model							
		J133B3 5" x 6"	EJ155B3 5" x 6"	J113A3 2" x 6"	EJ1155A3 2" x 6"	A133B3 5" x 6"	EA155B3 5" x 6"	A113A3 2" x 6"	EA1155A3 2" x 6"
95 PSI+	End++	108	73	110	74	108	73	110	74
	Side++	112	84	110	81	112	84	110	81
50 PSI+	End++	108	73	113	74	108	73	113	74
	Side++	113	85	110	81	113	85	110	81

+ Peak sound pressure is given in decibels (dB)
re: $2 \times 10^5 \text{ N/m}^2$.

++End position of mike was 3' on centerline from end of cylinder; side position of mike was 3' perpendicular to centerline abeam of end of cylinder.

The summary of sound decibels chart illustrates the operating sound levels.

The impact dampening qualities of the Piston Seals are guaranteed for ONE FULL YEAR!

3 Energy Absorption Capacity of the Impact Dampening Seals

Series EA and EJ cylinders have a impact dampening piston seal that accomplishes 80% of the actual load stopping. The air cushion accounts for only 20%. (A conventional air cushioning cylinder depends 100% on the compressibility of air to do the stopping.) The Ecology seal absorbs high impact loads allowing the effect of the air cushion to be reduced by using a larger air cushion bleed orifice. As a result the piston can move at a faster speed for a longer period of time before the Ecology seal does the final stopping.

Energy Absorption Capacity of the Impact Dampening Seals

*Usable Pounds Stoppable at the Following Piston Speeds

This chart features the energy absorption capacity of the impact dampening piston seals with a **Non-Adjustable** cushions. For higher loads and velocities please refer to the Decel- Air Cushion.

100	0	0	0	0	0	0	0	0	0	0	0

Note: These figures are for new cylinders. The impact dampening seals will take some compression set during operation of the cylinder and the stroke loss will decrease. Also, the pressure at zero stroke loss will decrease to about 80 psi.

At pressures above those of zero stroke loss, a slight clicking sound may be produced during impact.

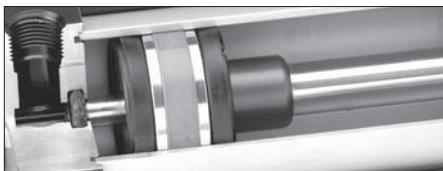

To determine the stroke loss for either the head or cap end, divide the value shown by 2.

Piston and rod assembly for 1 1/2" thru 5" bore cylinders with 1/2" to 2" stroke

NFPA Aluminum & Steel Cylinders

Cushion Function

As the cushion spear enters the cushion cavity, the exhaust port becomes sealed off creating an air brake. This provides the initial deceleration in piston speed. The oversized air cushion bleed orifice permits the cushion pressure to exhaust with minimal restriction. This allows the piston to move quickly and smoothly through the cushion length.

Operating Temperatures:

Series A & J	-20°F to 200°F (-29°C to 107°C)
with Viton Seals	-20°F to 400°F (-29°C to 204°C)

As the piston continues its travel to the point of impact with the end caps, the compressive qualities of the EJ seal provide the final decelerating force. This action compresses the EJ seal and absorbs the remaining kinetic shock vibration and noise created by the impact.

On the reverse stroke the EJ seal releases its compressive energy to propel the piston away from the end caps, producing an immediate breakaway.

Operating Pressure:

250 PSIG Air (17.2 Bar)
400 PSIG Hydraulic (27.6 Bar)
Bore Sizes: 1-1/2", 2", 2-1/2", 3-1/4",
4", 5", 6", 7", 8", 10", 12"

Supply:

Filtered compressed air to 250 PSI Petroleum
based hydraulic fluid to 400 PSI

Lubrication:

None required
Norgren Air Cylinders are rated for "no lube added" service. All internal components are lubricated at time of assembly with a Teflon® based grease.

Materials:

Head and End Caps: precision
machined steel
Tube: 6063-T832 aluminum, clear
anodized O.D., hard coat anodized I.D.
Rod: hard chrome plated steel
Piston: machined high-strength
aluminum alloy
Rod Bearing: oil impregnated sintered iron
Seals: nitrile rod seal, urethane rod wiper,
nitrile piston seals, nitrile tube end seals
Tie Rods: high-tensile strength steel

Air Cylinder Selection:

The proper application and selection of an air cylinder requires full consideration of the following: the fluid medium, operating pressures, mounting style, length of stroke, type of rod connection to the load, thrust or mounting tension on the rod, mounting attitude, speed of the stroke and how the load motion will be stopped.

The data that follows provides the necessary information in the evaluation of

an average application and will help you in selecting the proper cylinder model and size for your particular application.

Note: 1-1/2", 2", 2-1/2", 3-1/4", 4" and 5" bore cylinders with 1/2" to 2" strokes will be furnished with a short head cushion sleeve and short cap cushion spear.

Only available on 5/8" and 1" rods.

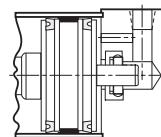

The above specification applies to Series A and J cylinders with optional non-adjustable or adjustable cushions.

Side Loading:

Cylinders are specifically designed to push and pull. Side loading (misalignment) of the piston rod should be avoided to ensure maximum operating performance and life.

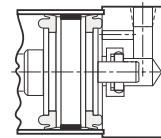

Care should be taken during installation to properly align the load to be moved with the center line of the cylinder. The use of a rod alignment coupler is strongly recommended whenever possible.

Series A & J Fixed Cushions

Piston and rod assembly for 1-1/2" thru 5" bore cylinders with 1/2" to 2" stroke.

Series EA & EJ Fixed Cushions

Piston and rod assembly for 1-1/2" thru 5" bore cylinders with 1/2" to 2" stroke

Ultra Cushion®

A Major Design and Performance Breakthrough in Air Cylinder Cushioning Systems!

Norgren's advanced cushion design features a unique, one-piece, nitrile compound seal that is captured within a precision machined groove. This allows both linear and radial "float" of the cushion seal which virtually eliminates problems associated with misalignment. Integral flow paths molded in the periphery of the seal provide exceptionally fast "out of cushion" stroke reversal without the use of ball checks.

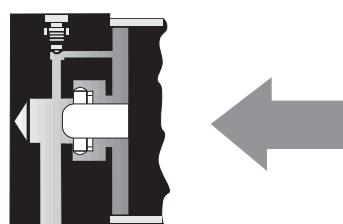

Figure 1

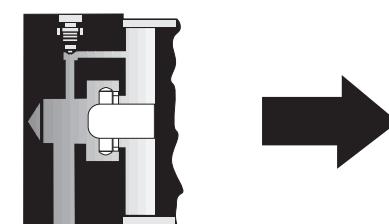

Figure 2 shows spear exiting cushion seal.

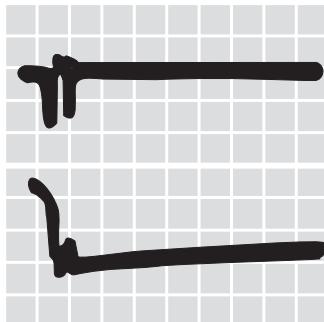

NFPA Aluminum & Steel Cylinders

Tests by the Milwaukee School of Engineering confirm Ecology Cylinder Cushions are more efficient, faster acting and bounce less!

NORGREN ECOLOGY CYLINDERS with Non-Adjustable Cushions

2" Bore Rod End Cushion Test

Average deceleration force = 15 G's
Time consumed during cushioning = 0.030 sec.
Number of bounces: 1 Pneumatic – 1 Metallic

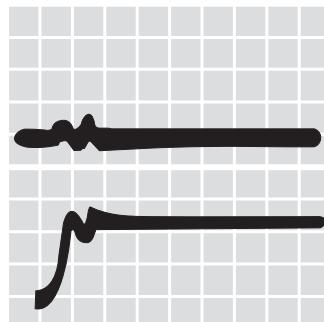

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
14.5 lbs. added to rod

2" Bore Cap End Cushion Test

Average deceleration force = 17.5 G's
Time consumed during cushioning = 0.025 sec.
Number of bounces: 1 Pneumatic – 1 Metallic

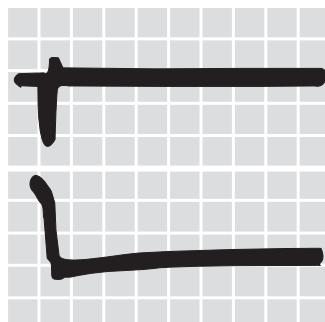

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
14.5 lbs. added to rod

NORGREN ECOLOGY CYLINDERS with Adjustable Cushions

2" Bore Rod End Cushion Test

Average deceleration force = 20 G's
Time consumed during cushioning = 0.015 sec.
Number of bounces: 1/2 Pneumatic – 0 Metallic

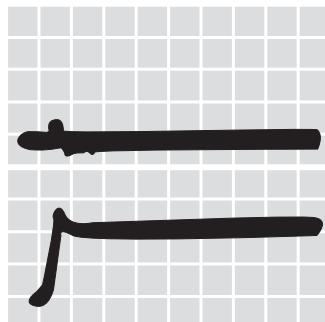

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
2.5 lbs. added to rod

2" Bore Cap End Cushion Test

Average deceleration force = 10 G's
Time consumed during cushioning = 0.020 sec.
Number of bounces: 1/2 Pneumatic – 0 Metallic

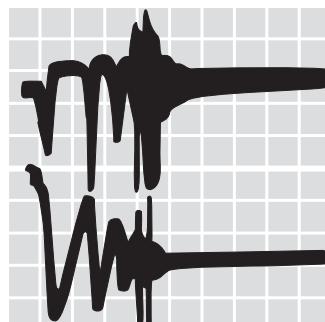

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
2.5 lbs. added to rod

COMPETITIVE CYLINDERS with Adjustable Cushions

2" Bore Rod End Cushion Test

Average deceleration force = 78 G's
Time consumed during cushioning = 0.120 sec.
Number of bounces: 2 Pneumatic – 4 Metallic

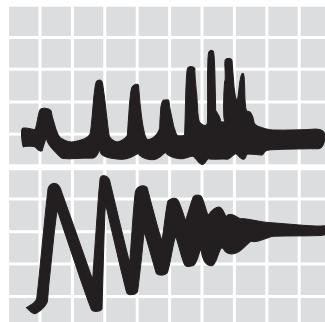

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .03 seconds

Velocity: 1 div. = 20 in/sec.
14.5 lbs. added to rod

2" Bore Cap End Cushion Test

Average deceleration force = 60 G's
Time consumed during cushioning = 0.120 sec.
Number of bounces: 3 Pneumatic – 4 Metallic

Acceleration: 1 div. = 10 G's
X Axis: 1 div. = .02 seconds

Velocity: 1 div. = 20 in/sec.
14.5 lbs. added to rod

2" Bore Cylinder Tests Results

Figures shown are average and not the result of each individual test. Piston velocity was regulated at 45 in/sec.

Cylinders with Cushions	Weight attached to Piston Rod (lbs)	Cushion Efficiency (G's* Created)	Cushioning Time (Ms)	Bounce Cycles During Cushioning
Norgren Ecology Adjustable	8.5	14.50	25.00	1.00
Norgren Ecology Non-Adjustable	8.5	17.50	26.25	1.75
Competitor A Adjustable	8.5	48.00	107.50	7.25
Competitor B Adjustable	8.5	32.75	102.50	6.50
Competitor C Adjustable	8.5	50.50	81.25	9.25

*Measured in G's of deceleration force created. All cylinders tested were NFPA types, front flange mounting, 6" stroke with standard diameter piston rods.

4" Bore Cylinder Tests Results

Figures shown are average and not the result of each individual test. Piston velocity was regulated at 25 in/sec.

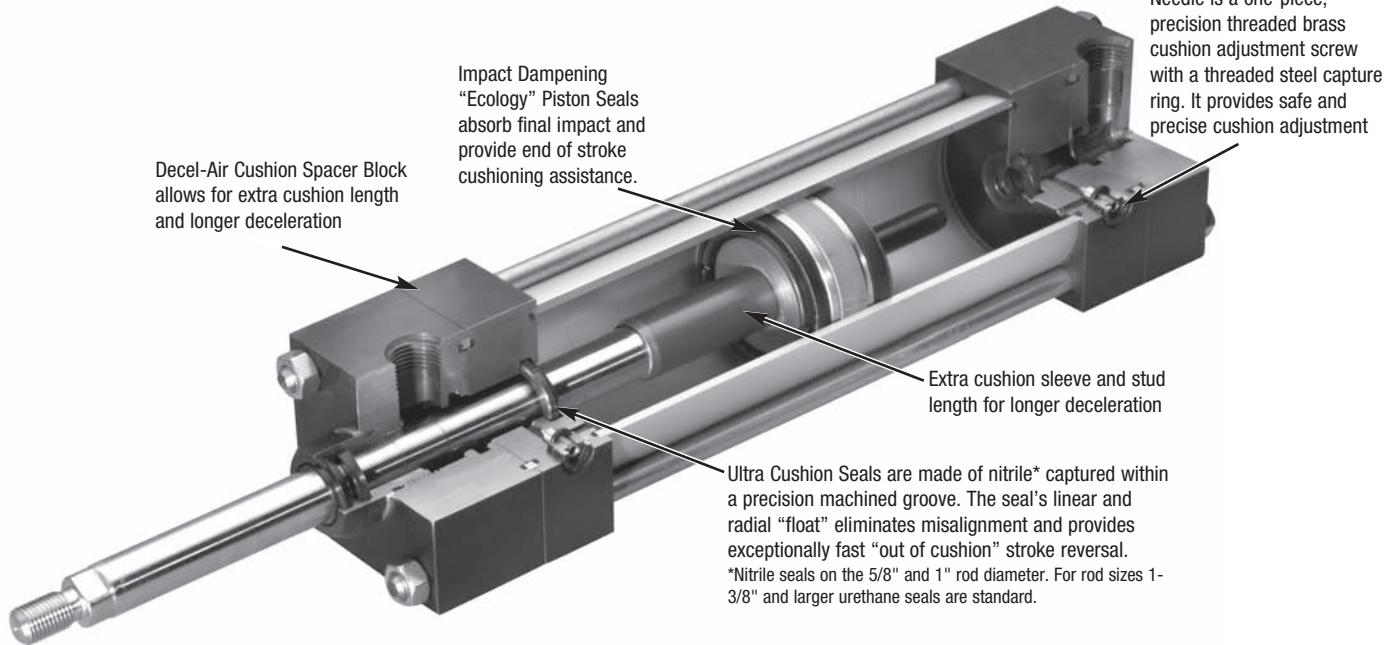

Cylinders with Cushions	Weight attached to Piston Rod (lbs)	Cushion Efficiency (G's* Created)	Cushioning Time (Ms)	Bounce Cycles During Cushioning
Norgren Ecology Adjustable	54	5.25	40.00	3.25
Norgren Ecology Non-Adjustable	54	12.00	28.75	2.75
Competitor A Adjustable	54	11.50	92.50	6.75
Competitor B Adjustable	54	8.00	77.50	5.25
Competitor C Adjustable	54	6.50	67.50	6.25

*Measured in G's of deceleration force created. All cylinders tested were NFPA types, front flange mounting, 6" stroke with standard diameter piston rods.

NFPA Aluminum & Steel Cylinders

Decel-Air Cushioned Cylinder

Eliminates the need for shock absorbers on air cylinder applications.

Explanation of Decel-Air Cushion:

Norgren's Decel Cushioned cylinder was designed for applications where high velocity, low mass, material transfer or machine function is required, and where the kinetic energy to be absorbed during cushioning exceeds the parameters of our standard Series EA or EJ air cylinders equipped with non-adjustable or adjustable cushions. Decel cushions employ longer-than-standard air cushions to assist our Impact Dampening Piston Seal.

Why does our Decel-Air Cushion work?

The extra cushion length of the Decel cushioned cylinder provides an additional deceleration capability to slow the cylinder's moving mass to a point where the positive cushioning effect of our Impact Dampening Piston Seals can perform the final cushioning.

Norgren's Decel-Air Cushioned Cylinders Versus Cylinder Mounted Shock Absorbers

The first extensive evaluation of pneumatic cylinder cushion performance was undertaken by the Mechanical Engineering Department of The Ohio State University. The test was conducted on 2-1/2" bore, 12" stroke.

The OSU tests found the Decel Cushioned cylinders absorbed almost three times as much kinetic energy with a lower level of peak cushion as a standard Ecology seal configured cylinder.

Because air is compressible and is exhausted out of the cylinder each cycle, the internal heat buildup is minimized. The **"Maximum Inch Pounds Per Hour"** rating which is essential in determining the effectiveness of shock absorber performance is **not needed** to judge Decel cushion performance.

The test indicated that Norgren Decel-Air Cushioned cylinders could prove to be superior to a hydraulic shock absorber assisted cylinder for high cycle, high velocity applications with light to moderate loading (precisely the area where most severe cylinder applications exist). The cycle rates and the cushioning times of the Decel-Air Cushioned cylinders and the hydraulic shock absorber assisted cylinders were comparable.*

Decel-Air Cushioned cylinders are also less costly than shock absorber mounted cylinders and are self-contained units.

*For comparative evaluation, a well-known hydraulic shock absorber was chosen. The OSU tests showed a smooth shock-absorbing operation was achieved at very low velocities using the shock absorbers, but at comparable Decel Cushion cylinder velocities, a high mechanical impact took place on the shock absorber mounted cylinder.

Potential Decel-Air Cushion Applications

1. Conveyors & Material Handling Equipment
2. Transfer Machines & Shuttle Tables
3. Packaging Machinery
4. Foundry Equipment
5. Automatic Gate Opening & Closing

NFPA Aluminum & Steel Cylinders

The Decel Cushioned cylinder increases the kinetic energy absorption capability by increasing the effective cushion spear length in the cylinder.

The Decel Cushioned cylinder increases the standard cushion spear length by 100%, allowing an increase in kinetic energy absorption capability by two times.

NFPA Aluminum & Steel Cylinders

NFPA Series A Aluminum & J Steel Cylinders

1-1/2 to 12 inch bore size

A, EA, J, and EJ Standard and special cylinder options

Option Code	Description
A(–)	Stroke adjustment single piston (specify adjustment length)
AA(–)	Stroke adjustment double piston (specify adjustment length)
AN	Acorn tie rod nuts (stainless steel)
AP	Air/Oil piston (piston supplied with O-ring hooded U-cup on cap end for air/oil operation)
BL	Removable piston rod stud (installed with removable adhesive sealant)
EN**	Electroless nickel plated cylinder
EV(–)	Pneumatic stroke signal valve(s): EV(Head Cap) (specify position)
FG	Black fiberglass cylinder tube
H	Piston rod seals O-ring loaded U-cups – (A & J Only)
HR	Case hardened piston rod
L(–)	Non-standard port location position 1 standard: L (Head Cap) (specify position 1 thru 4 for head and/or cap)
LD	Rodlock with manual release
LE	Rodlock
LF	Low friction cylinder (Nitrile compounded with Teflon® rod and piston seals) (Not available with Ecology series)
MS	Metal scraper
N(–)	Cushion adjust screw location position 2 standard:N(Head Cap) (specify position 1 thru 4 for head and/or cap)
P(–)	Non-standard port sizes – [specify port size for P(–H) head only, P(–C) cap only, or P(–) both head & cap]
PP	Seals in cylinder O-ring loaded U-cups (rod and piston seals) – (A & J Only)
PN	Pinned piston and rod assembly
PS	Magnetic piston modification
RS	Studded male piston rod end
RX(–)	Piston rod extension over standard (specify additional "C" length)
S	303/304 Stainless steel tie rods & nuts
SB	Stainless steel rod bushing nut
SC†	Single acting spring extend cap end of cylinder
SL	Steel cylinder tubing
SR†	Single acting spring retract rod end of cylinder
SS	303 Stainless steel piston rod
ST(–C)	Stop tube on cap end (C) of cylinder: ST (stop tube length C)
ST(–R)	Stop tube on rod end (R) of cylinder: ST (stop tube length R)
SV(–)	Stroke signal valve(s): SV (head cap)
T(–)	Non-standard piston rod thread (specify thread)
TF(–)	Piston rod thread depth over standard (Female) (specify additional "A" length)
TS	Stainless cylinder tubing
TX(–)	Piston rod thread extension over standard (Male) (specify additional "A" length)
UB*	Head and cap bumpers (Adds 1/4" per bumper to overall length)
UC*	Cap bumper (Adds 1/4" per bumper to overall length)
UH*	Head bumper (Adds 1/4" per bumper to overall length)
V	Viton® seals in cylinder
XI(–)	Type #10 trunnion set dimension (MT4 model only) (customer must specify length)

†Standard available for 1 1/2", 2", 2-1/2" bores, 12" max stroke. (Stroke length doubles – 24" max); 12 lbs. force preload, 30 lbs. force compressed.

Cushions not available on spring end. For other spring forces, bore sizes or longer strokes, consult factory.

*UA Unit Air Assembly

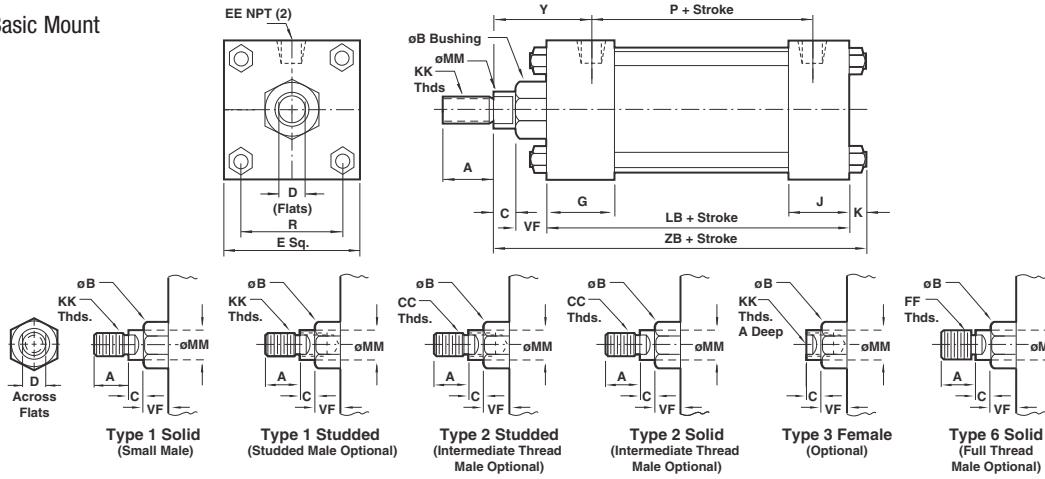

** When ordering "EN" option specify S, SS, TS, and SB options.

Consult Factory for These Options:

Option Code	Description
AS	Airsaver stroke adjustment
BB	Cylinders mounted back to back
CT	Close tolerance on cylinder stroke
LA	Low friction cylinder (Pak-Lap™ style seals)
NI	Nituff® coated cylinder
NS	No silicone used in cylinder assembly
OE	Zero stroke/pneumatic stroke signal valve(s)
OV	Zero stroke/stroke signal valve(s)
RB	Rod boot over piston rod
TE	Nituff® coated cylinder tubing
TK	Thrust key plate mounting – [01 (MS4), 09 (MS2), and 15 (MS7)]
VM	Valve mounting only

Rod Alignment Coupler

The Rod Alignment Coupler allows $1/16$ " of radial float and 2° of spherical movement. This prevents cylinder binding due to misalignment thus extending bearing and seal life, and permits greater tolerance between the centerline of the cylinder and mating part for simplified installation.

Rod Alignment Coupler Dimensions

NFPA Aluminum & Steel Cylinders

Air-Oil Tank

Available in 5 practical bore sizes: 1-1/8", 2", 3-1/4", 5", and 8", the Air-Oil Tank includes a translucent fiberglass tube which permits viewing of the tank oil level from any position, internal baffles that reduce foaming and aeration of the system oil resulting in maximum cylinder control, and standard angle mounting brackets (except 1-1/8" bore) easily removed for convenient fluid port positioning.

How to Figure Length of Volume

Use these equations to select the right air/oil tank volume for your particular application.

Volume of Cylinder:

- Cap End Cylinder Bore Area x Stroke = Volume
- Head End Cylinder Bore Area - (Piston Rod Area) x Stroke = Volume

$$\text{Length of Tank} = \frac{\text{Volume of Cylinder} \times 1.3^*}{\text{Tank Bore Area}}$$

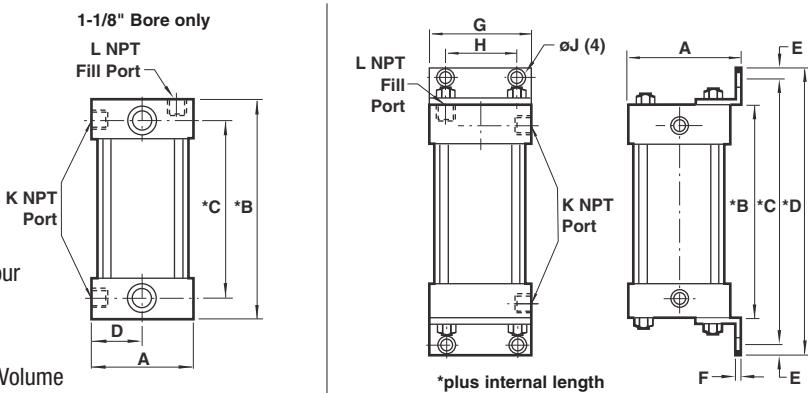

(See chart below.) *30% minimum recommended reserve working volume.

Final Length of Volume of Tank = Working length of tank + 2" minimum safety factor to prevent aeration of oil. Note: Length must be at least 3".

NFPA Aluminum & Steel Cylinders

- Precision operation maintains accurate positioning
- Large clamping surface ensures consistent performance
- Spring-engaged units engage in power-off situations
- Sealed to withstand harsh environments

Technical data

Bore sizes

NFPA cylinders: 1-1/2" to 6" (see chart at right for bore/rod combinations)

Rod lock release pressure: 60 to 120 psi (4 to 8 bar)

Caution: Rodlock will not hold a load when mounted to cylinders with operating pressures in excess of 100 psi (7 bar). Refer to holding force for rod lock chart.

Temperature range: 33°F to 150°F (0.5°C to 66°C)

Viton seal option available

Rod lock mounting: Any position

Holding: Operates in both directions

Notes

If personal safety is required, an unrelated, redundant safety system should be used.

Rod locks require clean, dry, pressure regulated air, lubrication is not required.

The rod must be kept clean and dry to maintain optimum holding forces.

Rod rotation is not allowed when rod lock is engaged (not intended for torsional braking).

Holding force for rod lock

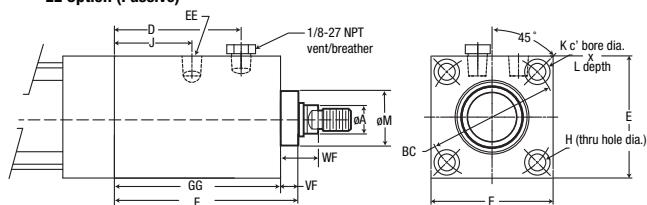

Rod Diameter	Bore Size	Holding* Force
0.625 in	1.500 in	180 lbs
0.625 in	2.000 in	314 lbs
0.625 in	2.500 in	491 lbs
1.000 in	3.250 in	830 lbs
1.000 in	4.000 in	1257 lbs
1.000 in	5.000 in	1960 lbs
1.375 in	6.000 in	2825 lbs

* Oversize rod diameters available upon request.

***CAUTION:** Rated holding force corresponds to static load conditions. If the rated value is exceeded, slipping may occur.

NFPA Aluminum & Steel Cylinders

Piston Rod Diameter Selection

Applications requiring long extend (push) strokes may require oversize piston rod diameters to prevent buckling.

To determine the correct rod diameter for your application follow these simple steps:

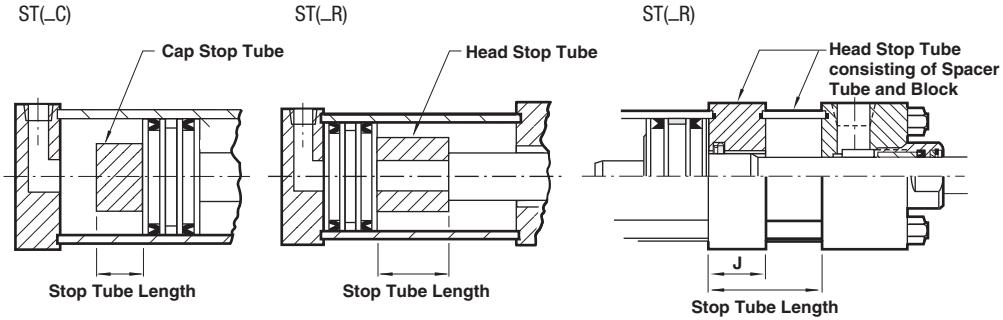

1. Select the force from the Cylinder Force and Volume Chart that is required for your application. For pressures not shown use:
Force = Piston Surface Area x Operating Pressure
2. From the Cylinder Mounting Diagram Chart (next page) select the mounting style being used.
3. To obtain effective length "L", multiply cylinder stroke by appropriate stroke factor located in Cylinder Mounting Diagram Chart . If cylinder has extra rod extension add this to the stroke length before obtaining effective length. **Effective Length = Actual Stroke x Stroke Factor**

4. To determine adequate rod diameter locate calculated effective length "L" on Rod Selection chart (below).
5. Selecting Stop Tubes: Stop tubes enhance the transverse load carrying capability of a long stroke cylinder by increasing the distance between the piston and rod bearing at full extension. When the value of L (calculated from the Adequate Rod Diameter Chart) is less than 40", a stop tube is **not** required. However, if L is 40" or more, 1" of stop tube is recommended for every 10" (or fraction thereof) over 40".
6. Recommended Mounting Styles for Maximum Stroke and Thrust Load:
 - Multiply cylinder stroke by appropriate stroke factor to obtain effective length L.
 - If cylinder has extra rod extension, add this extension to the stroke length before obtaining effective length.

Stop Tube

Enhances the transverse load carrying capability of a long stroke cylinder by increasing the distance between the piston and rod bearing at full extension when placed on head end. Ideal for those applications requiring longer strokes or where additional rod stability is desired.
TO ORDER: Enter option code ST(_C) Cap End or ST(_R) Rod End. Specify stop tube length.

NOTE: ST(_R) Alternate design: the stop tube rod end design changes when the stop tube exceeds J lengths in the chart.

Cylinder Mounting Diagram Chart

Cylinder Mounting	Rod End Connection	Mounting Style	Stroke Factor
Side Tapped, Head or Cap Flange, Tie Rod, Center or Side Lug	Fixed and Rigidly Guided		.50
Side Tapped, Head or Cap Flange, Tie Rod, Center or Side Lug	Pivoted and Rigidly Guided		.70
Side Tapped, Head or Cap Flange, Tie Rod, Center or Side Lug	Supported but not Rigidly Guided		2.00
Side Tapped, Head or Cap Flange, Tie Rod, Center or Side Lug	None		5.00
Head Trunnion	Pivoted and Rigidly Guided		1.00
Center Trunnion	Pivoted and Rigidly Guided		1.50
Cap Trunnion or Clevis	Pivoted and Rigidly Guided		2.00

Tie Rod Tightening:

In order to reduce the possibility of cylinder binding or damage, tighten to quarter unit increments of the final torque value in the following order: #1, #2, #3, #4.

Then torque fully to the recommended foot pounds in the same order.

Recommended Torques for Tightening Tie Rods

Cylinder Bore	Standard Steel Tie Rods	Stainless Steel Tie Rods
1-1/2"	6.6 ft. lbs.	3.75 ft. lbs.
2"	11 ft. lbs.	7.5 ft. lbs.
2-1/2"	13 ft. lbs.	7.5 ft. lbs.
3-1/4"	20 ft. lbs.	13-14 ft. lbs.
4"	24 ft. lbs.	13-14 ft. lbs.
5"	40 ft. lbs.	33 ft. lbs.
6"	48 ft. lbs.	33 ft. lbs.
7" & 8"	100 ft. lbs.	65 ft. lbs.
10"	150 ft. lbs.	75 ft. lbs.
12"	175 ft. lbs.	87.5 ft. lbs.

Tie Rod Supports:

For long strokes, tie rod supports are provided. These supports are of the same envelope dimensions as the cylinder end caps.

NOTE: See chart for number of tie rod supports required.

Number of Tie Rod Supports Required

Cylinder Bore	60	75	95	115	135

Series A & J Breakaway pressures

Bore	Series J		Low Friction Seals (LF)	
	Extend	Retract	Extend	Retract
1-1/2", 2", 2-1/2"	5	6	3	4
3-1/4", 4"	4	5	2	3
5", 6", 7", 8"	3	4	1	2
10"	3	4	1	2
12"	3	4	1	2

Note: Breakaway pressures were established with the cylinders mounted horizontally and no load on the piston rod.

NEN Series NFPA Aluminum Cylinders

1-1/2" to 4" bore sizes

- Competitively priced
- Magnetic piston standard
- Adjustable cushion standard
- Sleeve nut construction standard

Technical data

Medium:

Filtered compressed air

Operating temperature:

-25°F to 140°F (-5°C to 60°C)

With Viton Seals: -23°F to 300°F
(-5°C to 150°C)

Operating Pressure:

Minimum 7 psi (.5 bar)

Maximum 140 psi (9.7 bar)

Bore Sizes: 1-1/2", 2", 2-1/2",
3-1/4", 4"

Rod Diameter: 5/8" diameter
piston rod in 1-1/2", 2", 2-1/2"
bore

1" diameter piston rod in 3-1/4"
and 4" bore

Lubrication:

None required
Norgren Air Cylinders are rated for
"no lube added" service.

Materials

Head and End Caps:

Die cast aluminum painted for
corrosion protection.

Tube: Aluminum alloy, hard coat
anodized

Piston: machined high-strength
aluminum casting.

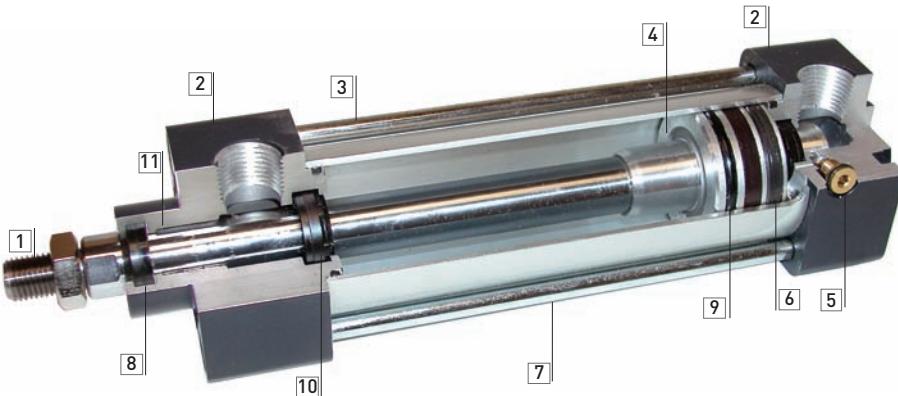

Rod Bearing: clean metal teflon
composite

Seals: nitrile rod seal/wiper, nitrile
piston seals, nitrile tube end seals

Tie Rods: Nickel plated high-tensile
strength steel.

- | | |
|---|--|
| <p>① Piston Rod: Hard chrome plated carbon steel, ground and polished.</p> <p>② Head Bearing Housing and cap: Die cast aluminum</p> <p>③ Tie-Rods: Nickel plated steel</p> <p>④ Piston: Machined aluminum .</p> <p>⑤ Captive Cushion Needle Adjustment: Provides safe and precise cushion adjustment.</p> <p>⑥ Wear Ring: Teflon® material provides supreme wear and excellent bearing support.</p> <p>⑦ Cylinder Tube: Hard anodized aluminum alloy, with corrosion and score resistant surface finish.</p> | <p>⑧ Piston Rod Wiper/Seal: Abrasion resistant nitrile.</p> <p>⑨ Piston Seal: Single Nitrile bi-directional piston seal.</p> <p>⑩ Cushion Seal: Nitrile cushion seal is captured within a precision machined groove allowing for linear and radial float eliminating misalignment.</p> <p>⑪ Rod Bearing: A composite of Teflon and polyphenylene sulfide and bronze molded to a steel backing provides low friction and excellent linear features.</p> |

NEN "Add-a-mount" flexibility

NEN cylinders allow you to add NFPA mounts shown below when you order the cylinder from the factory, or add the mounts later.

NFPA MF1

NFPA MF2

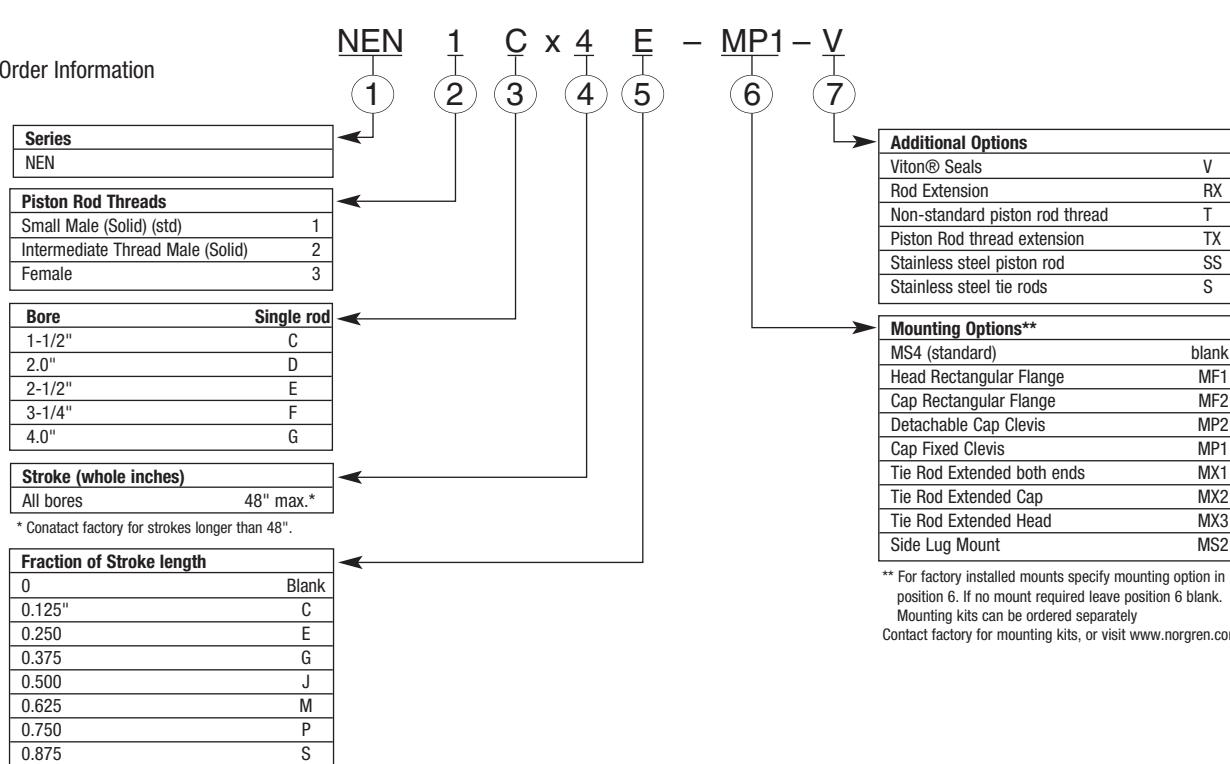

NFPA MP1

NFPA MP2

NEN Series NFPA Aluminum Cylinders

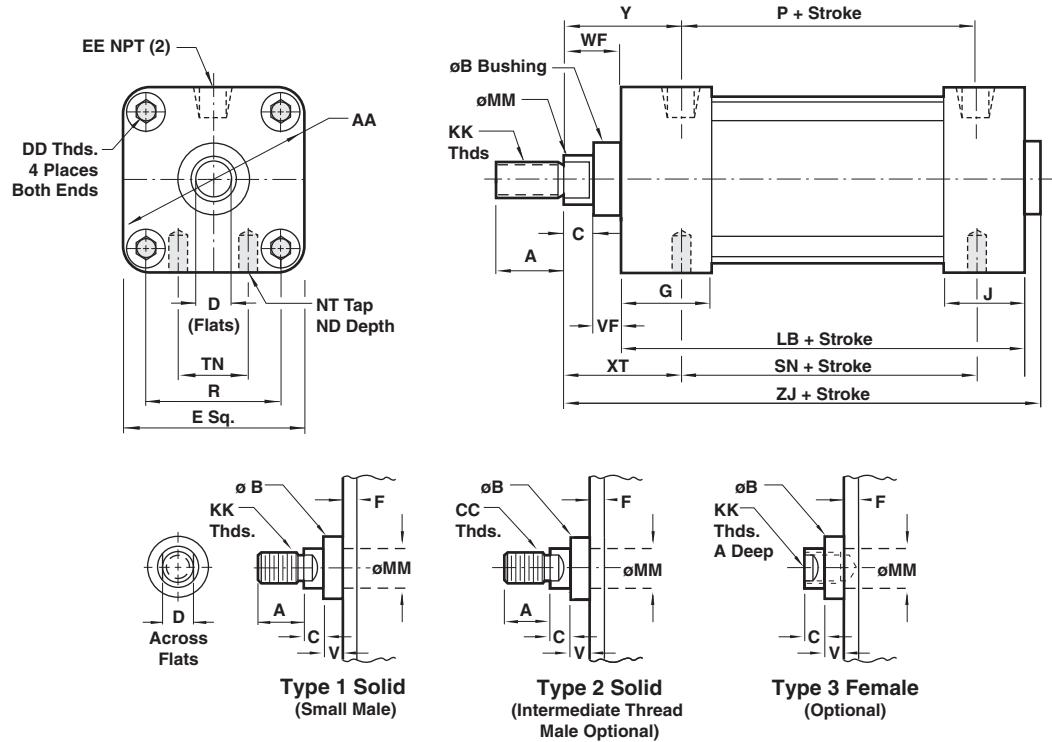

Cylinder Order Information

** For factory installed mounts specify mounting option in position 6. If no mount required leave position 6 blank.
 Mounting kits can be ordered separately
 Contact factory for mounting kits, or visit www.norgren.com

Engineering Advantage Solutions

Unit-Air Assembly

Description:	Cylinder/Valve combination unit
Typical Applications:	Sorting systems, conveyors, diverters, various industrial applications
Sectors/Industries:	Packaging, Material handling, Printing, Paper Converting, Pneumatic industrial machinery
Features & Benefits:	Space saving design Simplified installation - eliminates possible piping errors Faster response time
Norgren Offering:	Aluminum, Steel, or Stainless Steel construction Various bore sizes Valves can be adapted to multiple Norgren cylinder ranges

Multi-Position Cylinder

Description:	Back-to-back or Position-Air - cylinder with multiple piston rod positions
Typical Applications:	Sorting, conveyors, box erectors, rewinders, interfolders
Sectors/Industries:	Packaging, Material Handling, Paper Converting, Pneumatic industrial machinery
Features & Benefits:	Multiple positioning using one unit Use one multi-position cylinder instead of 2 separate cylinders Provides repeatable, positive-stop positioning
Norgren Offering:	Aluminum, Steel, or Stainless Steel construction Entire range of bore sizes available Design can be adapted to multiple Norgren cylinder ranges

Position Feedback

Description:	Cylinder with LVDT transducer (internal or external) or LRT linear potentiometer
Typical Applications:	Sorting systems, conveyors, diverters, various industrial applications
Sectors/Industries:	Packaging, Material handling, Printing, Paper Converting, Pneumatic industrial machinery
Features & Benefits:	Provides continuous indication of piston position Completely integrated Manufactured to accept multiple brands of feedback devices
Norgren Offering:	Aluminum, Steel, or Stainless Steel construction Various bore sizes Design can be adapted to multiple Norgren Cylinder ranges

Engineering Advantage Solutions

Baghouse Cylinder

Description: package	Cylinder with valve, junction box, filter/regulator, lockout - comprehensive
Typical Applications:	Baghouses, Dust collectors (poppet and damper operation)
Sectors/Industries:	Power Generation, Foundry & Steel, Food Manufacturers, Chemical Producers, General Waste Management
Features & Benefits:	Custom made to customer specifications Eliminates field installation costs of separately installing and wiring air valves, terminal strips, limit switches, junction boxes, filters/regulators.
Norgren Offering:	Complete factory assembled and tested valve operator package Aluminum or Steel construction, up to 14" bore size, custom stroke lengths, custom paints, custom configurations

Reciprocating Air Motors

Description:	Cylinder/valve combination with stroke signal valves serving as external pilots
Typical Applications:	Pumping media such as: lubrication, fiberglass, foams, resins, hot melt glue, liquid polymers, waste gases & liquids.
Sectors/Industries:	Industrial Packaging, Dispensing
Features & Benefits:	Self contained package for simplified installation (fewer components) Quick dispense response time, reduces winking Non-freezing designs available - reliability, automatic and continuous operation
Norgren Offering:	Aluminum, Steel, and Stainless Steel construction 1-1/2" - 12" bore sizes Custom configurations

Value Added

From Aesthetics, to Functionality, to Custom Coatings and Designs - Let Norgren engineer a solution that works for you!

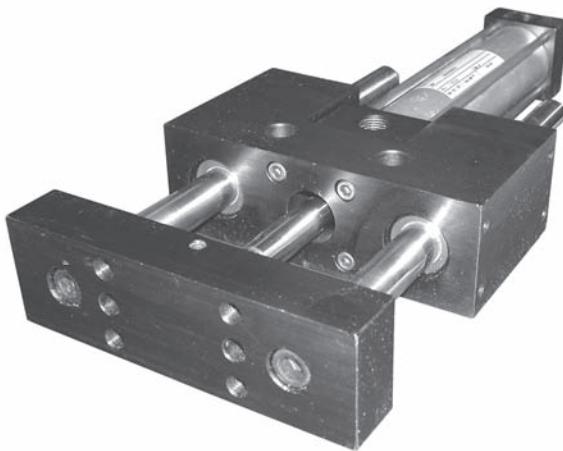

LS Series Thrusters

Improved load carrying qualities

Ecology seal improves load dampening

Alignment coupler installed in tooling plate for self-alignment of cylinder rod to tooling plate connection prevents binding.

Technical data

NFPA tie rod cylinder

Bore sizes: 1-1/2" and 2"

Operating pressure: 250 psi max.

Temperature range: -20°F to 200°F (-29°C to 107°C)

Porting: 3/8 NPT

Ecology piston seals available (fixed cushion, adjustable or extra long Decel-Air" cushions)

Universal mounting (sleeve nut construction): Ease of cylinder removal (modular)

Linear thruster materials of construction

Body and tooling plate: Anodized aluminum alloy.

Guide rods: Hardened high carbon bearing quality steel.

Bushings: Composite (Teflon lined) self-lubricating or linear roller bearing.

Felt washers: oil impregnated

Retaining rings: to ensure bearing location.

Alignment coupler: carbon steel

Cylinder materials of construction

Piston rod: Chrome plated high strength carbon steel

Tie rods: High strength carbon steel

Seals: Nitrile piston, piston rod and tube seals,

Urethane piston rod wiper.

Wearband: Teflon and graphite composite

Cylinder tube: Aluminum with hardcoat anodize

Rod bearing: Oil impregnated sintered iron

Endcaps: A and EA Series cylinder - aluminum

J and EJ Series cylinder - steel

Decel-Air Cushions

Norgren's Decel cushioned cylinder was designed for applications where high velocity, low mass, material function or machine function is required, and where the kinetic energy to be absorbed during cushioning exceeds the parameters of standard cylinders equipped with Ecology piston seals and fixed or adjustable cushions. Decel cushions employ longer-than-standard air cushions to assist our Impact Dampening Piston Seal.

Energy Absorption Capacity of the Impact Dampening Seals

*Usable Pounds Stoppable at the Following Piston Speeds

This chart features the energy absorption capacity of the impact dampening piston seals with Non-Adjustable cushions.

1-1/2" Bore					2.0" Bore			
Load (LBS.) Short Body			Load (LBS.) Long Body		Load (LBS.) Short Body		Load (LBS.) Long Body	
Velocity In./Sec	Standard Guide Shaft	Oversize Guide Shaft	Standard Guide Shaft	Oversize Guide Shaft	Standard Guide Shaft	Oversize Guide Shaft	Standard Guide Shaft	Oversize Guide Shaft

18	12.4	10.2	11.9	9.3	7.8	16.1	20.0	13.6
24	4.9	2.7	4.44	1.8	7.8	2.7	6.5	0.2
30	1.3	0	0	0	1.5	0	0.2	0.0

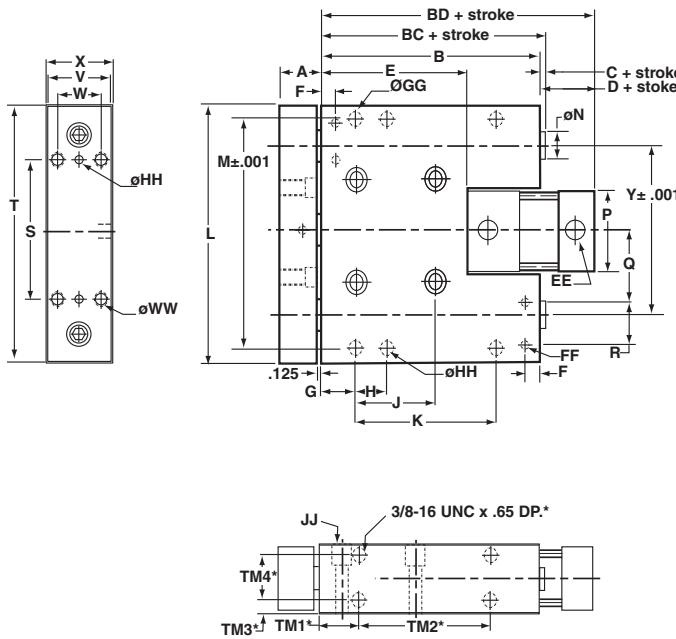

*The weight of the cylinder piston has been deducted from the figures shown above.

Note: The use of Viton® Seals limits the absorption of the impact dampening seals by 50%.

NOTE: The weight of a tooling plate, guide rods, and 1 extend and 1 retract stop collar has been added.

(Guide rod weight is based on a 6.0" stroke cylinder.)

short body	18"	22"
long body	24"	28"

Options

AE = stroke adjustment (collar & bumper) - extend stroke

AR = stroke adjustment (collar & bumper) - retract stroke

CR = corrosion resistance (includes linear slide and cylinder)

GL = guide rod lubrication (includes oiler cups installed)

GM = guide rod lubrication modification for oiler cups

L() = non-standard port location

ME = shock absorber mounting block - extend stroke

MR = shock absorber mounting block- retract stroke

N() = non-standard adjustable cushion needle location

P() = non-standard port size
(down one size = 1/4 NPT, up one size = 1/2 NPT)

PS = magnetic piston (cylinder)

PX() = tooling plate extension

TM = side tapped mounting

WC = linear thruster assembly without cylinder

WS = replacement cylinder without slide

V = high temperature viton seals

* Non-cushioned cylinders will have U-cup seals as standard.

Ecology seals are not available as non-cushioned.

** Standard cushion adjustment location is side 1 and adds 1" to the overall length of the cylinder per end with standard port sizes.

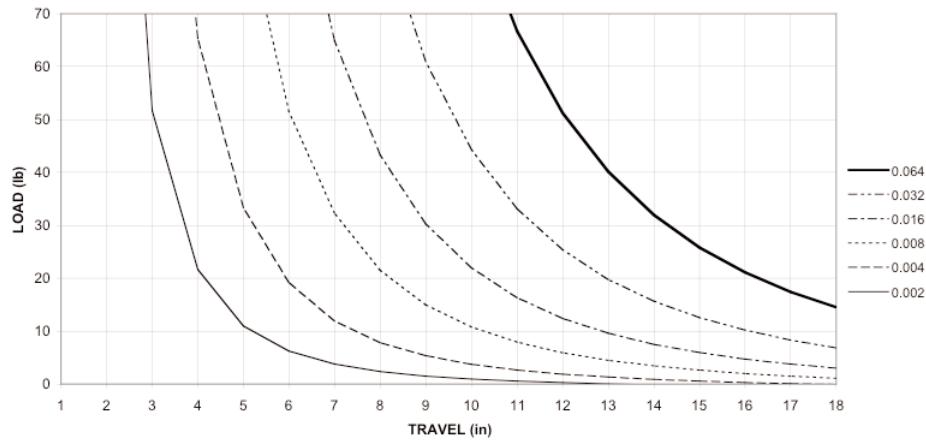

+ Roller bearings are not available with oversized guide rods.

++ Roller bearing not available with CR (corrosion resistance) option.

NFPA Rod alignment coupler, pn SC-1-06

Made of 303 Stainless Steel, the Rod Alignment Coupler allows 1/16" of radial float and 2° of spherical movement.

This prevents cylinder binding due to misalignment thus extending bearing and seal life, and permits greater tolerance between the center line of the cylinder and mating part for simplified installation.

Series SS NFPA Interchangeable Actuators

1-1/2" to 8" bore sizes

1 Piston Seals: Lip-type nitrile seals are pressure energized and wear compensating. Their excellent lubrication retention characteristics lower seal friction and ensure long life.

2 Piston: Solid aluminum alloy, light-weight for low inertia, yet strong.

3 Head/Cap: Precision machined from solid corrosion-resistant 304 stainless steel bar.

5 Rod Seals: Rounded lip-type urethane is pressure energized and wear compensating.

6 Piston Rod: 303 stainless steel, 40,000 PSI minimum yield, hard chrome plated, ground and polished.

7 Ultra Cushion®: State-of-the-art design features a unique, one-piece, nitrile compound seal, captured within a precision machined groove. Linear and radial "float" of cushion seal eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.)

9 Wear Strip: Teflon® composite for minimum friction, maximum wear and side load resistance.

8 Adjustable Captive Cushion Needle Allows for safe and precise adjustment under pressure.

10 Tie Rods: High-strength 303 stainless steel maintains compression on tube end seals.

12 Retainer: Stainless steel snap ring securely retains bushing in head.

13 Rod Bearings: Machined from 304 stainless steel, with a Teflon® composite wear band insert that eliminates metal-to-metal contact.

14 Acorn Nut: Tie rod threads are covered by stainless steel acorn nuts.

Series D

Series D cylinders are designed for extremely smooth stroke performance on applications requiring very slow extension and/or retraction speeds. They are identical to the Series SS in design, function and dimensions, but have "ELF" carboxylated nitrile piston seals, rod seals, and rod wipers. "ELF" carboxylated nitrile is a blend of Teflon® and other low friction additives that are molded into the substrate of the base seal material. Incorporating this compound in the dynamic seals of the cylinder results in diminished friction, lower breakaway and superior stroke performance.

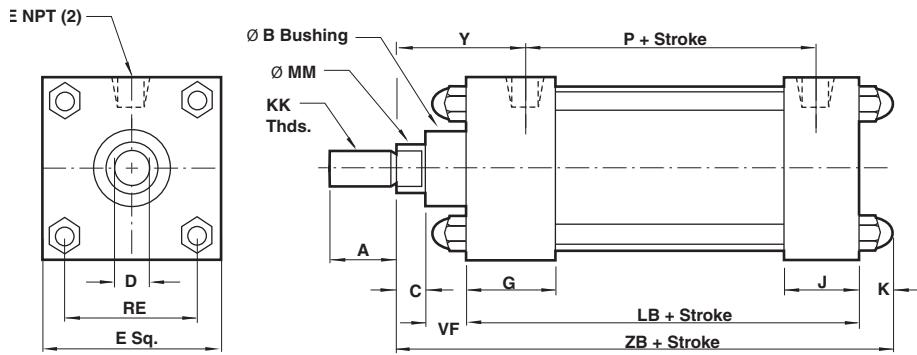

Features:

- Extra smooth performance throughout the entire stroke of the cylinder.
- NFPA interchangeable.
- Cylinders rated to 250 PSI air.

Series N Actuators

1-1/8" to 4" bore sizes

NFPA Interchangeable

Cylinders rated to 250 PSI air,
400 PSI hydraulic (non-shock).

Designed for non-lube service.

Switches available on all bore sizes.

Technical data

Medium:

Filtered compressed air to
250 psi
(for hydraulic service
consult factory.)

Operating Temperatures:
-20°F to 200°F
(-29°C to 93°C)

Operating Pressure:
250 psig (17.2 bar)

1-1/8" Bore pressure rating: 150 psi

Bore Sizes:

1-1/8", 1-1/2", 2", 2-1/2", 3-1/4", 4"

Materials:

Head and end caps - anodized 6061-T6
aluminum

Tube: 6063-T832 aluminum, clear
anodized O.D., hard coat anodized I.D.

Piston Rod: C1141 hard chrome plated
steel

Piston: 2011-T451 aluminum

Rod Bearings: G2 Durabar cast iron,
teflon coated

Seals: carboxylated nitrile

Tie Rods: 12L14 steel

The finest materials for each component!

1 Piston Seals: Lip-type carboxylated nitrile incorporating Teflon[®] and other non-lube additives as integral parts of the compound. Extremely smooth stroke performance and "no lube added" operation results from reduced friction.

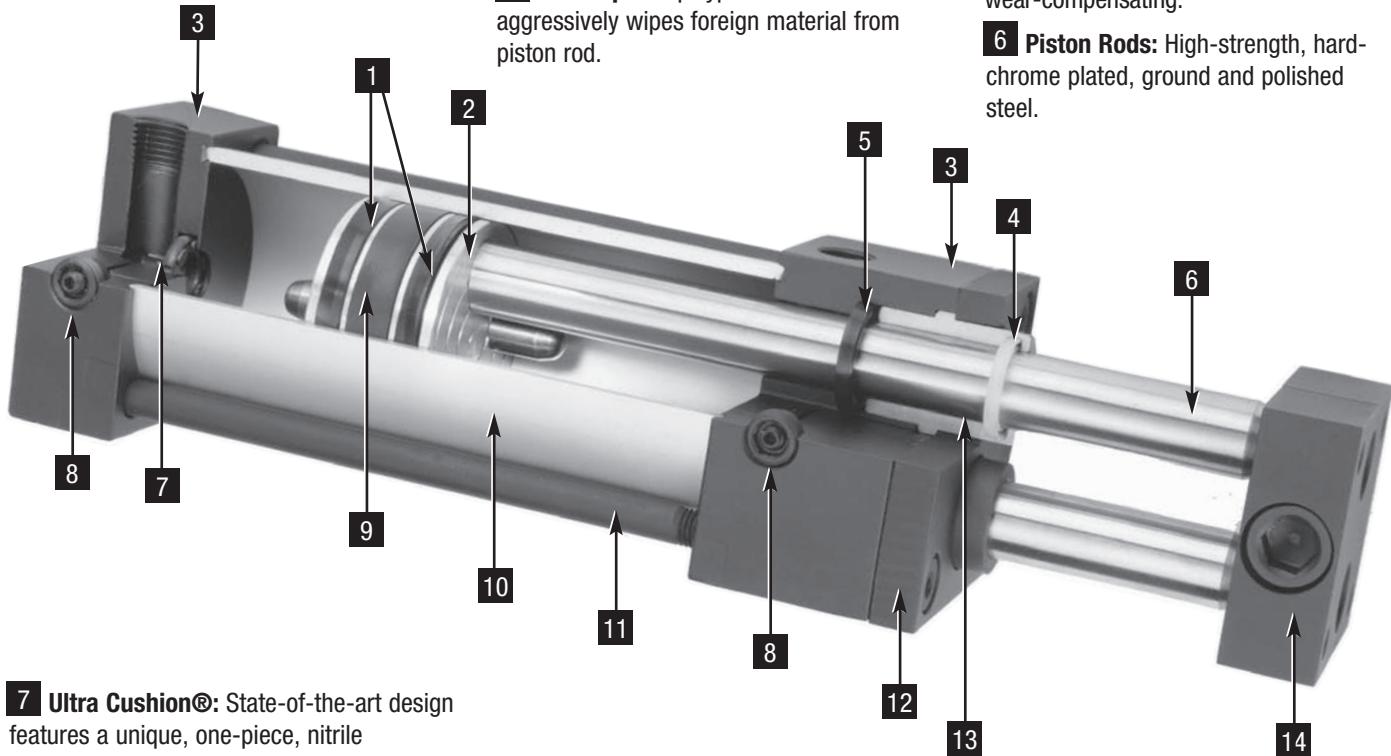

2 Piston: Solid aluminum alloy, light-weight for low inertia, yet strong.

3 Head/Cap: Precision machined from (6061-T6) solid aluminum bar, anodized for corrosion resistance.

4 Rod Wiper: Lip-type urethane aggressively wipes foreign material from piston rod.

5 Rod Seals: Rounded lip-type carboxylated nitrile incorporating Teflon[®] and other non-lube additives as integral parts of the compound. Extremely smooth stroke performance and "no lube added" operation results from reduced friction. Rod Seal is pressure-energized and wear-compensating.

6 Piston Rods: High-strength, hard-chrome plated, ground and polished steel.

7 Ultra Cushion[®]: State-of-the-art design features a unique, one-piece, nitrile compound seal, captured within a precision machined groove. Linear and radial "float" of cushion seal eliminates misalignment. Ultra Cushions provide exceptionally fast "out of cushion" stroke reversal. (Head and Cap Cushions are optional.)

8 Adjustable Captive Cushion Needle

9 Wear Strip: Teflon[®] and graphite composition for minimum friction, maximum wear and side load resistance. (Magnetic band under wear strip optional.)

10 Tube: 6063-T832 aluminum alloy ideally suited for air service. Tube is clear anodized on the O.D. and "hard anodic coated" on the I.D. resulting in a smooth, file-hard (60RC), corrosion-resistant and score-resistant surface finish.

11 Tie Rods: High-strength steel maintains compression on tube end seals.

12 Retainer: High-strength steel is used to retain rod bearings.

13 Rod Bearings: Machined from durable, close-grained cast iron, then completely coated with Teflon[®] to insure permanent lubrication and corrosion resistance.

14 Tooling Plate: Machined from solid steel and notched for secure attachment. Modular and pilot adaptor plates are available to add to the tooling plate mounting. (Use of modular and pilot adapter plates adds to overall length.)

Series Q

Series Q cylinders are designed for corrosive environments. They are identical to the Series N in design, function, and dimensions, but have electroless nickel plating and stainless steel components to create significant resistance to corrosion.

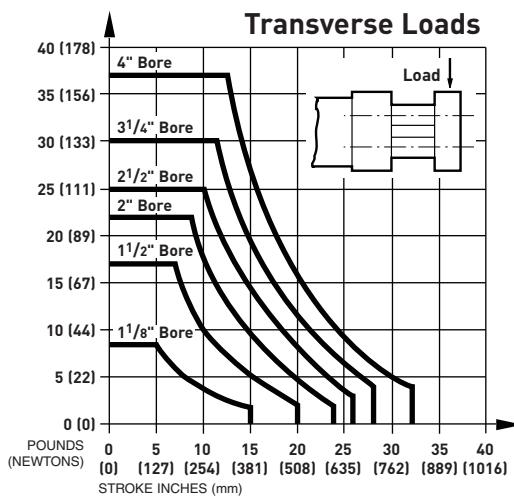

Features:

Head, cap, tube, bushings, front plate, mounts, tooling plate, tie rod nuts, and screws are plated with electroless nickel to a minimum thickness of .0005".

Piston rod, tie rods, and cushion needles are made from 300 series stainless steel.

Series N Actuators

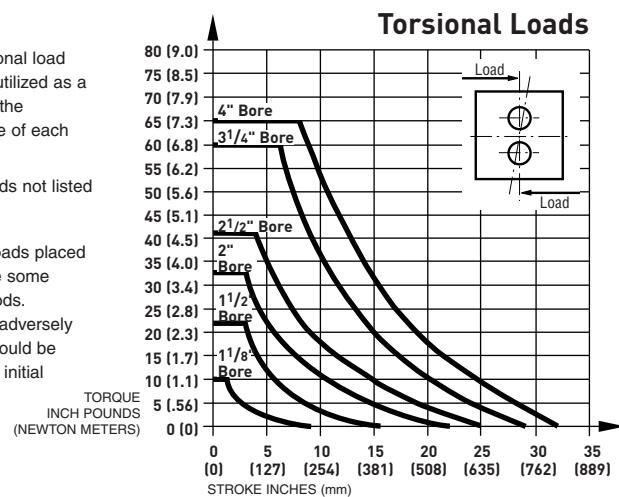

1-1/8" to 4" bore sizes

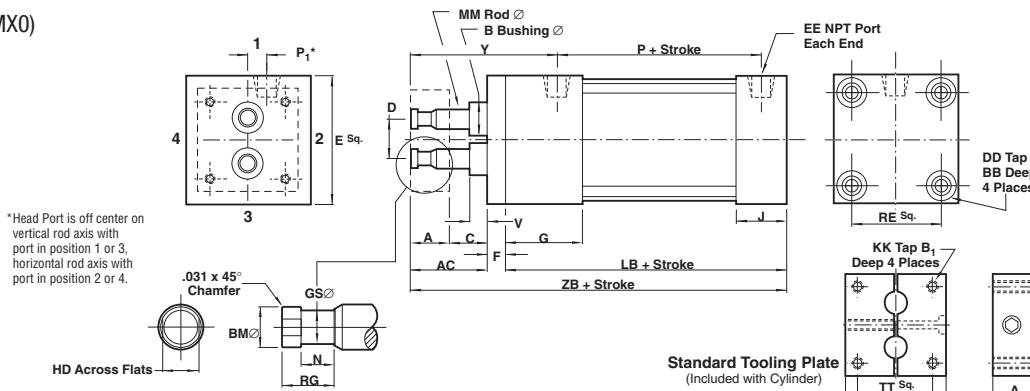

The transverse and torsional load graphs shown are to be utilized as a guideline with respect to the maximum load and stroke of each bore size.

NOTE: For strokes or loads not listed consult factory.

Transverse or torsional loads placed on the cylinder will cause some deflection of the piston rods. Excessive deflection will adversely affect cylinder life and should be considered at the time of initial application design.

Standard Pin Dimensions

Series ET, T & VT Tiny Tim

3/4" and 1-1/8" bore
Single and double rod end styles
Viton seals optional for higher temperatures

Technical data

Medium:
 Compressed air, filtered, lubricated or non-lubricated

Operation:
 Single or double acting

Operating Pressure:
 150 PSI (10 bar)

Operating Temperature:
 -20° to 200°F (-29° to 107°C)

Cylinder Diameters:
 3/4", 1-1/8"

Differences between Series T and Series VT air actuators

Series T contains a Quad Ring Buna-N piston seal. The VT Series utilizes a dual Block-Vee nitrile piston seal design.

The Block-Vee seals increase the envelope dimensions of the Series VT cylinders by 3/8". All other features of the Series T and VT are the same.

Series VT cylinders have a slightly lower breakaway pressure (psig) than the Series T Tiny Tim air cylinders.

Options selector for T, VT, and ET

VT	SR	3/8	RC	EN	1-1/8	5	
Single Rod End Models	Substitute

Back trunnion mount	BT						
Rod Diameter	Specify						
5/16" or 3/8"							
Single Acting Cylinders	Substitute						
(3/4", 1-1/8" Ø)							
Spring on rod end (spring retracts rod)	SR						
Spring on cap end (spring extends rod)	SC						

Notes: Cylinder requires a stop tube equivalent to the stroke length.

Cushions not available on spring end of cylinder.

Standard spring forces for SR and SC = 3.5 lbs relaxed, 11.5 lbs compressed

Series ET

Series ET actuators achieve their cushion effect through the normal compression of the Buna-N "Ecology" impact dampening seals at the completion of the cylinder stroke. This compressive action absorbs the cylinder's kinetic energy and reduces the shock created by the piston striking the end caps.

The measurable cushion effect of the "Ecology" impact dampening seals provides a predictable pounds stoppable/piston speed ratio, allowing you to determine the exact weight that can be stopped at a given piston speed. Series ET actuators also help meet OSHA's noise and clean air standards (see website). They are guaranteed to operate without lubrication for one year regardless of cycles. Non-lubricated operation is achieved by the combined efforts of an oil-impregnated sintered iron piston rod busing that lubricates the rod during normal operation, and through the use of a reinforced Teflon wear ring on the center perimeter of the piston. This ring reduces friction between the piston and the cylinder tube.

Energy Absorption Capacity of Impact Dampening Seals

Size	In./Lbs of Kinetic Energy Absorbable	Pounds* Stoppable at Following Speeds					
		6 in/sec	12 in/sec	24 in/sec	36 in/sec	48 in/sec	60 in/sec
3/4"	1.5	32.4	8.0	2.0	.8	.41	.23
1", 1-1/8"	3	79.2	16	4	1.8	1	.59

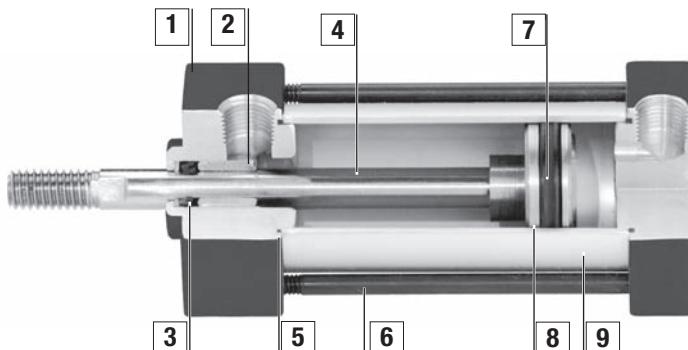

*Pounds must include piston and rod assembly weight

Series T, VT, ET Tiny Tim Non-NFPA Interchangeable

Series T

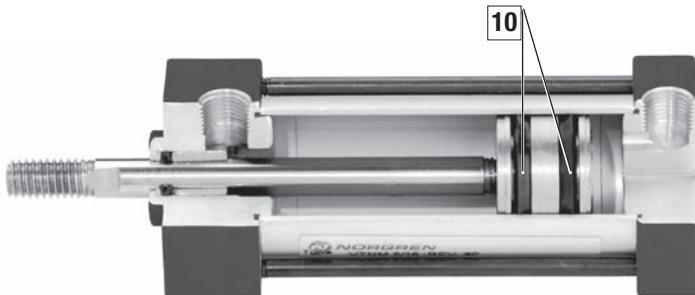

Series T uses Quad Ring Buna-Ring piston seal.

- 1 Heads and Caps: Corrosion resistant alloy or black oxidized steel.
- 2 Rod Bushing: Oil-filled, sintered iron bushing.
- 3 Rod Seal: Replaceable block-vee Buna-N rod seal (Viton® optional).
- 4 Piston Rod: Hard chrome plated high tensile steel piston rod.
- 5 Seals: O-ring type seals.
- 6 Tie Rods: High yield strength tie rods.
- 7 Piston Seal: Replaceable quad ring Buna-N (Viton® optional).
- 8 Piston: Machined alloy.
- 9 Tubing: Hard anodized I.D. aluminum tubing.

Series VT

- 10 Series VT uses Block-Vee Buna-N piston seal. This increases envelope dimension by 3/8" but provides lower breakaway pressure.

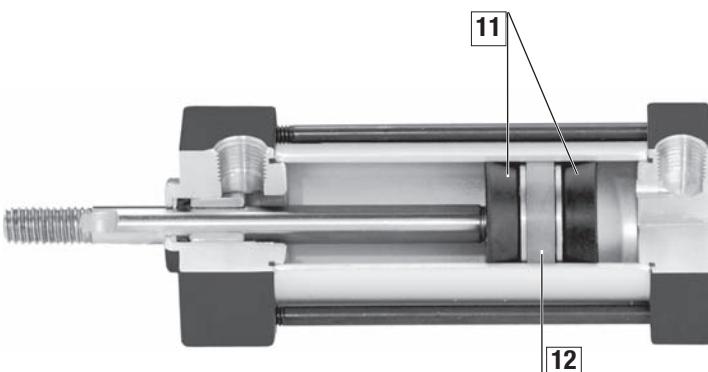

Series ET

Series ET actuators achieve their cushion effect through the normal compression of the Buna-N "shock-absorber" seals at the completion of the cylinder stroke. This compressive action absorbs the cylinder's kinetic energy and reduces the shock created by the piston striking the end caps.

The measurable cushion effect of the "shock-absorber" seals provides a predictable pounds stoppable/piston speed ratio, allowing you to determine the exact weight that can be stopped at a given piston speed.

Series ET actuators also help meet OSHA's noise and clean air standards. They are guaranteed to operate without lubrication for one year regardless of cycles. Non-lubricated operation is achieved by the combined efforts of an oil-impregnated sintered iron piston rod busing that lubricates the rod during normal operation, and through the use of a reinforced Teflon wear ring on the center perimeter of the piston. This ring reduces friction between the piston and the cylinder tube.

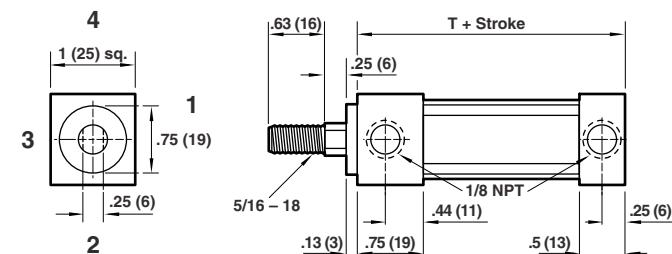

- 11 Wear Ring: Teflon® reinforced wear ring.
- 12 Impact Dampening Seals: Specifically designed piston incorporates energy absorbing seals to dissipate the forces generated during impact without increasing envelope dimensions. Not available for cylinders with oversize rods. Not recommended for applications that require 100% repeatable stroke increments, or for applications that exceed the pounds stoppable.

(See "Ordering Procedure" for details.) For spring return cylinders add an additional stroke length to above dimensions.

Series DT, EDT, VDT (Double Rod End)

Dimensions in inches (mm)

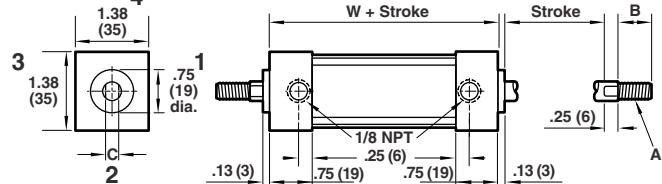

3/4 Bore

Standard Cylinder (DTNM, VDTNM, EDTNM)

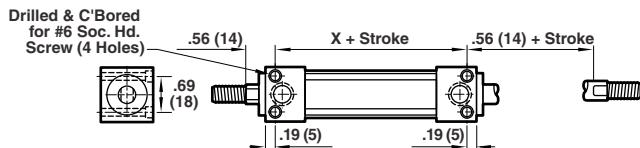

1-1/8 Bore

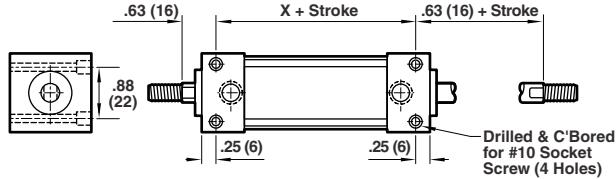

Standard Cylinder (DTNM, VDTNM, EDTNM)

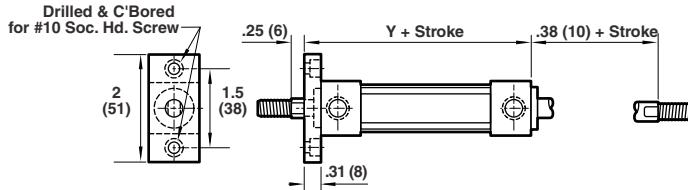

Flush Mount – DTF, VDTF, EDTF

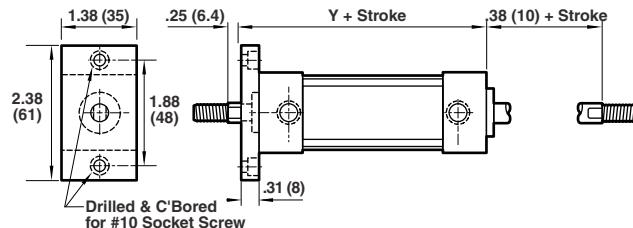

Flush Mount – DTF, VDTF, EDTF

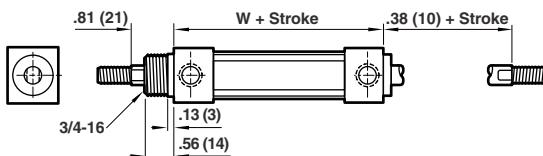

Front Flange – DTFR, VDTFR, EDTFR

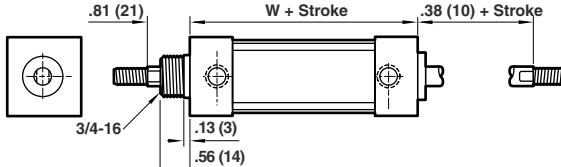

Front Flange – DTFR, VDTFR, EDTFR

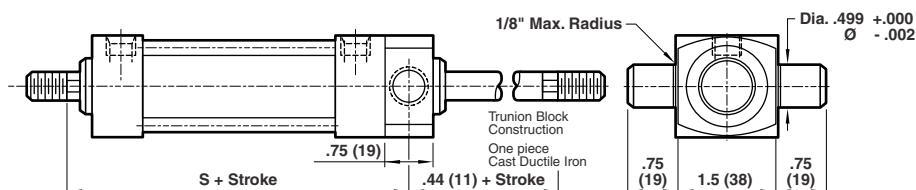

Nose Mount – DTSR, VDTSR, EDTSR

Nose Mount – DTSR, VDTSR, EDTSR

Trunnion Mount *– DTHT, VDTHT, EDTHT

*Configured as special at factory

Piston Rod	5/16 Diameter	3/8* Diameter
A	.5/16-18	3/8-24
B	.63 (16)	.75 (19)
C	.25 (6)	.31 (8)

* 3/8" dia. piston rod will be furnished as an option only if specified.

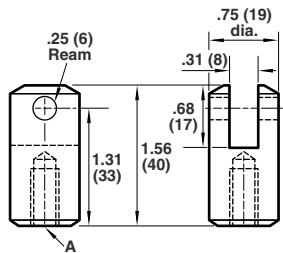

3/4" Bore		1-1/8" Bore	
DT	VDT & EDT	DT	VDT & EDT
S	2.81 (71)	3.19 (81)	2.81 (71)
W	2.06 (52)	2.44 (62)	2.06 (52)

NFPA Interchangeable TA, TAV, TAE Actuators

3/4", 1", and 1-1/8" bore
Single and double rod end styles
Rated 150 psi air
-20° to 200°F (-29° to 107°C) operating temperatures
Viton seals optional for higher temperatures
Designed to conform with NFPA (T3.6.11) 1972.

Technical data

Medium:
Compressed air, filtered, lubricated or non-lubricated

Operation:

Double acting

Operating Pressure:

150 PSI (10 bar)

Operating Temperature:

-20° to 200°F (-29° to 107°C)

Cylinder Diameters:

Nominal Inch: 3/4", 1-1/8"

1-1/8"	4	.50 (31)	1/2-20	.75 (19)	7/16-20

* RM (Dia.) on Series TAV and DTAV 1" & 1-1/8" Sizes in Mounting Styles 5 and 8 is 1".

Other options

High temperature seals

Available for all seals and bore sizes when normal service requires the cylinder to operate at ambient temperatures ranging above 200° to 350°F (93° to 177°C). Specify Viton.

Single Acting, Spring Return Actuators

Available for all Series and bore sizes. Add two times working stroke to envelope dimensions.

Adjustable Cushions

Insert type adjustable cushions are available when required. Add 1/2" to cylinder length per cushioned end.

Note: Not available with 1/2" diameter rods.

Rack & Pinion Rotary Actuators

**Single, Double, and Integral Air/Oil Tandem Rack & Pinion Mini Rotary Actuators
(Ø1/2" & 3/4" Bores)**

**Single Rack and Pinion Mini Rotary
Actuators are very compact.**

Rotation angles 45°, 90°, and 180° standard.

Nitrile Noise Dampening Bumpers optional.

**Viton® Seals optional for higher
temperatures.**

Optional Low Friction Seals.

**Body Mount or optional Angle Bracket, Front
and Rear Flange Mountings.**

Technical data

Medium:

Filtered compressed air to 150 PSI (10 Bar)

Operating Temperature:

-20°F to 200°F (-29°C to 93°C)

with Standard Nitrile Seals

-20°F to 400°F (-29°C to 204°C)

with Viton® Seals

-20°F to 250°F (-29°C to 121°C)

with Low Friction Seals

Operating Pressure:

150 PSI (10 Bar)

Angle of Rotation:

45°, 90°, 180° Standard

Other rotations available

Rotational Tolerance:

-0° + 1/2°

Backlash Between Rack & Pinion:

2 position units less than 1° of arc maximum

NOTE: For 0° backlash at each end of rotation,
specify a double rack actuator with rotation
adjustments.

Lubrication:

None required

Norgren Rotary Actuators are rated for "no lube added" service. All internal components are lubricated at the time of assembly with a Teflon® based grease. Recommended fluid for air/oil tandem is petroleum based hydraulic oil, non-foaming, non-detergent ISO Viscosity grade of 46.

Materials

End Caps: Black anodized 6061-T6 aluminum

Body: 6061-T6 aluminum alloy, entirely black anodized

Gear Rack: Ground and polished stress proof steel

Pinion Gear and Output Shaft: Manufactured as one piece from high strength steel.

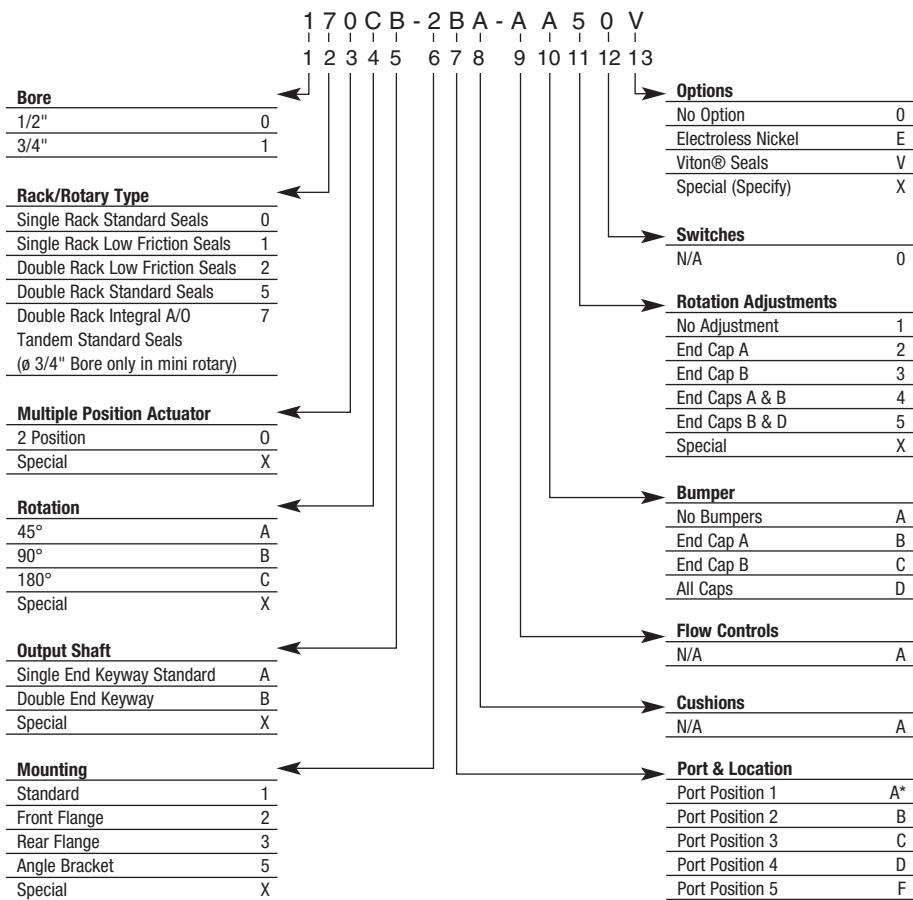

Shaft Bearings: SAE 841 Bronze

Standard Seals: Nitrile

Ordering information

Model codes

*Standard Port Location

EXAMPLE: Mini Rotary Actuator 3/4" Bore – Double Rack Integral Air/Oil Tandem Mini Rotary Actuator – 2 Position – 180° Rotation – Double End Keyway Output Shaft – Front Flange Mounting – Port Position 2 – No Bumpers – Rotation Adjustment End Caps B & D – Viton® Seals.

Rack & Pinion Rotary Actuators

Single, Double, and Integral Air/Oil Tandem Rack & Pinion Mini Rotary Actuators

(\varnothing 1/2" & 3/4" Bores)

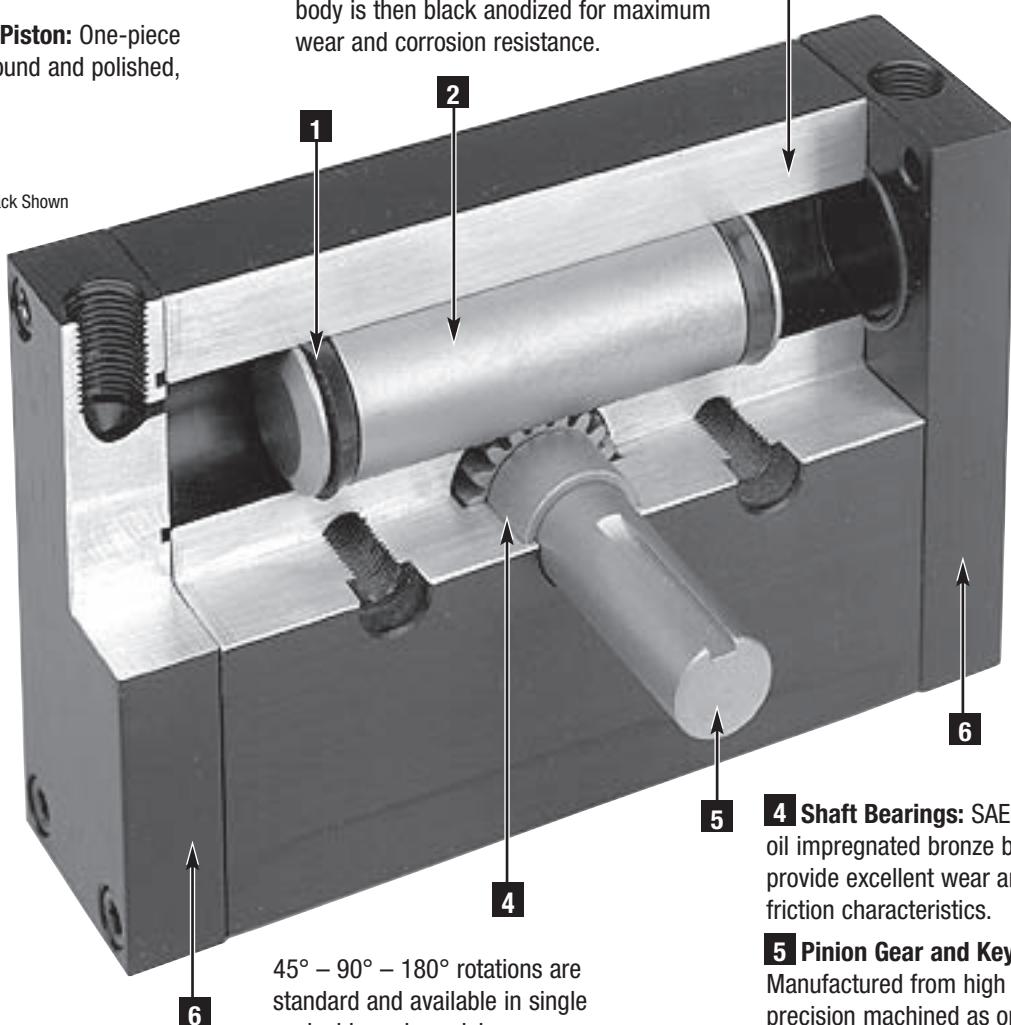

Mini Rotary Actuators are constructed with the finest materials for each component!

1 Seals: Lip type, pressure sensitive nitrile seals are wear compensating for long service life and minimum friction.

2 Gear Rack and Piston: One-piece construction, ground and polished, stress-proof steel.

3 Actuator Body: Precision machined from 6061-T6, 40,000 PSI minimum yield aluminum alloy for strength. The entire body is then black anodized for maximum wear and corrosion resistance.

Double Rack Shown

45° – 90° – 180° rotations are standard and available in single or double rack models.

Seal Kits

Bore	Standard Part No.	Low Friction Part No.	Viton® Part No.	Air/Oil Tandem Part No.
1/2" Single Rack	000SK	000TK	000VK	We recommend that Air/Oil Tandems are returned to the factory for repair.

Rack & Pinion Rotary Actuators

Single, Double, and Integral Air/Oil Tandem Rack & Pinion Rotary Actuators

(\varnothing 1-1/8" & 2-1/2" Bores)

Features

Single Rack and Pinion Rotary Actuators are designed for non-lube added service.

Rotation angles 45°, 90°, 180°, 270, and 360° standard.

Urethane Noise Dampening Bumpers optional.

Viton® Seals optional for higher temperatures.

Optional Low Friction Seals.

Body Mount or optional Angle Bracket, Front and Rear Flange Mountings.

Adjustable Cushions optional Flow Controls

Optional Integral Air/Oil optional

Technical data

Medium:

Filtered compressed air to 150 PSI Petroleum based hydraulic fluid to 400 PSI

Operating Temperature:

-20° to 200°F (-29°C to 93°C) with Standard

Nitrile Seals

-20° to 400°F (-29°C to 204°C) with Viton® Seals

-20° to 250°F (-29°C to 121°C) with Low Friction Seals

Operating Pressure:

150 PSI (10 Bar)

400 PSI (27.6 Bar) Hydraulic (non-shock)

Angle of Rotation:

45°, 90°, 180°, 270°, 360° Standard

Any rotation up to 1080° can be supplied

Rotational Tolerance:

-0° + 10°

Backlash Between Rack & Pinion:

1-1/8" Bore 2 position units 1° of arc maximum

1-1/2" – 2-1/2" Bore 2 position units 30 minutes of arc maximum

Lubrication:

None required

Norgren Rotary Actuators are rated for "no lube added" service. All internal components are lubricated at the time of assembly with a Teflon® based grease. Should additional lubrication become necessary between the radial surface of the rack gear and the rack/pinion mesh area due to severe operating conditions, a grease fitting is provided.

Materials

End Caps: Black anodized 6061-T6 aluminum

Body: 6061-T6 aluminum alloy, entirely hard coat anodized

Gear Rack: Ground and polished stress-proof steel

Pinion Gear and Output Shaft: Manufactured from high-strength steel.

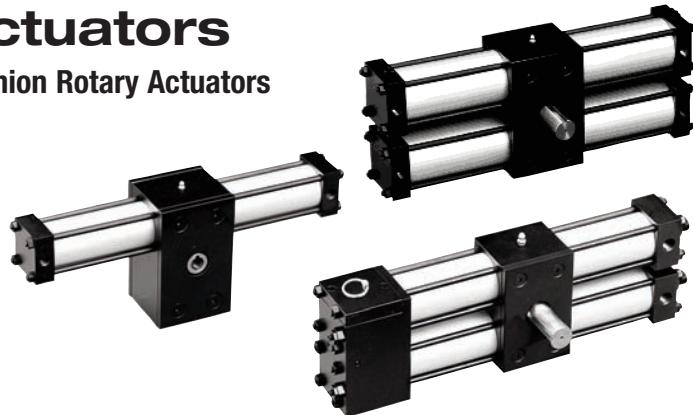

Shaft Bearings: Sealed, single row ball bearings

Standard Seals: Nitrile

Tube: 6063-T832 aluminum alloy

Tie Rods: Stress-proof steel

Floating Pistons: Solid aluminum alloy

EXAMPLE: 11/8" Bore – Double Rack with Standard Seals – 2 Position Rotary Actuator – 180° Rotation – Double End Keyway – Standard Mounting – Standard Port Located

at Position 2 – Cushion Position 1 in End Cap A – No Flow Controls – Bumpers on All Caps – End Cap B Rotation Adjustments – Standard Magnetic Piston Option – Electroless Nickel Plated.

Note: Cushions & Rotation Adjustment cannot be located in same end cap.

Rotary Actuators are constructed with the finest materials for each component!

1 Floating Pistons: Solid aluminum alloy, lightweight for low inertia, yet strong. Provide excellent wear characteristics against the hard coated tube I.D.

2 Seals: Lip type, pressure sensitive nitrile seals are wear compensating for long service life and minimum friction.

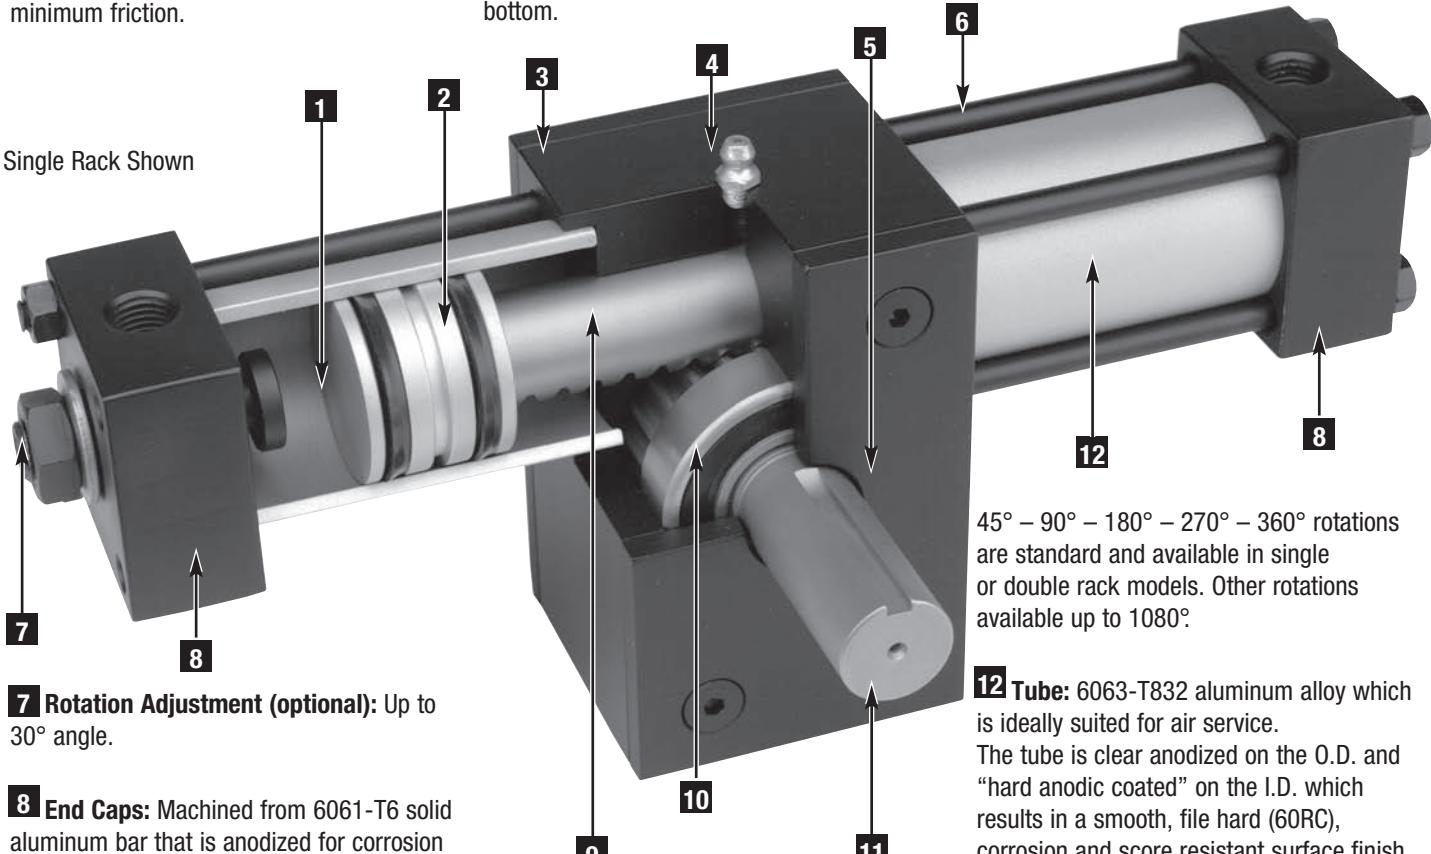

3 Actuator Body: Precision machined from 6061-T6, 40,000 PSI minimum yield aluminum alloy for strength. The entire body is then hard-anodized for maximum wear and corrosion resistance.

4 Grease Fitting: Easy access for additional lubrication. Single rack located on top; double located on top and bottom.

5 Retainers: Aluminum plates are located on the front and rear of the actuator body to ensure positive retention of the pinion/shaft/bearing assembly.

6 Tie Rods: Stress-proof steel to maintain compression on the tube end seals.

Single Rack Shown

7 Rotation Adjustment (optional): Up to 30° angle.

8 End Caps: Machined from 6061-T6 solid aluminum bar that is anodized for corrosion resistance.

9 Rack: Ground and polished stress-proof steel.

10 Shaft Bearings: Sealed, single row ball bearings provide exceptional shaft stability with a low coefficient of friction.

11 Pinion and Output Shaft: Manufactured from high strength steel for maximum strength and endurance. A keyed output shaft is standard with other shaft options available.

12 Tube: 6063-T832 aluminum alloy which is ideally suited for air service. The tube is clear anodized on the O.D. and “hard anodic coated” on the I.D. which results in a smooth, file hard (60RC), corrosion and score resistant surface finish.

Options not shown: Low Friction Seals, Cartridge Speed Controls, High Temperature Viton® Seals, Adjustable Cushions, Bumpers, Magnetic Piston for Position Sensing, Multi-Position Rotation Capabilities.

Rotational Velocity

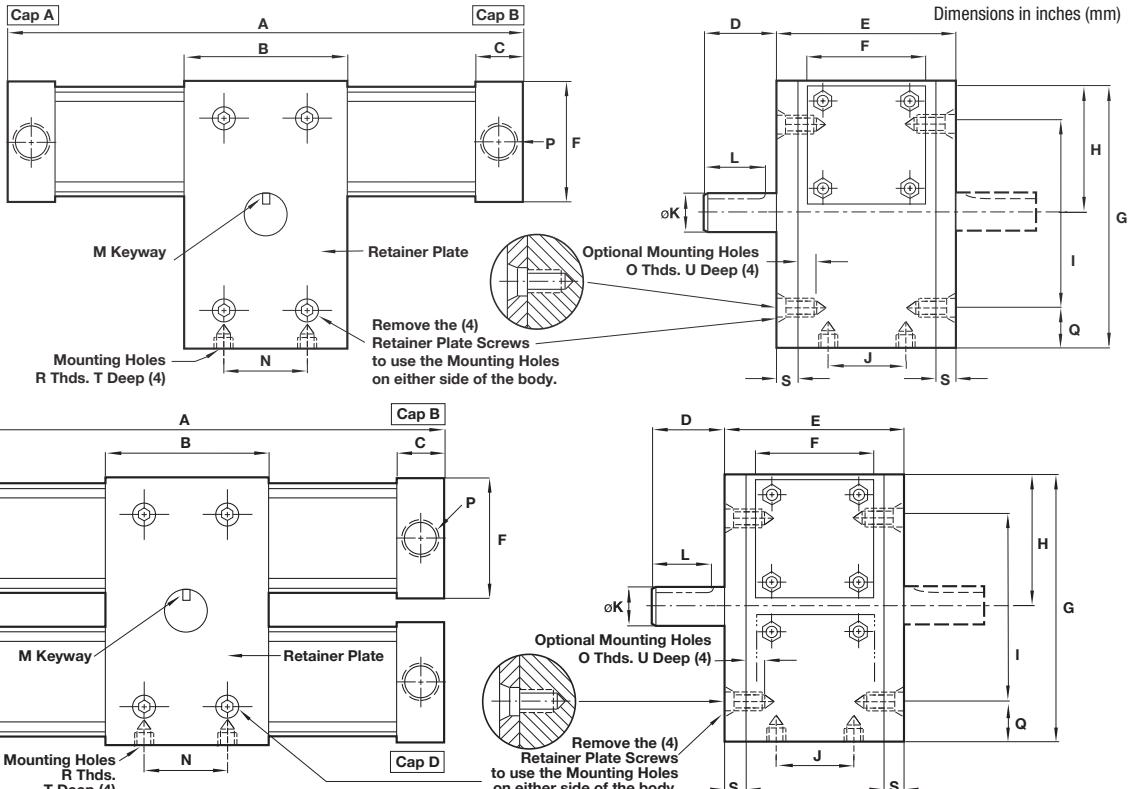

Maximum rotational velocity of a rotary actuator is difficult to determine due to varying factors such as pressure, medium, flow and external loading. Excessive speeds in a given application can create inertia loads whose shock values could prove detrimental to the actuator. Use of external stops, cushions, or other deceleration devices will ensure maximum performance and actuator life.

Standard Air/Oil Tandem

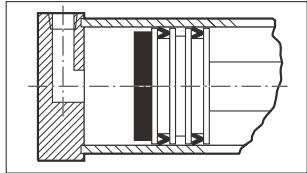

Rotary unit is supplied with an Air/Oil Tank that requires a 20 PSI pressure header.

TO ORDER: enter option code 6 in Rack/Rotary Type position 2.

Noise Dampening Bumper

Urethane bumpers attached to the actuator piston provides quiet operation by preventing metal to metal contact.

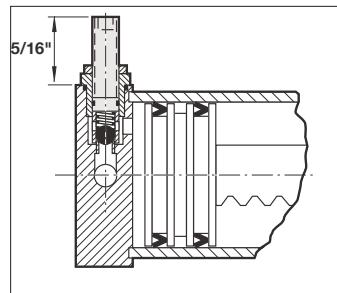

NOTE: Each bumper adds 1/4" to A dimension.

Cartridge Speed Control

ø1-1/2" thru ø2-1/2"

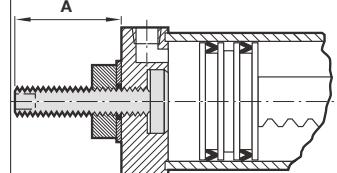

Bores only.

NOTE: Cartridge Speed Control & Cushion are not available on same end cap.

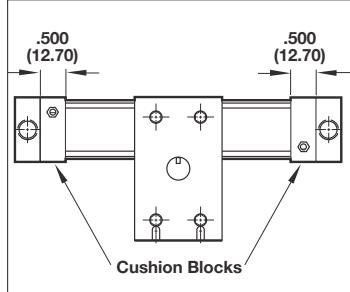

Rotation Adjustment

Located in the actuator end cap, each rotation adjustment provides up to 30° of angle reduction.

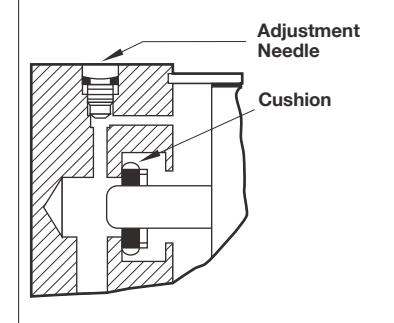

NOTE: Cushion & Rotation Adjustment are not available on the same end cap.

Cushioning
The Cushioning Principle

Cushions permit the trapping of cylinder exhaust volume prior to the completion of full rotation. This volume is then metered through a finely tapered needle to deliver smooth, adjustable deceleration of the rotary actuator. NOTE: On 1-1/8" bores, add 1/2" to overall dimension for each cushion block.

Cushion Design 1-1/8" Bore
Adjustable Cushioning

Flush, self locking adjustment needle allows fine cushion metering. Cushion design features a unique, one piece, nitrile compound seal captured within a groove machined to exacting tolerances. This allows linear and radial float of the cushion seal, virtually eliminating problems associated with misalignment.

Cushion Design 1-1/2" or 2-1/2" Bore

The design also provides exceptionally fast out of cushion rotation reversal.

NOTE: Air/Oil Tandem and Multiple Position Rotary Actuators utilize a double rack configuration; however, the torque output of a Single Rack unit apply. Deduct 10% from torque output for frictional loss. Deduct 20% for frictional loss on all Air/Oil Tandem Rotary Actuators.

NORGREN **ENGINEERING ADVANTAGE** CUSTOM SOLUTIONS

CASE STUDY Compact valve module frees valuable under-dash space in truck cabs

CUSTOMER CHALLENGE

- Reduce tubing & leak potential
- Simplify installation
- Easily adapt to various chassis configurations

CUSTOM SOLUTION BENEFITS

- Shortened tubing eliminates under-dash leaks
- Pre-configured electrical connector & push-in fittings enable fast installation
- Modular design enables accessory options

Air Solenoid
Accessory
Pack (ASAP)

NORGREN INDUSTRY EXPERTS CAN

- » Increase system performance
- » Reduce total cost of ownership

ISO/VDMA Cylinders

DA/8000

Double acting

Ø 32 ... 320 mm

Conforms to ISO 6431, ISO 15552, VDMA 24562 and NFE 49-003-1

High performance, ruggedness and reliability

Extensive range of mountings

Technical data

Medium:

Compressed air, filtered, lubricated or non-lubricated

Standard:

ISO 6431, VDMA 24562, NFE 49-003-1 and corresponding BS

Operation:

DA/8000 double acting, adjustable cushioning

DA/8000/M double acting, magnetic piston, adjustable cushioning

Operating pressure:

15 to 232 psig (1 to 16 bar) 15 to 145 psig [1 to 10 bar] for Ø 250 and 320 mm

Operating temperature:

-4°F to +176°F (-20°C to +80°C) max.

Consult our Technical Service for use below +35°F (+2°C)

Strokes:

Standard, see table

Non-standard strokes up to 3000 mm maximum

Materials

Barrel: anodized aluminum

End covers: pressure diecast aluminium (Ø 200 to 320 mm gravity cast aluminum)

Piston rod: stainless steel (Martensitic)

Piston rod seals: polyurethane (Ø 125 to 320 mm nitrile rubber)

Piston seals: polyurethane (Ø 125 to 320 mm nitrile rubber)

'O'-rings: nitrile rubber

Note: Style 'H': These mountings are only supplied assembled complete with the cylinder. Unless otherwise specified, units will be supplied with dimension 'XV' plus half the stroke length. 'XV' = Distance from the piston rod shoulder to the center of the mounting.

Style 'UH': It is most important that the locking screws which secure the mounting to the tie rod are tightened to the torque figures shown in the table below. For maximum energy input, consult our Technical Service.

Guide blocks for ISO/VDMA cylinders

QA/8000/51/*

QA/8000/61/*

Ø 32 ... 100mm

Conforms to ISO 6431, ISO 1552,
VDMA 24562 and NFE 49 003 1

Ensures protection against
external rotary and bending
forces

Guide rods run through bearings
protected by wiper rings

Provides accurate guidance for
unsupported loads

Technical data

Operating temperature:
+32°F to +176°F (0°C to +80°C)
maximum

Materials

Guide block, nut & mounting plate:
anodized aluminum

Plain bearings:

Sintered bronze QA/8***/51/*

Steel roller bearing QA/8***/61/*

Rods: Stainless steel

Wiper rings: nitrile rubber

Standard models QA/8000/51/* (plain bearing)

* Insert stroke length in mm.

Locking cartridges should be ordered separately. Active – pressure applied to lock, passive – pressure released to lock. 2 required per guide block.

Note: For all applications please consult our Technical Service

When using guide blocks (QA/8000/61) for profile cylinders PDA/182000 you have to order a model with a barrel which is turned at 90° so that the port threads are in line with the two switch grooves.

** Adjustment range

Note: Supplied complete with mounting screws for cylinders and two centering sleeves.

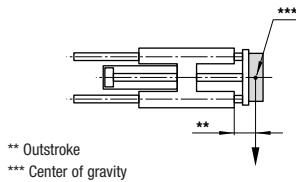

Attention

When using guide blocks (QA/8000/61) for profile cylinders PDA/182000 you have to order a model with a barrel which is turned at 90° (PDA/182000/IIL, .../MIL) so that the port threads are in line with the two switch grooves.

Guide blocks with roller bearings

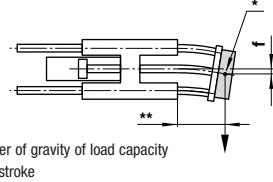

QA/8000/61/*

Ø 32 ... 100 mm

** Outstroke
*** Center of gravity

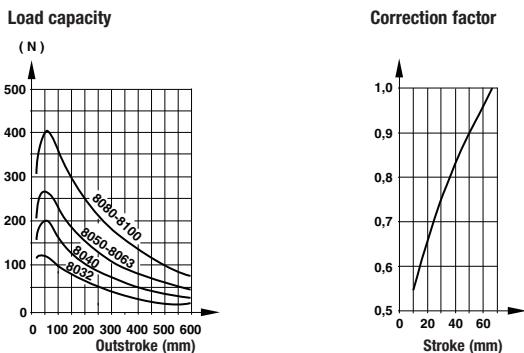

Maximum load capacity is dependent on the outstroke of a horizontally installed guide unit. In the case of short stroke operation, the load capacity figures taken from the diagram must be multiplied by the correction factor (diagram 2). In the curves of load capacity (diagram 1), the short stroke corrections have already been taken into account for an outstroke > 60 mm.

* Center of gravity of load capacity
** Outstroke

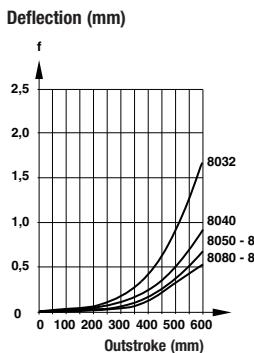

The total deflection of guide rods will be determined by the addition of that due to own weight (diagram 3) and that due to load capacity (diagram 4).

Maximum load capacity depending on outstroke
(diagram 1)
(diagram 2)

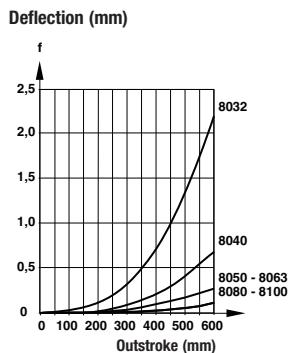

In the case of shock load applications, the figures given in the diagrams above must be reduced by a factor of 2.

Deflection caused by own weight
(diagram 3)

Deflection caused by a load of 10 N
(diagram 4)

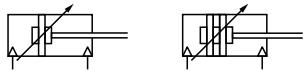

ISO/VDMA Profile cylinders

PDA/182000, PDA/182000/M

Double acting

Ø 32 ... 125 mm

Conforms to ISO 6431, ISO 15552,
VDMA 24562 and NFE 49-003-1

Profile barrel with concealed tie rods

High performance, stability and reliability

Polyurethane seals ensure efficient low friction operation and long life

Switches can be mounted flush with the profile barrel

Comprehensive range of standard mountings

Technical data

Medium:

Compressed air, filtered, lubricated or non-lubricated

Operation:

PDA/182000: Adjustable cushioning

PDA/182000/M: Magnetic piston, adjustable cushioning

Operating pressure:

15 to 232 psig (1 to 16 bar)

Operating temperature:

-4°F to +176°F

(-20°C to +80°C) max.

High temperature versions:
302°F (150°C) max.

Consult our Technical Service for use below +35°F (+2°C)

Strokes:

Standard: see next page

Non-standard strokes available
(10 to 3000 mm)

Materials:

Profile barrel: anodized aluminum

End covers: pressure diecast aluminum

Piston rod: stainless steel (Martensitic)

Piston rod seals: polyurethane

Piston seals: polyurethane

O-rings: nitrile rubber

Secure locking of piston rod in any position

Passive locking models

Compact, maintenance-free design

Technical data

Medium:

Compressed air, filtered, lubricated or non-lubricated

Type:

Passive model – pressure applied to release

Operating pressure:

58 to 145 psig (4 to 10 bar)

Operating temperature:

+32°F to 176°F (0°C to +80°C).
Consult our Technical Service for use below +35°F (+2°C).

Materials

Body: hard anodised diecast aluminum

Seals: polyurethane & nitrile

Cartridge: anodized aluminum body

Locking wedges: hardened steel

Cushioning Performance

The dynamic energy of a LINTRA[®] cylinder is caused by direct or partial external loads which must be absorbed by pneumatic cushioning.

The cushioning ability depends to a large extent on the pneumatic circuit (e. g. counter pressure, pre-exhaust). The values given in the diagram were tested with an operation pressure of 87 psi (6 bar) using a 5/2 control valve. When installed horizontally, depending upon the speed, dynamic energy can be absorbed by the cylinder. Whenever the values given in the diagram are exceeded, the transported mass must be cushioned by additional shock absorbers. These have to be located at the center of gravity of the mass.

Cylinder deflection

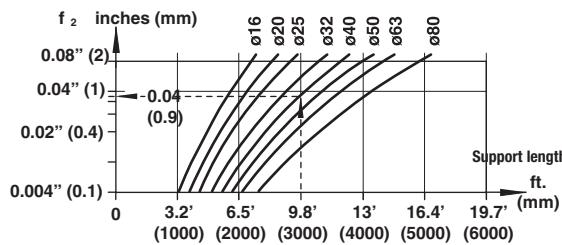

Example:

Cylinder Ø 40 mm, stroke length 11' (3500 mm), external load 45 lbf. (200 N) and a deflection about 0.04 (1 mm).

Maximum distance between supports = 6' (1830 mm) (see diagrams).

Therefore an additional support is required.

Deflection due to cylinder weight

Example:

Cylinder Ø 40 mm, external force 40 lbf (180 N), distance between supports 10' (3000 mm)

Required: total deflection

1. Deflection due to external force (f1)
see Diagram 1 (1mm/100 N) · 40 lbf (180 N)
2. Deflection due to cylinder weight diagram 2

Total deflection:

Max. permitted deflection (f1 + f2)

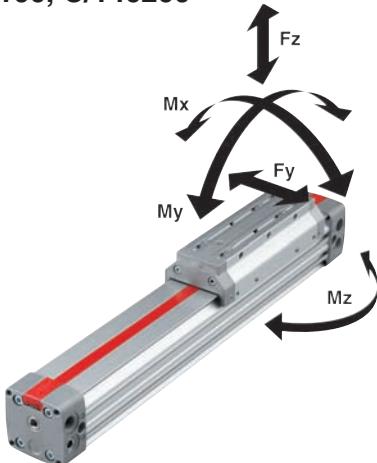

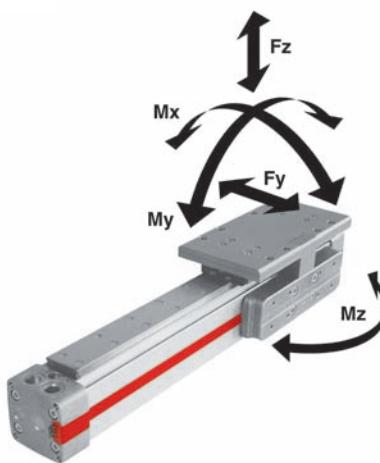

A deflection of more than 0.12" (3 mm) is not permitted.

$$\begin{aligned} & 0.07" (1.8 \text{ mm}) \\ & + 0.04" (0.9 \text{ mm}) \\ & \hline 0.2" (2.7 \text{ mm}) \end{aligned}$$

$$\begin{aligned} & < 0.04" (1 \text{ mm}) \\ & 39" (1000 \text{ mm}) \text{ Stroke} \end{aligned}$$

Loading values applicable to a speed of <0.2 m/s. Maximum working life is normally reached below a speed of 1 m/s.

* The forces and moments refers to the center of the guide. They must not be exceeded in dynamic applications.

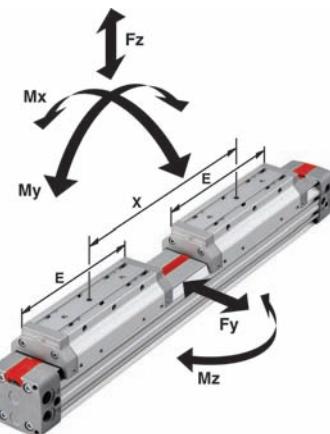

**Loading values for LINTRA® cylinders
with double carriages**

The values given in the table below show the single forces in the directions Fy and Fz and the maximum moments Mx, My and Mz. All values are applicable only for speeds of max. 0.2 m/s.

A requirement for using these values is a constant movement (no jerking) of the mass over the whole stroke length of the cylinder. The reference point from which the moments for all cylinders should be calculated is the center line of the pistons.

When a LINTRA® cylinder has to take several loads and moments. an additional calculation is necessary using this formula:

$$\frac{Mx}{Mx \text{ max}} + \frac{My}{My \text{ max}} + \frac{Mz}{Mz \text{ max}} + \frac{Fy}{Fy \text{ max}} + \frac{Fz}{Fz \text{ max}} \leq 1$$

Please order shock absorber and plate separately.

Attention: When using M/146200 cylinders (Ø 40 to 63 mm) an extra top plate must be mounted onto the carriage as the center line of the shock absorbers has to be within the surface of the carriage.

Additional LINTRA PLUS Solutions

Cylinder with Linear Position Sensor

C/146...00/F1

32 mm - 63 mm bore

- » Linear position sensor for continuous sensing of cylinder position
- » Low profile package for easy system integration

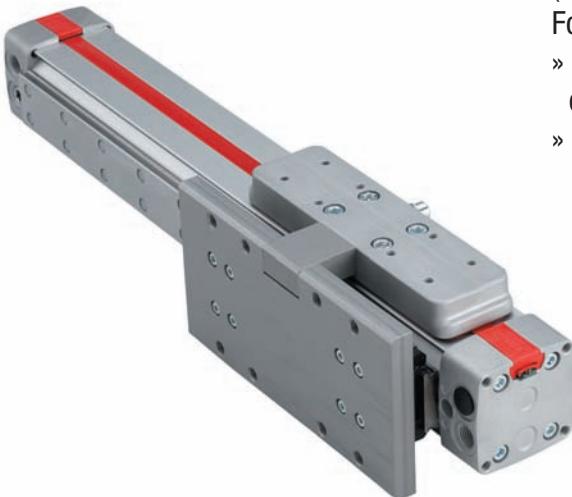

Adjustable Stop Assembly Kit

(with shock absorber option)

For C/146100 and C/146200 (25 mm - 40 mm bore)

- » Flexible assembly kit allows stroke adjustment from either end of the cylinder
- » Integral with option for a shock absorber for impact dampening

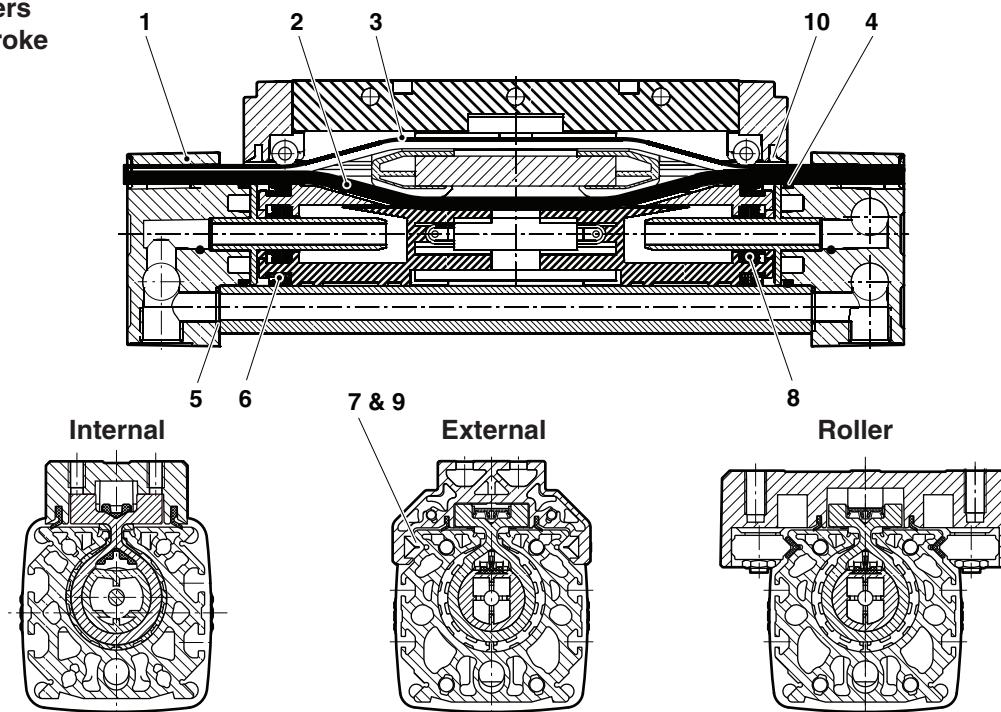

Cylinder with added Caged Ball Linear Motion Guide

For C/146200/PM

25 mm - 63 mm

- » A bolt-on guiding system for greater accuracy and higher loads.
- » Flexible mounting kit allows integration of customer preferred guiding system

LINTRALITE rodless cylinders

A44000

Double acting

Ø 25 ... 40 mm

New compact. space-saving design

Proven sealing system

Integral switch mounting

Buffer or adjustable cushioning

Standard foot mountings

Technical data

Medium:

Compressed air. filtered.
lubricated or non-lubricated

Operation:

Double acting. buffer or
adjustable cushioning. magnetic
or non-magnetic piston

Operating pressure:

15 to 116 psig

Operating temperature:

-22°F to +180°F max.

Consult our Technical Service for
use below +35°F

Strokes:

Made to order
maximum 236 inches

Materials

Barrel: anodised aluminum alloy

End covers: zinc plated
steel/aluminum

Yoke: anodized aluminum alloy

Pistons: plastic

Cover: plastic

Sealing strip: polyurethane

Cover strip: polyamide

Seals: nitrile rubber &
polyurethane

LINTR[®]-Lite rodless cylinders

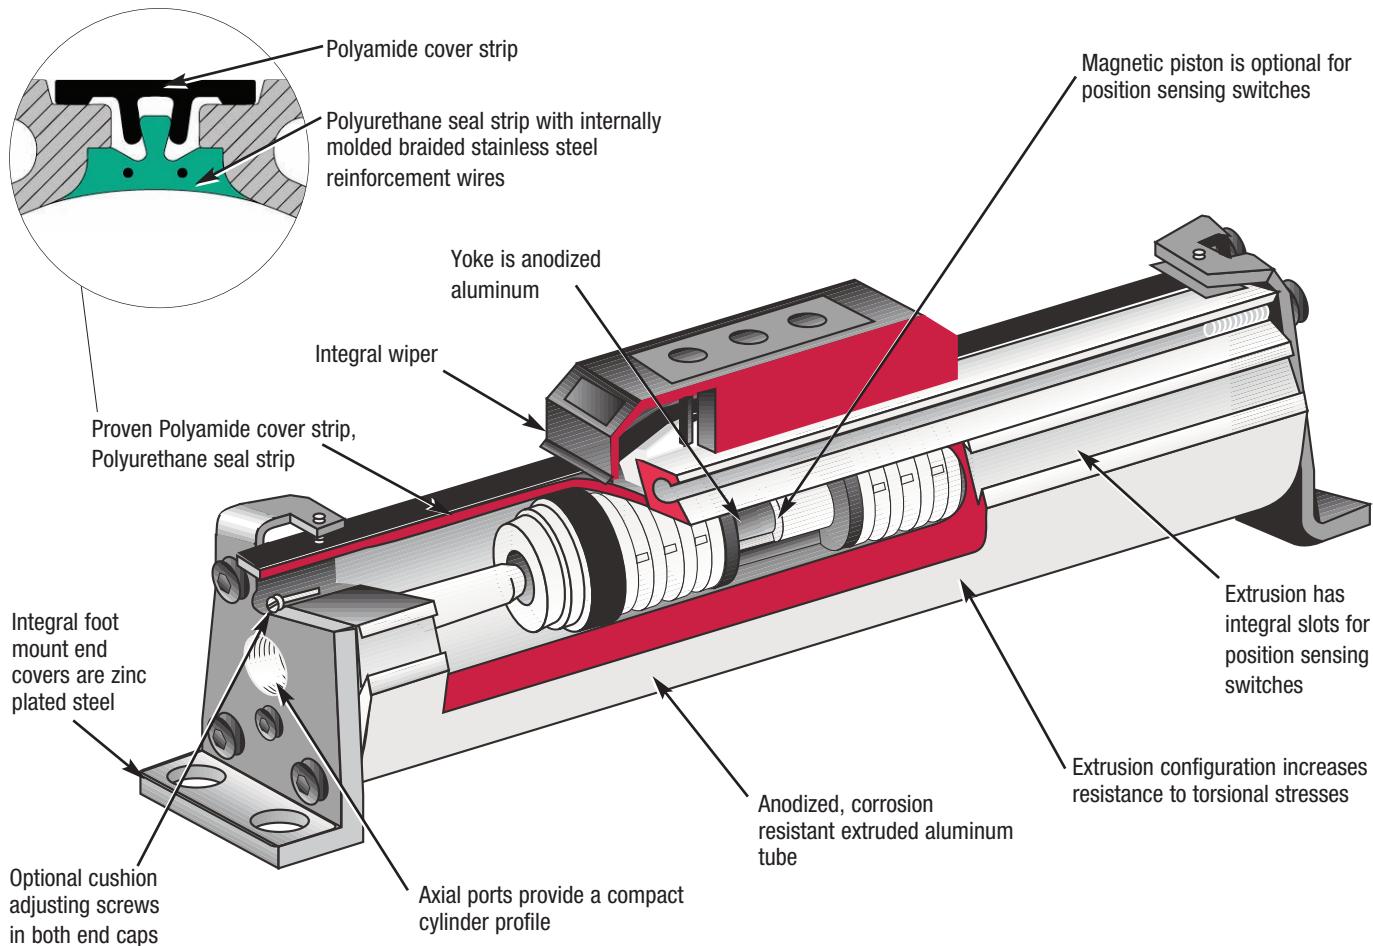

A44000

Double acting

Ø 25 ... 40 mm

Self-retaining Sealing System has one of the lowest leakage rates in the industry.

The LINTRA[®]-LITE rodless cylinder is a cost effective solution for application where light loading is required or where external guiding will be used to support the load.

LINTRALite rodless cylinders

A44000

Double acting

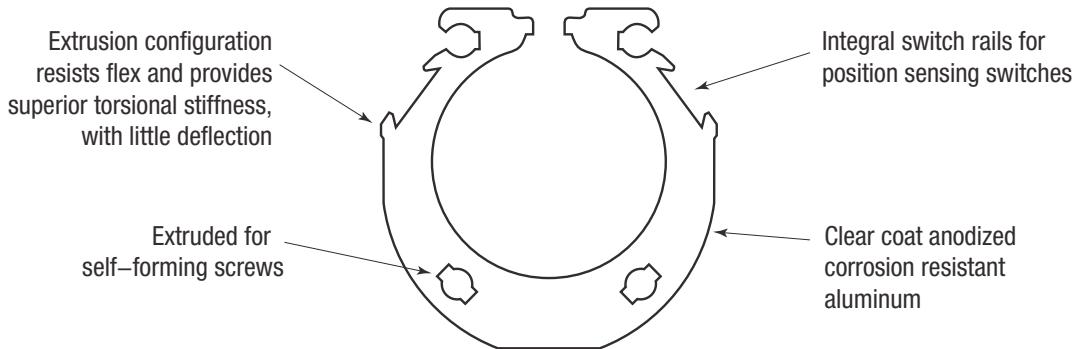

Ø 25 ... 40 mm

Features

- Lintra®-Lite rodless cylinders require less space for installation since the stroke of the cylinder is contained within the length of the cylinder itself.
- Non-rotating load carrying capability without additional guide rods and bearings.
- Rodless design means there is no rod that can buckle or kink.
- Equal forces can be applied to each stroke direction.
- All stroke lengths are custom made to customer requirements.
- Stroke lengths are available up to 236" (6000mm). For longer stroke lengths, consult factory.

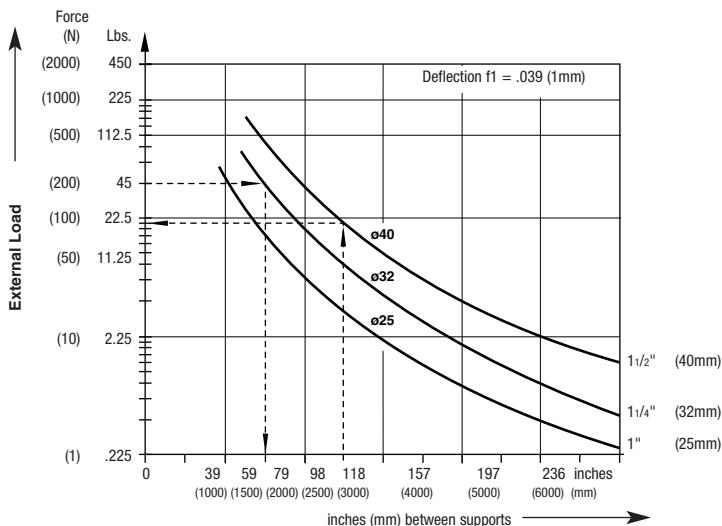

- Lintra®-Lite features a choice of bore sizes:
 Ø 1" = 0.984" (Ø 25mm)
 Ø 1-1/4" = 1.260" (Ø 32mm)
 Ø 1-1/2" = 1.575" (Ø 40mm)
- Cushion adjustment optional at both ends of the cylinder.
- Magnetic piston optional.
- Integral switch rail on both sides of the extrusion.
- Main components are made of anodized, corrosion resistant aluminum, with zinc plated steel integral foot mount end covers.
- Velocities up to 4.9 ft/sec (1.5 m/s) are achievable.
- The Lintra®-Lite is designed for easy maintenance.
- Polyurethane seals provide long life.

The Extruded Tube of the LINTRA™-LITE Series A44000 Cylinder

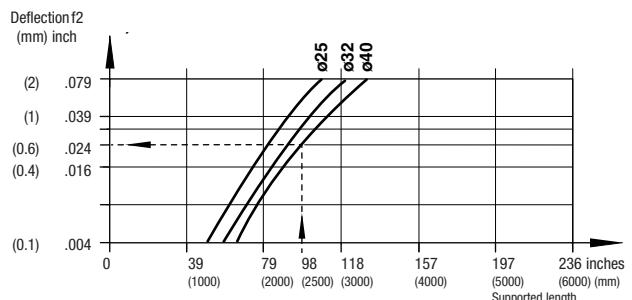

Cylinder Deflection

Deflection due to external load.

Deflection due to cylinder weight.

Cylinder ø 40mm, external force 25 lbs. force (120 N), distance between supports 98 inches (2500mm).

Required: Total deflection

1. Deflection due to external force (f1): See diagram

$$.039"/20.23 \text{ lbs. (1mm/90 N)} \times 25 \text{ lbs. (120 N)}$$

2. Deflection due to cylinder weight (f2): See diagram

$$.024"/98 \text{ inches (2500mm)}$$

Total deflection:

$$\begin{aligned} &.051" \quad (1.3 \text{ mm}) \\ &+.024" \quad (0.6 \text{ mm}) \\ &\hline .075" \quad (1.9 \text{ mm}) \end{aligned}$$

Maximum permitted deflection:

$f_1 + f_2 \leq .039 \text{ inches (1mm) per 39.37 inches (1000mm) stroke. Result: } .075 \text{ inches (1.9mm) are below the maximum permitted deflection of } .098 \text{ inches (2.5mm).}$

Cylinder ø 1-1/4" (32mm), stroke length 138" (3500mm), external load 45 lbs. (200 N). Maximum distance between supports = 59 inches (1500mm) (see diagram). Therefore additional support is required.

Operating Specifications

Operating Temperature:

-22° to 180°F* (-30°C to 80°C)

*With dewpoint of supply air less than ambient air temperature at cylinder, consult our Technical Service for use below +36°F (+2°C)

Operating Pressure:

15 to 116 psig (1 to 8 bar)

Bore Sizes:

Ø 1" = 0.984" (Ø 25mm)

Ø 1-1/4" = 1.260" (Ø 32mm)

Ø 1-1/2" = 1.575" (Ø 40mm)

Stroke Lengths:

236 inches (6000mm) max.

Supply:

Compressed air, filtered to

50-microns and lubricated.

Cushion Lengths:

Ø 1" = 0.709" (Ø 25mm = 18mm)

Ø 1-1/4" = 0.906" (Ø 32mm = 23mm)

Ø 1-1/2" = 1.378" (Ø 40mm = 35mm)

Materials of Construction

Barrel: Anodized aluminum alloy

End covers: Zinc plated steel/aluminum

Yoke: Anodized aluminum alloy

Cover and Pistons: Plastic

Sealing strip: Polyurethane

Cover strip: Polyamide

Seals: Nitrile rubber and polyurethane

Loading values for LINTRA®-LITE cylinders

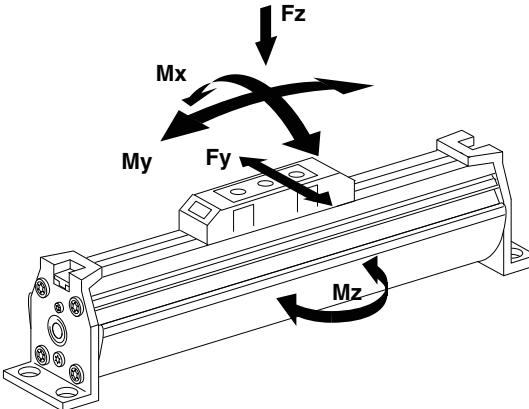

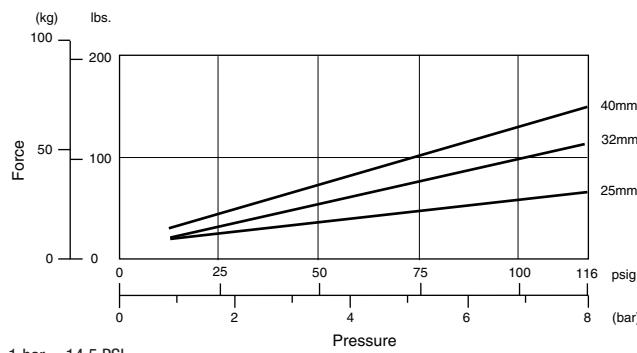

The values given in the table below show the forces in the directions Fy and Fz and the maximum moments Mx, My and Mz. All values are applicable for speeds up to .66 ft/s (0.2 m/s). A requirement for using these values is a smooth movement of the mass over the whole stroke length of the cylinder. The reference point from which the moments for all cylinders should be calculated is the center line of the piston.

Total loads

When a LINTRA®-LITE cylinder has to take several loads and moments, an additional calculation is necessary using the following formula:

$$\frac{M_x}{M_{x \text{ max}}} + \frac{M_y}{M_{y \text{ max}}} + \frac{M_z}{M_{z \text{ max}}} + \frac{F_y}{F_{y \text{ max}}} + \frac{F_z}{F_{z \text{ max}}} \leq 1$$

Thrust – Based on 75% of Theoretical Thrust

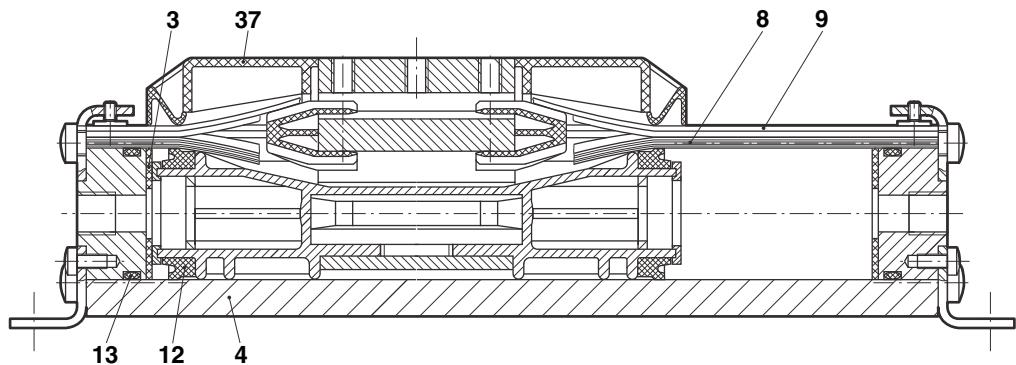

Thrust • Air Consumption • Cushion Length • Loading Values

Cylinder Inch Ø mm	Theoretical forces at 6 bar lbs (N)	Air consumption per stroke at 6 bar cu.ft./in. (l/cm)	Cushion length Inch (mm)	Loading values					
				Fy lbs (N)	Fz lbs (N)	Mx in/lbs (Nm)	My in/lbs (Nm)	Mz in/lbs (Nm)

Roundline Plus Stainless Steel Body Actuators

5/16" to 3" bore

Single and Double acting actuators

Full range of bore sizes

All essential models

Optional Ecology seal

Technical data

Medium:

Filtered, lubricated or non-lubricated, compressed air

Maximum Operating Pressure:

250 psig (17.2 bar)

Temperature Range*:

Standard Nitrile Seals:

-20° to 200°F (-29° to 93°C)

Viton/High temp Seals:

-20° to 400°F (-29° to 205°C)

*With dew point of supply air less than air temperature below 35°F (2°C)

Lubrication:

All Roundline Plus cylinders are pre-lubricated during assembly with a Teflon® based grease for non-lube service and long life.

Materials

Cylinder Body:

304 Stainless Steel

Head and Cap:

Aluminum Alloy

Piston Rod:

Stainless steel in double rod cylinders, and 5/16", 7/16", and 9/16" bores. Chrome plated steel in all other bore sizes

Rod Bearing: Oil Impregnated Sintered Bronze

Piston: Aluminum Alloy or stainless steel

Rod & Piston Seals: Nitrile

Pivot Bracket, Rod Clevis, Foot Bracket, Mounting Nut: Bright Zinc Plated Carbon Steel

2"	4	36
2-1/2"-3"	-	36
†† Consult factory for longer stroke lengths.		

Roundline Plus Stainless Steel Body Actuators

- 1 Oil impregnated sintered bronze Rod Bearing provides exceptional rod support, and optimal cycle life
- 2 Chrome plated carbon steel Piston Rod for strength, smooth operation, and long life (stainless steel Piston Rod on 5/16, 7/16, 9/16 and all Double Rod cylinders)
- 3 Lip-Type nitrile Rod Seal, pressure energized and wear compensating
- 4 Head and Cap are solid aluminum alloy for strength and durability
- 5 Solid aluminum Piston is strong yet lightweight for low inertia
- 6 Lip-type nitrile Piston Seals are wear compensating for long life
- 7 304 stainless steel Cylinder Body with polished I.D. ensures smooth performance and outstanding life cycle

*Note: Single acting cylinders (not shown) use springs manufactured from music wire to provide millions of trouble free cycles.

Ecology Roundline Plus - ERP Model

The ERP model is the cost effective answer to load deceleration and faster through cushion performance.

- 1 IMPACT DAMPENING ECOLOGY PISTON SEALS
 - » Increased load capabilities and cycle rates
 - » Vibration and noise reduction
- 2 PRE-ENGINEERED NON-ADJUSTABLE CUSHION
 - » Tamper resistant
 - » Increased performance

Roundline Ecology Piston Seal Option (ERP)

The Ecology (Impact Dampening) Piston Seal option is available on select inch bore size Roundline cylinders in DAP, DAD, and DAN configurations. This option includes non-adjustable air cushions on both the extend and retract stroke of the cylinder. By including the Ecology Piston Seal option, cylinders can be specified based on weights of load being carried and speed of load. This is shown in the table below.

Energy Absorption Capacity of the Impact Dampening Piston Seal

This chart represents the energy absorption capacity of the Impact Dampening piston seals with standard Non-Adjustable air cushions. The values given are usable pounds stoppable at stated piston speeds.

In/Sec	Cylinder Bore					
	3/4	1-1/16	1-1/4	1-1/2	2	2-1/2
6	36.6	62.3	74.5	115.5	258.9	421.1
12	5.6	15.6	18.6	28.9	64.7	105.3
18	2.5	6.9	8.3	12.8	28.8	46.8
24	1.4	3.9	4.7	7.2	16.2	26.3
30	0.9	2.5	3.0	4.6	10.4	16.8
36	0.6	1.7	2.1	3.2	7.2	11.7
42	0.5	1.3	1.5	2.4	5.3	8.6
48	0.3	1.0	1.2	1.8	4.0	6.6
54	0.3	0.8	0.9	1.4	3.2	5.2
60	0.2	0.6	0.7	1.2	2.6	4.2

PSI	Effect of Impact Dampering Seals on Total Stroke of Cylinders					
	3/4	1-1/16	1-1/4	1-1/2	2	2-1/2
0	.11	.12	.12	.14	.15	.17
20	.08	.09	.09	.10	.10	.12
40	.05	.06	.06	.07	.07	.08
60	.03	.04	.04	.04	.04	.05
80	.01	.02	.02	.02	.02	.02
100	0	0	0	0	0	0

The figure above represents total stroke loss (both ends) for the pressure indicated for new cylinders. The impact dampening seals will take some compression set during operation of the cylinder and the stroke loss will decrease. To determine stroke loss for either head or cap divide the value shown by 2.

Roundline Plus Stainless Steel Body Actuators

Dimensions in inches

Force Factor Data

Bore	Code	Force Factor (Area)	
		Extend	Retract
5/16"	(031)	0.077	0.064
7/16"	(043)	0.15	0.12
9/16"	(056)	0.25	0.22
3/4"	(075)	0.44	0.39
7/8"	(087)	0.6	0.55
1-1/16"	(106)	0.89	0.81
1-1/4"	(125)	1.23	1.08
1-1/2"	(150)	1.77	1.62
1-3/4"	(175)	2.41	2.21
2"	(200)	3.14	2.84
2-1/2"	(250)	4.91	4.61
3"	(300)	7.07	6.63

Force Output Formula

Cylinder Output Force = Force Factor (area) x Air Line Pressure (psi)

Ex: 1-1/16 bore cylinder operating at 80 psi:

Force exerted on the extend: $0.89 \times 80 = 71.2$ lbs.

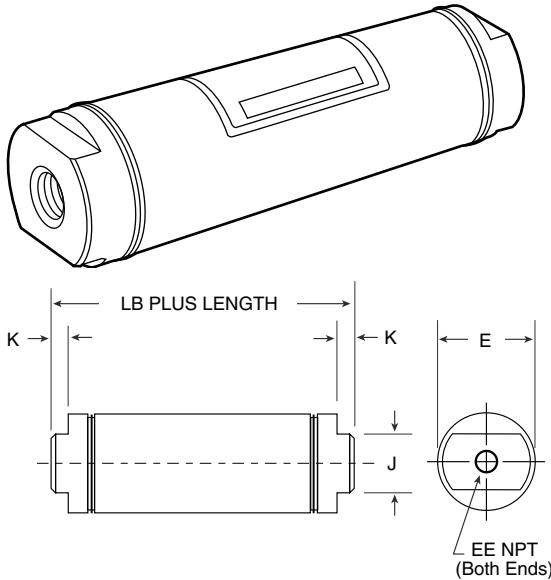

Force exerted on the retract: $0.81 \times 80 = 55.2$ lbs.

Approximate Spring Forces (lbs.)

Bore	Code	Relaxed (lbs)	Compressed (lbs)
5/16"	(031)	0.5	1
7/16"	(043)	1	2
9/16"	(056)	2	4
3/4"	(075)	3	6
7/8"	(087)	3	6
1-1/16"	(106)	3	6
1-1/4"	(125)	7.5	15
1-1/2"	(150)	7	14
1-3/4"	(175)	11	24
2"	(200)	15	30

Air Reservoir

Air Reservoirs are made of the same high-quality stainless steel as the Series RP Cylinders.

Dimensions — All Dimensions in Inches

Bore	E	EE	J	K	LB	Standard Internal Lengths
3/4"	0.813	1/8"	0.625	0.187	1.938	1" increments thru 4"
1-1/16"	1.125	1/8"	0.875	0.187	2.375	1" increments thru 8"
1-1/2"	1.562	1/8"	0.875	0.250	2.250	1" increments thru 16"
2"	2.080	1/4"	1.250	0.312	2.875	1" increments thru 16"
2-1/2"	2.610	1/4"	1.750	0.312	2.875	1" increments thru 24"

How to Order

Example:

1-1/16" bore air reservoir with a 3" internal length would be ordered as follows: AR-1-1/16 x 3

Roundline Plus Stainless Steel Body Actuators

CH,CC,CB - Adjustable Cushions

Available only on DAN, DAP, and DAD models.

Available on bore sizes: 3/4", 1-1/16", 1-1/2", 2", 2-1/2", 3"

Position #4 standard

UB - Bumpers

- Standard on 5/16", 7/18", 1-1/4", and 1-3/4" bore sizes.
- The UB option will increase the overall length on all other bore sizes (see chart for length changes).
- Single acting models will have one bumper on the piston side opposite the spring.
- Bumpers are not included or available on ERP Ecology Seal models.
- When the HT high temperature option is ordered on these bore sizes, the bumpers are omitted and may change the overall length of the cylinder (except 5/16" bore, bumpers are not omitted).
- See "HT" Option below for further explanation of HT and UB in combination.

Bore	Increase in cylinder length due to the UB option			
	Single Acting	Reverse Acting	Double Acting	Double Rod End
5/16"	Std	Std	Std	Std
7/16"	0.062	0.125	0.188	0.25
9/16"	0.062	0.062	0.125	0.125
3/4"	0.125	0.125	0	0
7/8"	Std	Std	Std	Std
1-1/16"	0.125	0.125	0.125	0.5*
1-1/4"	Std	Std	Std	Std
1-1/2"	0.125	0.125	0.125	0.125
1-3/4"	Std	Std	Std	Std
2"	0.125	0.125	0.250	0.250
2-1/2"	0.125	0.125	0.250	0.250
3"	0.125	0.125	0.250	0.250

* When the UB and PS options are in combination on an 1-1/16" bore, double rod end, only the bumper length should be added. All other models and bore sizes should add the UB length and the PS length together.

HT - High Temperature Seals (Viton)

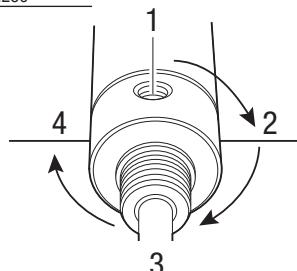

- For service up to 400°F
- Not available with RW rod wiper option.
- When ordered with the UB bumper option, bumpers will also be rated to 400°F.
- For cylinders where bumpers are standard, opting for HT will omit the bumpers and may decrease the overall length of the cylinder (except 5/16" bore). See chart below for length changes.
- For cylinders where bumpers are standard, if high temp bumpers are required, reference both HT and UB in the model number. This will provide high temp seals and bumpers and not change the overall length of the cylinder (except 5/16" bore).
- On the 5/16" bore, bumpers are always standard, and never omitted.

Additionally, high temperature bumpers are not available on this bore size. As a result, with the HT option, the 5/16" bore cylinder is rated to 200°F.

Bore	Decrease in Overall length due to HT option (in.)			
	Single Acting	Reverse Acting	Double Acting	Double Rod End
5/16"	0.000	0.000	0.000	0.000
7/8"	0.090	0.125	0.220	0.250
1-1/4"	0.125	0.125	0.190	0.250
1-3/4"	0.125	0.125	0.250	0.250

PL() - Alternate Port Location

Designate location on head and cap respectively. For example: L(12) = Head port location 1, and Cap port location 2.

PC - Side ported end cap (DAN and SAN models only)

Port will be on the side of the end cap and in line with the head end port. Overall length of the cylinder will increase.

Change in overall length due to the PC option.

Bore	Length Increase
5/16"	0.2
7/16"	0.19
9/16"	0.03
3/4"	0.44
7/8"	0.28
1-1/16"	0.25
1-1/4"	0.31
1-1/2"	0.19
1-3/4"	0.56
2"	0.38
2-1/2"	0.38
3"	0.44

PS - Magnetic Piston

A magnet on the piston may increase the length of the cylinder. See chart below for length adders.

Bore	Increase in cylinder length with the PS option		
	Single & Reverse Acting	Double Acting	Double Rod End
5/16"	0.150	0.150	N/A
7/16"	0.200	0.250	0.250
9/16"	0.125	0	0
3/4"	0.125	0	0
7/8"	0.125	0.125	0.125
1-1/16"	0.125	0	0.125**
1-1/4"	0.125	0	0
1-1/2"	0.125	0	0
1-3/4"	0.125	0	0
2"	0.125	0	0
2-1/2"	-	0	0
3"	-	0	0

* When the UB and PS options are in combination on an 1-1/16" bore, double rod end, only the bumper length should be added. All other models and bore sizes should add the UB length and the PS length together.

** Ecology piston seal adds .375" to the overall length when combined with PS option on the 1-1/16" bore DRD model only.

Rail shown at position M2

M1,M2,M3,M4 - Switch rail mounted and position

Switch rail will be mounted in position #1 for M1 option, Position #2 for M2 option, etc. Must also reference the PS option in the cylinder model number to receive a magnet on the piston.

A band style switch bracket can be ordered as a separate item instead of the switch rail. See switch section for band style bracket information. Switches ordered as separate items.

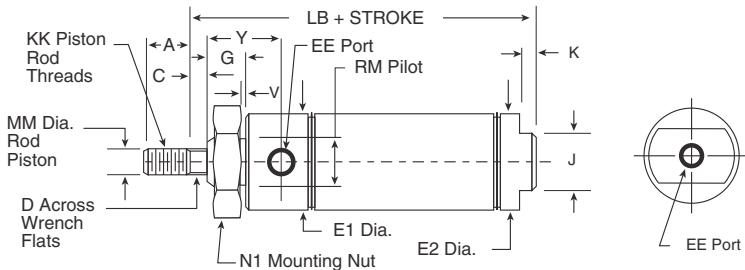

FT() - Female thread

Specify thread type in parentheses. Female rod thread available on 1-3/4", 2", 2-1/2", 3" bores.

RPHD Series Magnetic Roundline Plus Stainless Steel Body Cylinders

Double acting

9/16" - 2-1/2" bores

Technical Data

Medium:

Filtered, lubricated or non-lubricated, compressed air

Maximum Operating Pressure:

250 psig (17.2 bar)

Temperature Range*:

Standard nitrile seals:

-20°F to 200°F (-29°C to 93°C)

Viton / High temp seals:

-20°F to 400°F (-29°C to 205°C)

* With dew point of supply air less than air temperature below 36°F (2°C).

Lubrication:

All RPHD cylinders are pre-lubricated during assembly with a Teflon® based grease for non-lube service and long life.

Materials:

Cylinder Body:

304 Stainless Steel

Head and Cap:

Aluminum alloy

Piston Rods:

300 series, chrome plated stainless steel

Rod Bearings:

Oil impregnated sintered bronze

Piston:

Aluminum Alloy or stainless steel

Rod & Piston Seals: Nitrile

Pivot bracket, rod clevis, foot bracket, mounting nut:

Bright zinc plated carbon steel

Options selector

RPHD 106 x 3.250 - DAN - M2

Series	Substitute
RPHD Series	RPHD

Bore	Substitute
9/16"	056
3/4"	075
1-1/16"	106
1-1/4"	125
1-1/2"	150
1-3/4"	175
2"	200
2-1/2"	250

Stroke
Increments of 1/16" up to 36"

Options	Substitute
Viton / High Temp seals	HT*
Switch rail and position	M1, M2, M3, M4
Side Ported end cap (DAN mount only)	PC
Alternate port location	PL()
Plain rod end	PR**
Rod extension over std. (specify additional length)	RX()
Thread extension over std. (specify additional length)	TX()
Bumpers both ends	UB*

*Viton seals and Bumpers are available in combination; however, the temperature rating of the cylinder is limited to the maximum temperature rating of the bumpers.

Note: The magnetic field could be compromised with temperatures in excess of 200°F.

** PR Rod end will not have threads, but will maintain the standard "A" dimension.

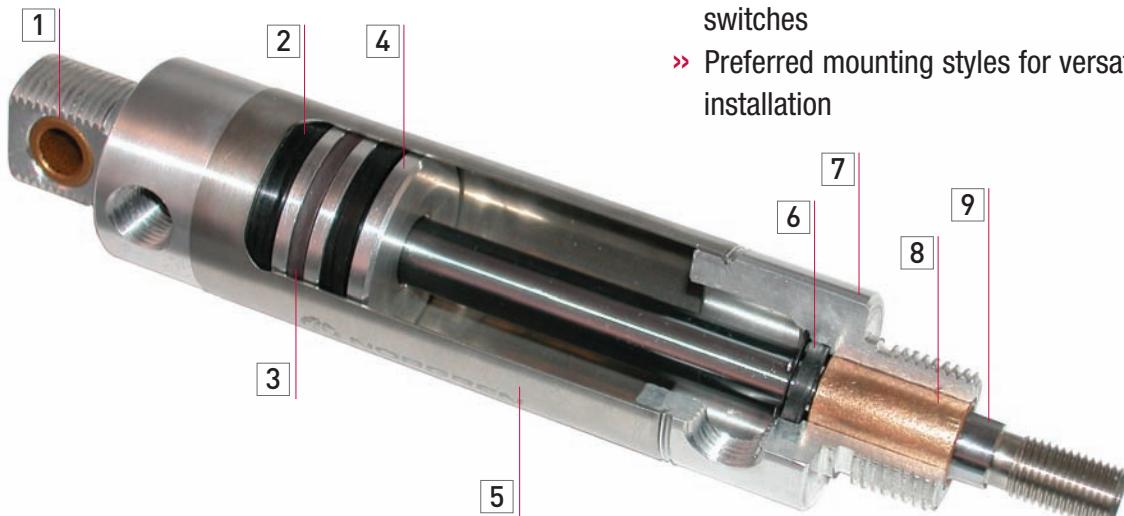

Mounting Options (All models are double acting)	Substitute
Nose	DAN
Double End (with pivot bushing)	DAD
Double Rod End	DRD

RPHD Series Magnetic Roundline Plus Stainless Steel Body Cylinders

The RPHD Series cylinders provide:

- » Roundline Plus cylinder features and construction
- » More robust mounting threads

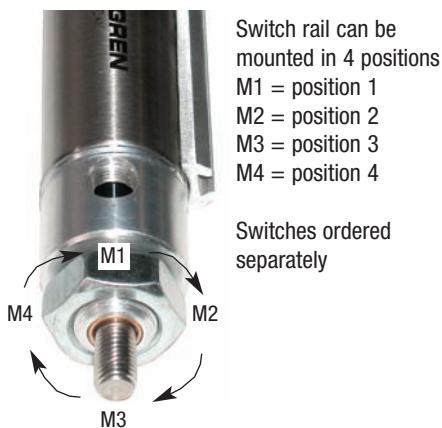

- » Larger rod diameters
- » Longer rod bearing for long life
- » A magnet for position sensing with external reed switches
- » Preferred mounting styles for versatility and ease of installation

- 1 Pivot Bushing** (DAD model): Sintered bronze pivot bushing
- 2 Piston Seals**: Lip-Type nitrile piston seals are wear compensating for long life.
- 3 Magnetic Band**: On piston for position sensing with external switches.
- 4 Piston**: Solid aluminum piston is strong, yet lightweight for low inertia. Stainless steel in double rod models.
- 5 Cylinder Tube**: 304 Stainless steel cylinder body ensures smooth performance and outstanding life cycle.
- 6 Rod Seal**: Lip-Type nitrile, pressure energized and wear compensating.
- 7 Head and Cap**: Solid aluminum alloy for strength and durability.
- 8 Bearing**: Oil impregnated, sintered bronze provides exceptional rod support, and optimal cycle life.
- 9 Piston Rod**: Chrome plated 300 series stainless steel for smooth operation and corrosion resistance.

Options

Switch Rail Mounting Position

Option PC - Side Ported End Cap

Cap end port will be on the side of the end cap and in line with the head end port. Overall length of the cylinder will increase with this option. See dimensional tables for overall length information.

Option PL()

Alternate Port Location
Designate location on head and cap respectively. For Example:
L(12) = Head port location #1, and cap port location #2.

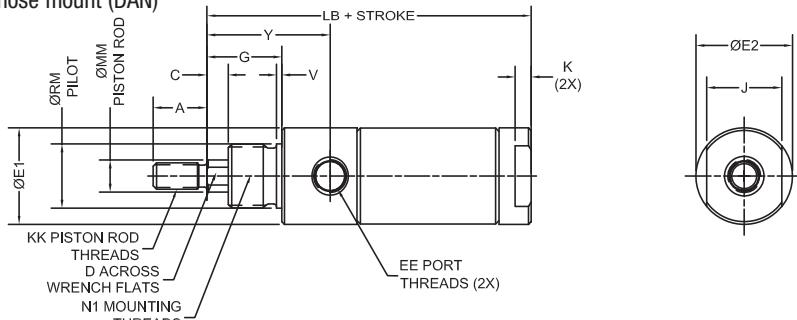

Option UB -

Bumpers both ends
NOTE: Bumpers will increase the overall length of the cylinder. See chart for length adders.

RPD Series Delrin® End Cap

Roundline Plus Stainless Steel Body Actuators

9/16" to 2" bore

Double acting pneumatic actuators

Delrin Acetal Resin end cap cylinders for washdown, and corrosive environment application

Technical data

Medium:

Filtered, lubricated or non-lubricated, compressed air

Maximum Operating Pressure:

125 psig (8.6 bar)

Temperature Range:

Standard Nitrile Seals:

32° to 160°F (0°C to 72°C)

Lubrication:

All RPD cylinders are pre-lubricated during assembly with a Teflon® based grease for non-lube service and long life.

Materials

Cylinder Body:

304 Series stainless steel

Head and Cap:

Delrin Acetal Resin

Piston Rod:

300 Series chrome plated stainless steel

Piston: Anodized aluminum alloy or stainless steel

Rod & Piston Seals: Nitrile

Mounting Accessories: 300 Series stainless steel

RPD Series Delrin[®] End Cap

RPD Series Delrin[®] End Cap Roundline Plus Stainless Steel Body Actuators

The Norgren RPD Series Cylinder utilizes a stainless steel body, a stainless steel rod, and Delrin[®] (acetal resin) end caps for corrosion resistance. This cylinder is designed to endure a variety of environmental conditions. The RPD Series construction provides resistance to moisture, various solvents, and many other neutral chemicals. The Norgren RPD Series is ideal in corrosive environment applications.

Additionally, the Norgren RPD Series Cylinder is the only Delrin[®] end cap cylinder in the industry to offer the patented impact dampening Ecology Seal Technology. The Ecology Seal option, used in conjunction with a fixed cushion, eliminates the bacteria-collecting cushion screw orifice found in competing adjustable cushion model cylinders.

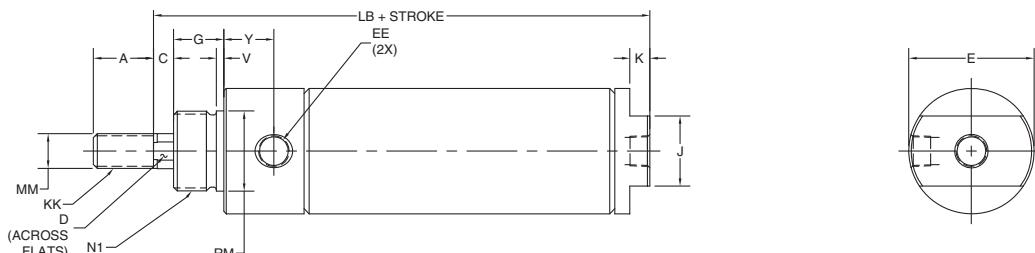

- 1** Head and Cap: Delrin[®] (acetal resin)
- 2** Piston Rod: Chrome plated stainless steel
- 3** Tube: Stainless steel
- 4** Piston: Anodized aluminum (stainless steel on 9/16" bore DRD model)
- 5** Piston Seals: Nitrile (Viton[®] optional)
- 6** Optional magnet on piston for position sensing

Delrin[®] is a registered trademark of E.I. Du Pont de Nemours and Company for its brand of acetal resin.
For detailed technical specifications on the properties of Delrin[®], please contact DuPont (www.dupont.com).

RT Series Roundline Plus Thrusters

9/16" to 3" bore

Composite and Roller Bearings

PS magnetic piston option

Optional ecology seal

Optional shock absorbers

Choice of high load composite or precision low friction bearings

Comes with stroke adjusting collars

Technical data

Medium:

Filtered, lubricated or non-lubricated, compressed air

Operating Pressure

250 psig (17.2 Bar) Max.

Temperature Range:

Standard Nitrile seals:

-20°F to 200°F (-29°C to 93°C)

*With dew point of supply air less than air temperature below 35°F (2°C)

Lubrication:

All Roundline Thruster cylinders are prelubricated at the time of assembly with a Teflon®-Based grease, for non-lube service and long life.

Thruster Materials:

Guide shafts with **composite bearings**:

9/16" to 2.0" bore: Chrome plated 303 SS.

2-1/2" to 3.0": Chrome plated carbon steel.

Guide shafts with **roller bearings**:

All bore sizes case hardened carbon steel shafts.

Body: Anodized aluminum housing and tooling plate. Choice of composite or roller bearing shaft guides.

Cylinder Materials:

304 Stainless Steel body

Aluminum alloy head, cap and piston

Oil impregnated sintered bronze rod bearing

Chrome Plated stainless steel piston rod.

Nitrile piston and rod seals

RT Series Roundline Plus Thrusters

Features

- » PS Magnetic piston option for position sensing with either Reed or Hall Effect switches.
- » Optional ecology seal with non-adjustable cushion for the optimum in smooth, noise dampening deceleration of load at end of stroke.
- » Shock absorbers optional to decelerate heavier loads or high speed applications

- » Choice of high load composite or precision low friction bearings.
- » A set of stroke adjusting collars come standard on the extend stroke of the roller bearing thruster.

This product is for demonstration purposes only.

Force Factor Data

		Force Factor (Area)	
Bore	Code	Extend	Retract
9/16"	056	0.25	0.2
3/4"	075	0.44	0.36
1-1/16"	106	0.89	0.69
1-1/2"	150	1.77	1.46
2.0"	200	3.14	2.70
2-1/2"	250	4.91	4.47
3.0"	300	7.07	6.47

Force Output Formula

Cylinder Output Force =

Force Factor(area) x Air Line Pressure

Example: 1 1/16" Bore operating at 80psi

Extend Force = .89 x 80 = 71.2lbs

Retract Force = .69 x 80= 55.2 lbs

F-Series Plus Cylinders

Single and Double acting

9/16" to 4" bore

Technical Data:

Medium:

Filtered, lubricated or non-lubricated, compressed air

Operating Pressure

200 psig (13.6 Bar) Max.

Temperature Range:

Standard Nitrile seals:

-40°F to 200°F (-40°C to 93°C)

150°F max. with Bumper

Option

High Temp seals:

-20°F to 400°F (-29°C to 205°C)

*With dew point of supply air less than air temperature below 35°F (2°C).

Lubrication:

All F-Series Plus cylinders are prelubricated at the time of assembly with a Teflon® based grease, for non-lube service and long life.

Side Loading:

Cylinders are specifically designed to push and pull. Side loading and misalignment of the piston rod should be avoided to ensure maximum operating performance and life.

Materials:

Cylinder Body:

304 Stainless Steel

Head and Cap:

Clear Anodized Aluminum Alloy

Piston Rod:

303 Stainless Steel

Rod Bearing:

Oil Impregnated Bronze

Piston:

Aluminum Alloy

Rod & Piston seals:

Buna-N

4"	400

Stroke

Increments of 1/8"

Mounting Options Substitute

*Screw Clearance Holes Front	SCF
*Screw Clearance Holes Rear	SCR
*Screw Clearance Holes Both ends	SCB
Basic Model (std. c'bored mtg. holes)	BAM
**Front Trunnion	TMF
**Rear Trunnion	TMR
**Trunnion both ends	TMB
Pivot Mount	PTM
Threaded mounting holes Front	THF
Threaded mounting holes Rear	THC
Threaded mounting holes Both ends	THB
***Nose Mount	NMT

* Screw clearance to allow bolt head to pass through - no counter bores

** Not available on 9/16" bore

*** Available in FP, FPC, and FPR. Includes a heavy duty end cap and rod wiper.

Options	Substitute
Bumper both ends (not avail. with HT) ¹	UB
Bumper Head (not avail. with HT) ¹	UH
Bumper Cap (not avail. with HT) ¹	UC
Non-Standard Female Thread*	FT()
Heavy Duty Rear End Cap ²	HD
Alternate Port Location	PL()
Low Friction Seals ²	LF
Magnetic Piston ²	PS
Switch Rail and Position (switches ordered separately) M1,M2, M3,M4	
No Rod Thread	PR
Non-Standard Male Thread	TM()
Thread Extension over standard (specify additional length) ³	TX()
Rod Extension over standard (specify additional length) ³	RX()
Stainless Steel Fasteners (125 PSI Max)	SF
High Temperature Seals ⁴	*HT
Rod Wiper	RW

¹ Stroke is reduced by .03" per bumper.
Bumpers are rated to 150°F

² Overall length of cylinder may increase with this option.

³ Consult factory for negative thread or rod extensions.

⁴ Not available in single or reverse acting models.

* Not available in 9/16" bore.

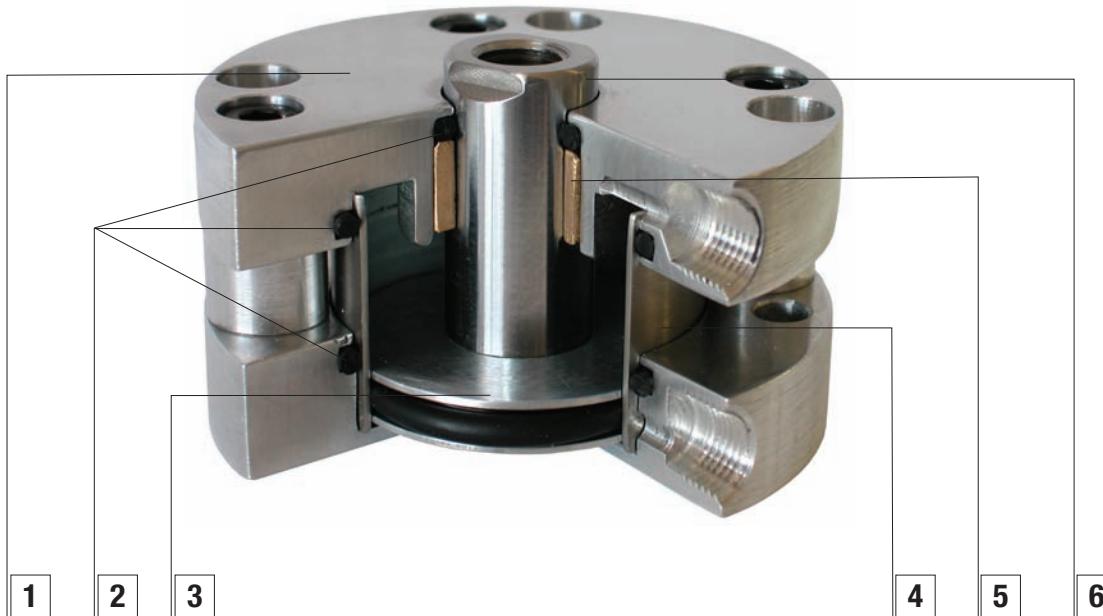

F-Series Plus Cylinders

Single and Double acting

9/16" to 4" bore

Quality and durability in a compact, high performance cylinder!

The **Norgren F-Series Plus** offers a compact design using the highest quality components for dependable service and long life. All components of the F-Series Plus cylinder have been specifically selected to provide optimum reliability and performance.

1 Head/Cap:
Aluminum alloy, clear anodized for corrosion resistance.

2 Seals:
Buna N, o-ring seals throughout

3 Piston:
Aluminum alloy piston is lightweight, yet strong
with excellent wear characteristics.

4 Tube:
304 Stainless steel tube, polished and buffed I.D.

5 Rod Bearing:
Oil impregnated, bronze bearing, for long cylinder life
and non-lube service.

6 Piston Rod:
303 Stainless steel, chrome plated for smooth finish
and long seal life.

F-Series Plus Cylinders

Single and Double acting

9/16" to 4" bore

Force Factor Data

Bore	Code	Force Factor (Area)	
		Extend	Retract
9/16"	(056)	0.25	0.20
3/4"	(075)	0.44	0.36
1-1/16"	(106)	0.89	0.69
1-1/2"	(150)	1.77	1.46
2"	(200)	3.14	2.70
2-1/2"	(250)	4.91	4.47
3"	(300)	7.07	6.47
4"	(400)	12.56	11.77

Force Output Formula

Cylinder Output Force = Force Factor (area) x Air Line Pressure (psi)

Ex: 1-1/16 bore cylinder operating at 80 psi:

Force exerted on the extend: 0.89 x 80 = 71.2 lbs.

Force exerted on the retract: 0.69 x 80 = 55.2 lbs.

Approximate Cylinder Weights (lbs.)

FPT Series F-Plus Twin Rod Non-Rotating Cylinders

3/4" - 2" bores

Technical Data

Medium:

Filtered, lubricated or non-lubricated, compressed air

Maximum Operating Pressure:

200 psig (13.6 bar)

Temperature Range*:

Standard nitrile seals:

-40°F to 200°F (-40°C to 93°C)

Viton / High temp seals:

-20°F to 400°F (-29°C to 205°C)

* With dew point of supply air less than air temperature below 36°F (2°C).

Lubrication:

All FPT cylinders are pre-lubricated during assembly with a Teflon® based grease for non-lube service and long life.

Materials:

Cylinder Body:

304 Stainless Steel

Head and Cap:

Clear anodized aluminum

Tooling Plate:

Clear anodized aluminum

Piston Rods:

303 stainless steel

Rod Bearings:

Oil impregnated sintered bronze

Piston:

Aluminum Alloy

Rod & Piston Seals:

Nitrile

Options selector

FPT 106 x 1.750 - BAM - PS

Series	Substitute
FPT F-Plus Twin Rod Cylinder	FPT

Bore	Substitute
3/4"	075
1-1/16"	106
1-1/2"	150
2"	200

Stroke	Substitute
Increments of 1/16"	

Options	Substitute
Counterbored Tool Plate	CTP
Viton / High Temp seals	HT
Switch rail and position	M1, M2, M3, M4
Magnetic Piston*	PS
Alternate port location	PL()
Rotated Pivot Mount	RM
(Pivot mount rotated 90° from standard)	
Rotated Tooling Plate	RT
(Tooling plate and rod axis will be vertical with respect to the ports)	
Rod extension over std.	RX()
(Specify additional length)	
Stainless Steel Fasteners	SF
(125 psi max)	

*Magnetic option used in combination with viton (HT) option is not reliable above 200°F. Overall cylinder length increases with magnetic option (see dimensional tables).

Mounting Options	Substitute
Basic Mount	BAM
*Screw Clearance Holes Front	SCF
*Screw Clearance Holes Rear	SCR
*Screw Clearance Holes Both	SCB
Front Trunnion	TMF
Rear Trunnion	TMR
Trunnion Both Ends	TMB
Pivot Mount	PTM
Threaded Mounting Holes Front	THF
Threaded Mounting Holes Rear	THC
Threaded Mounting Holes Both Ends	THB

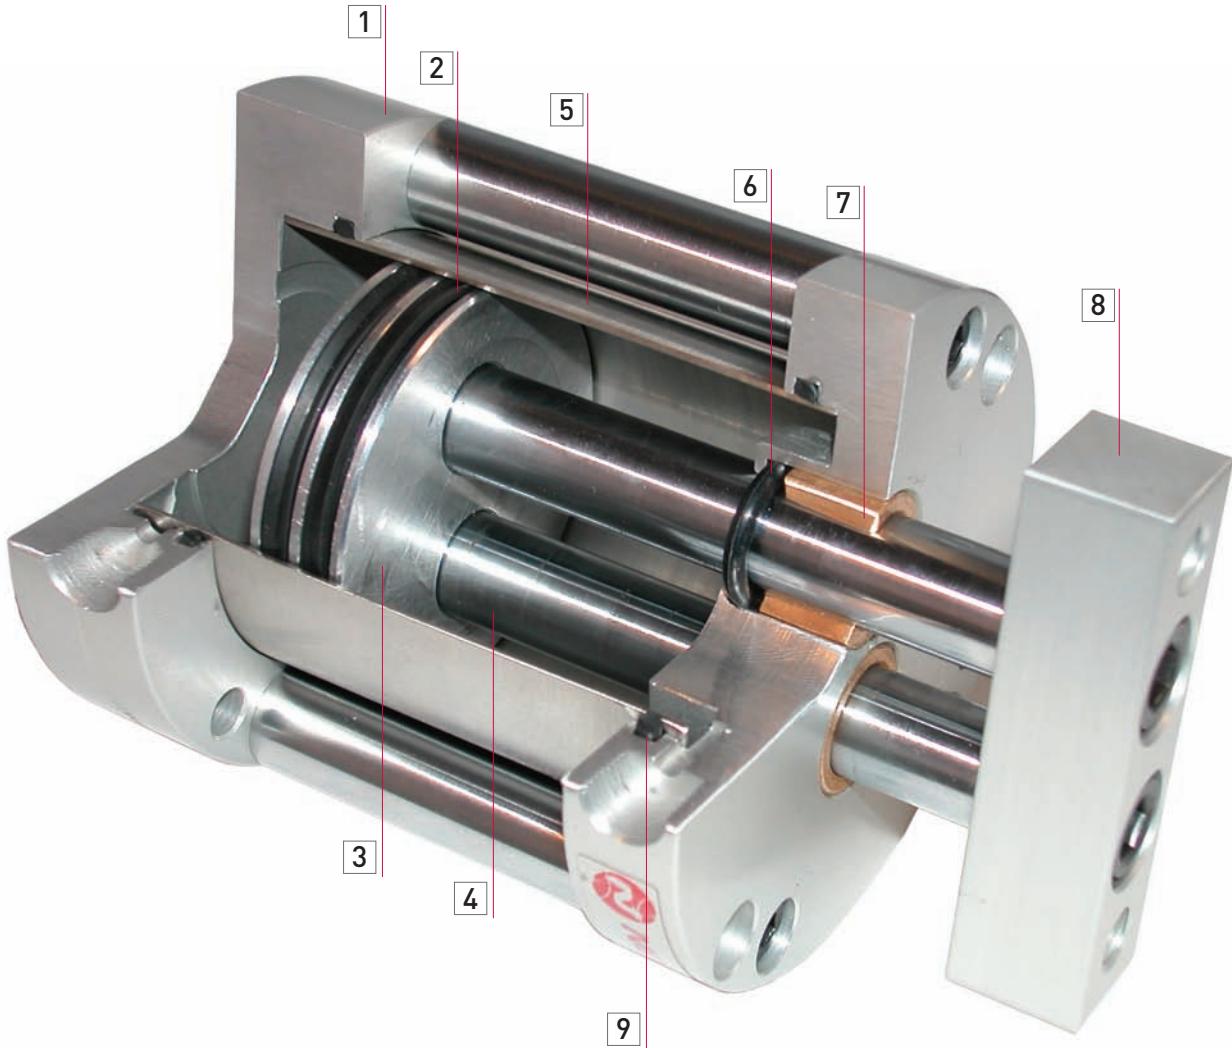

* Screw clearance to allow bolt head to pass through - no counter bores

FPT Twin Rod

Single and Double acting
9/16" to 4" bore

The Norgren FPT Series twin rod cylinder features a dual rod, compact design for non-rotating, space saving results. The two piston rods are connected externally by an aluminum tooling plate, providing rod support and mounting flexibility.

- 1 Head/Cap:** Head and Cap aluminum alloy, clear anodized for corrosion resistance.
- 2 Piston Seals:** Lip-Type nitrile piston seals are wear compensating for long life.
- 3 Piston:** Solid Aluminum piston is strong, yet lightweight for low inertia.
- 4 Piston Rods:** Chrome plated 303 series Stainless Steel piston rods for smooth operation and corrosion resistance.
- 5 Tube:** 304 Stainless steel cylinder body, for corrosion resistance
- 6 Rod Seal:** Lip-Type nitrile rod seal, pressure energized and wear compensating.
- 7 Rod Bearings:** Oil impregnated, sintered bronze rod bearings provide exceptional rod support, and optimal cycle life.
- 8 Tooling plate:** Clear anodized aluminum
- 9 Tube Seals:** Nitrile, o-ring tube seals

Series 91000 Compact Actuators

DC/91000/M, DC/93000/M

Single acting

Ø 12 ... 63 mm

Low friction, long life seal design

Fully non-corrodible specification

Corrosion resistant specification

Non-lube operation

Optional non-rotating piston rod

Standard magnetic piston for full control system versatility

Technical data

Medium:

Compressed air, filtered, lubricated or non-lubricated

Operation:

DC/91000/M Single acting, non-cushioned, magnetic piston spring return

DC/93000/M Single acting, non-cushioned, magnetic piston spring extend

Operating pressure:

14.5 to 145 psi (1 to 10 bar)

Operating temperature:

23°F* to 176°F (-5°C to +80°C)

Consult our Technical Service for use below 35°F (+2°C)

Materials

Barrel & end caps: anodized aluminum alloy

Piston rod: stainless steel
(Ø 12 to 40 mm Austenitic,
Ø 50 and 63 mm Martensitic)

Seals: polyurethane and/or nitrile rubber

Dimensions in inch (mm)

Series 92000 Compact Actuators

DC/92000/M

Double acting

Ø 12 ... 100 mm

Low friction, long life seal design

Non-lube operation

Optional non-rotating or guided piston rod

Standard magnetic piston for full control system versatility

Technical data

Medium:

Compressed air, filtered, lubricated or non-lubricated

Operation:

Double acting, magnetic piston

Operating pressure:

14.5 to 145 psi (1 to 10 bar)

Operating temperature:

23°F* to 176°F (-5°C to +80°C)

Consult our Technical Service for use below
35°F (+2°C)

Materials

Barrel & end caps: anodized aluminum alloy

Piston rod: stainless steel
(Ø 12 to 40 mm Austenitic,
Ø 50 to 100 mm Martensitic)

Seals: polyurethane and/or nitrile rubber

Magnetically Operated Switches

Magnetically operated, non-contact sensing system

Consists of a magnet on the piston, and a sensing switch mounted to the cylinder tube

Switch types:

Reed switch

Solid State -

NPN

PNP

Switch series:

CS7

CS8

CS8-2

CS9D

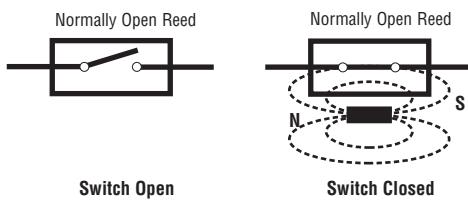

CD9-04

M/50

Reed Switch Working Principle

Reed switch sensors contain hermetically sealed reed elements (mechanical contacts) which are open in their normal state. When a magnetic field moves within proximity of the switch, magnetism is induced into the leads and forces the contacts to close.

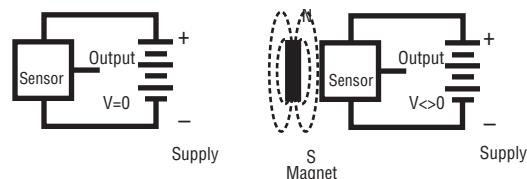

Application Recommendations and Precautions

To provide maximum reliability.

1. Always stay within the specifications and power rating limitations of the unit installed.
2. Primary and control circuit wiring should not be mixed in the same conduit. Motors will produce high pulses that will be introduced into the control wiring if the wiring is carried in the same conduit.
3. Never connect the switch without a load present. The switch will be destroyed.
4. Some electrical loads may be capacitive. Capacitive loading may occur due to distributed capacity in cable runs over 25 feet. Use switch Model CS7-24 whenever capacitive loading may occur.

Solid State/Magnetoresistive Working Principle

The solid state (no moving parts) magnetoresistive sensor responds to a parallel magnetic pole by providing a digital signal to the output control circuit. This technique enables the sensing of weak magnetic fields, with no limit to the maximum strength of the magnetic field. Norgren solid state switches are similar to the Hall effect switch.

In order to obtain optimum performance and long life, magnetically operated limit switches should not be subjected to:

- (1) strong magnetic fields,
- (2) extreme temperature, and (3) excessive ferrous filing or chip buildup.

Improper wiring may damage or destroy the switch. The wiring diagram, along with the listed power ratings, must be carefully observed before connecting power to the switch.

Lower power switches are designed for signaling electronic circuits. Do not use on relay loads or with incandescent bulbs. Resistive loads only.

Magnetically operated switches

1.0 Volts Max.	NEMA 6	-20 F to + 80F	8 mm plug-in	CS00-00-02 (2m) CS00-00-05 (5m)	

CS9D-3-00 (sold separately)

Mounting Strap for:
Roundline Plus, RT, RPD, RPHD

CS9D-F-00 (sold separately)

F-Plus, FPT (9/16" - 1-1/16" Bore)

CS9D-J-00 (sold separately)

F-Plus, FPT (1-1/2" - 4" Bore)

Magnetically operated switches

M/50* Switches

Magnetic Switch	Switch P/N	Cable Material	Type		Wire Connection	Function	Voltage	Switching Current
 IP-66	M/50/EAN/*V	PVC	Solid State	Sinking (NPN) LED	3 Wire	Normally Open	10-30 VDC	150 mA
	M/50/EAN/CP	Plug in	Solid State	Sinking (NPN) LED	3 Wire	Normally Open	10-30 VDC	150 mA
	M/50/EAP/*V	PVC	Solid State	Sourcing (PNP) LED	3 Wire	Normally Open	10-30 VDC	150 mA
	M/50/EAP/CC	Plug in	Solid State	Sourcing (PNP) LED	3 Wire	Normally Open	10-30 VDC	150 mA
	M/50/EAP/CP	Plug in	Solid State	Sourcing (PNP) LED	3 Wire	Normally Open	10-30 VDC	150 mA
	M/50/EXP/5V (ATEX)	PVC	Solid State	Sourcing (PNP) LED	3 Wire	Normally Open	10-30 VDC	150 mA
	M/50/LSU/*V	PVC	Reed	LED	2 Wire	Normally Open	10-240 VAC 10-170 VDC	180 mA
	M/50/LSU/5U	Polyurethane	Reed	LED	2 Wire	Normally Open	10-240 VAC 10-170 VDC	180 mA
	M/50/LSU/CC	Plug in	Reed	LED	2 Wire	Normally Open	10-240 VAC 10-170 VDC	180 mA
	M/50/LSU/CP	Plug in	Reed	LED	2 Wire	Normally Open	10-60 VAC 10-75 VDC	180 mA
	M/50/LXU/5V (ATEX)	PVC	Reed	LED	2 Wire	Normally Open	10-240 VAC 10-170 VDC	180 mA
	M/50/RAC/5V (changeover)	PVC	Reed	-	3 Wire	Changeover	10-240 VAC 10-170 VDC	180 mA
	TM/50/RAU/*S (high temp.)	Silicone	Reed	-	2 Wire	Normally Open	10-240 VAC 10-170 VDC	180 mA

* Plug sold separately

The M/50 switch is supplied with an adaptor which will allow it to be used in place of QM/33, QM/34, and QM/134.

Bracket for ISO/VDMA DA/8000 Series = **QM/27/2/1**

Bracket for A44000(Lintra Lite) and 90000 Series = **M/P72487**

QM/27/2/1

M/P72487

Magnetically operated switches (cont.)

M/50* Switches
